

## My Ride Barrie (SMS) Text Your Bus Information:

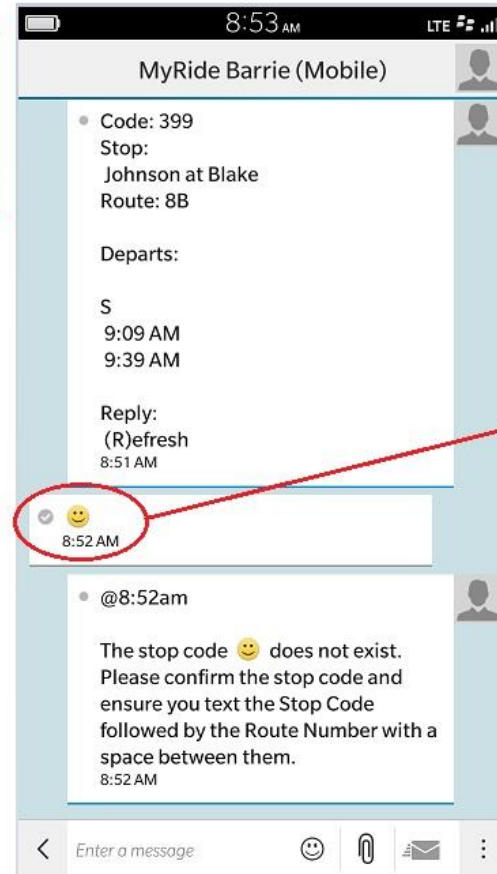

Text your Stop # (example "485") leave a space, and then text your Route # (example "4") and Route direction letter (example "A"). Then you will receive a message within the same conversation telling you the next two real time predicted arrival times of the bus and bus route to that particular bus stop.

Represents the Bus Stop Name

Text the letter "R" or "r" to refresh your bus arrival prediction, and update the arrival time

Represents most common direction of travel of a particular Route (N) North, (S) South, CW (Clockwise), CCW (Counter Clockwise), E (East), and W (West).

If you text something that the system does not recognize the system will ask you resend your message with information the system will recognize

If you only text the Stop # (example "399") you will get a message back from the system asking you for the Route Number, the system only accepts the Route Number with it's direction letter (example "8B") \*Note - All routes have a direction letter of either "A" or "B", for Route 8 the system will tell you both the (N) north and (S) south departures for a 8B-NB (Northbound) or a 8A-SB (Southbound)
