The Problem Statement, which sets the framework for this Class EA study, is as follows:

That existing traffic and infrastructure deficiencies be corrected in an environmentally friendly manner which also meets future transportation needs.

The draft Class EA document will be available online at www.barrie.ca on Friday, November 5, 2010. A copy of the draft Class EA document outlining the planning, approval, problem identification, and preliminary impact assessments of the various alternatives, will also be available for review on Friday, November 5, 2010, at the following locations:

City of Barrie
Clerk’s Office
1st Floor City Hall
70 Collier Street

City of Barrie
Engineering Department
6th Floor City Hall
70 Collier Street

Barrie Public Library
Information Desk
60 Worsley Street

Which of the following Alternatives do you feel best address the transportation problems and generate the greatest positive impacts? Please rank the following Alternatives from 1 to 3 with 1 being the most preferred.

☐ Alternative 1 Do Nothing
The Do Nothing option corresponds to the existing conditions. Under this option, no improvements or changes to the road system would be made to solve the identified problem and, as such, the problem would remain and, in fact, worsen as traffic volumes continue to increase over time.
Alternative 2 Highway Crossing
Includes 3 lanes per direction with additional turning lanes crossing Highway 400 with no access onto Highway 400.

Alternative 3 Highway Interchange
Includes 3 lanes per direction with additional turning lanes crossing Highway 400 with access onto and from Highway 400.

Please list below any specific concerns you have with the alternatives:

________________________________________________________________________
