

In June 2023 we made improvements to the standards naming convention to enhance the overall user experience.

A [revised numbering system](#) quickly identifies all standards by category and a revised naming convention ensures file names are consistent across all standards.

For those users who have bookmarked standards files in their browser, we've replaced the online file with this message.

Please find the revised standard at barrie.ca/InfrastructureStandards and adjust your bookmark accordingly.

Thank you!
