

Notes:

1. Swale shall be adequately sloped to reduce runoff to private property.
2. Concrete shall conform to OPSS 351.
3. Chain-link fencing shall be installed, at minimum. Decorative fencing or landscape features may be used in place of chain-link, provided they offer equivalent protection against pedestrian encroachment.
4. Sidewalk joints shall be per OPSD 31.010, tooled dummy joints will not be permitted.
5. All fence footings are to be installed solely on municipal property.
6. Wooden fence posts to be 6"x6" with pressure treated fence boards.
7. Gates are not permitted in fencing.
8. Crosswalk connection preferred in the event the tangent street is a collector street.
9. In the absence of a sidewalk, an access ramp shall be installed on the receiving side.
10. Tree root barrier system to be installed (LB-18 or equivalent).
11. "No Parking" signs to be installed in boulevard on either side of access ramp.
12. Street trees, mailboxes and/or utilities will not be permitted in the clear zone or within the access ramp.
