APPLY ONLINE

Deck, Shed, Pool Fence, & Sewage

APLI is the City's online application tool for Barrie's most popular permit, licence, and inspection requests. This portal provides 24/7 access to apply and pay for building permits, schedule inspections, and track your application's status from the comfort of your home!

Why go online? It's F – A – S – T . . .

Flexible. You have the option to save your applications and access them later without losing any data. This way, you can make your application when it's convenient for you.

Accessible. You have around-the-clock access to complete a number of activities including: submitting permit applications, checking the status of your application, and checking inspection results.

Simple. APLI is an easy-to-use system with automatic prompts helping you ensure that your information is entered correctly (before you can proceed to the next step). This saves you time and headaches from having to resubmit applications due to minor errors or missing information. You have access to everything you need all in one place including your applications, supporting documents, inspection results, and more.

Timely. Receive real-time results and status updates via email. No more wondering where your application stands or what the next steps are.

From our April 2018 Press Release:

"We're striving to make our permit process easier and faster and APLI is a huge step towards making this happen. In today's busy world, you shouldn't need to come to City Hall during business hours to apply for a deck permit or schedule an inspection. APLI allows residents to go through this process in the comfort of their own home, on their own schedule." – Andrea Bourrie, Director of Planning & Building Services

We are excited to inform you about our new time saving permit application tool! We have advertised on the radio, in the news, online, and we have an [APLI video](#) that you can view on barrie.ca. We want you to help spread the word too! Go ahead and tell all of your neighbours, family, and friends to:

Apply online using [APLI](#) for your **Small Residential Home Improvement Projects!**
