### Temporary speed cushions installed across Barrie

At least five sets of temporary speed cushions will be installed in each ward of the city for the summer season, to help slow down vehicles in areas where speeding concerns have been identified. The City’s Traffic Services department worked with councillors and reviewed resident feedback collected through the 2021 road safety survey and mapping tool to determine the locations of traffic calming measures for 2022. The City also has radar speed boards and permanent speed cushions as part of the municipality’s traffic calming initiatives. More permanent cushions will be added this fall.

To view the street listing of where the temporary cushions will be installed this summer, visit barrie.ca/TrafficCalming.

### Help protect Barrie’s drinking water

Safe drinking water starts with you! The City of Barrie provides safe and reliable drinking water to its community. The best way to ensure we have safe drinking water now, and in the future, is to protect it at its source.

- Remember driveways are NOT the best place for washing cars. The soaps and detergents make their way into the ground or the lake, which are our sources of drinking water.
- Instead, take your car to a car wash. Car washes are required to treat their wastewater before releasing it into the sewer.

Visit barrie.ca/SourceWaterProtection for tips.
