Reason For Use:
Approximate Finish Date:

<i>For Water Operations Branch Staff Use Only</i>
Key Number:
Lock Number:

A deposit of \$1,500.00 is required prior to the metered gate valve being installed. A key will be supplied to the applicant/contractor for operation of this meter. The applicant will assume full responsibility for any damages incurred to the fire hydrant and/or metered gate valve or theft of metered gate valve by any person or persons unknown.

A minimum of 1 working day from the time of application is required to allow for installation of the hydrant metered gate valve.

CONDITIONS OF SERVICE: **NOTE: Applicant/contractor is not permitted to operate the fire hydrant at any time.**

1. Water from hydrant metered gate valve will be considered non-potable and must not be used as potable water.
2. The undersigned must disclose to the Water Operations Branch (WOB) what the intended use of the water is.
3. The user will not at any time put the City of Barrie's (hereinafter referred to as the City) potable water system at risk. We reserve the right to remove the metered gate valve and refuse use at any time if used in such a manner.
4. The City reserves the right to remove the metered gate valve if water consumption does not warrant a metered gate valve. This will be done at our discretion and the applicant's expense.
5. The metered gate valve will be installed on requested hydrant and must remain stationary. If a different hydrant is required, arrangements must be made through the WOB to relocate the metered gate valve at the applicant's expense.
6. The applicant/contractor shall only operate the metered gate valve. If it is determined that the metered gate valve or hydrant have been altered or tampered with, a fee of up to \$300.00 plus the full cost recovery for any required repairs will be applied per occurrence.
7. The applicant is responsible to pay a fee of \$75 per each additional month the metered gate valve remains on the hydrant.
8. The applicant is responsible to pay the costs of all waters that pass through the meter. The costs are as per the current rates as established in the City's Fees By-law (as amended).
9. If the metered gate valve is found to be unlocked and unattended at any time, it will be removed at the applicant's expense.
10. **The key supplied by the City must be returned no later than 5 business days after removal of the metered gate valve or a \$200.00 key replacement charge will be invoiced. No exceptions.**

Procedure:

1. The applicant agrees to **operate the metered gate valve only**. The metered gate valve shall be opened and closed slowly at all times to avoid the creation of excessive pressure within the system.
2. The applicant agrees to contact the WOB immediately should a problem arise with the hydrant or metered gate valve. The applicant agrees to keep a log recording each time the metered gate valve is used. The applicant will make the log available to the City and/or the Ministry of the Environment representatives, if requested.
3. The WOB Operator installing the valve will physically show the applicant/contractor how to operate the metered gate valve at time of installation.

The applicant shall indemnify the City against all losses, expenses, penalties and legal costs it may incur from any injuries and damages suffered by any person or entity related to any activities or omissions committed by the applicant under this permit.

Charges for the installation and removal of equipment will be at current rates outlined in the City's Fees By-law (as amended). Water shall be charged at the current maximum water rate per m³.

We, the undersigned, hereby agree to all of the above.
