Executive Summary

DS Consultants Ltd. (DS) was retained by Tonlu Properties (the “Client”) to conduct a Phase One Environmental Site Assessment (ESA) of the Property with the associated municipal address of 17-27 Jacobs Terrace, Barrie, ON, herein referred to as the “Phase One Property” or the “Site”. DS understands that this Phase One ESA may be used to support the filing of a Record of Site Condition (RSC) as part of the proposed redevelopment of the Phase One Property for residential purposes.

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objective of the Phase One ESA is to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

The Phase One Property is an irregular shaped 0.91 hectares (2.26 acres) parcel of land situated within a mixed residential, commercial, and industrial neighbourhood in the City of Barrie, Ontario. The Phase One Property is located approximately 45 m east of the intersection of Anne Street and Jacobs Terrace.

At the time of this investigation, the Phase One Property was developed with one (1) single-storey warehouse building (Site Building A) on the northwestern portion of the Site and one (1) single-storey building (Site Building B) on the northeastern portion of the Site, herein referred to as the “Site Buildings”.

Based on the records reviewed as part of the Phase One ESA, DS presents the following findings:

- ◆ The Phase One Property was first developed in the 1940s for commercial and industrial purposes. At the time of this investigation, the Phase One Property was utilized for commercial and industrial purposes and was occupied by two (2) single-storey buildings. Site Building A is currently used as a warehouse and distribution centre for First Line Rinks. Site Building B is currently used as office space, storage, and as a workshop for Cara Panel System, a house/building frames operation. The current Site Buildings were reportedly constructed between 1967 and 1978, with an expansion to Site Building B in 2017.
- ◆ The topography of the Phase One Property is generally flat with a surface elevation of 230 masl. The topography within the Phase One Study Area generally slopes to the northeast, towards Lake Simcoe, located approximately 670 m northeast of the Phase One Property. The

nearest body of water is Hotchkiss Creek located approximately 150 m north of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 3 to 6 mbgs. The shallow groundwater flow direction within the Phase One Study Area is inferred to be northeast towards Lake Simcoe.

- ◆ The Site is situated within an Ordovician physiographic region. The surficial geology within the Phase One Study area is described as “Middle Ordovician”, and the bedrock is described as “limestone, dolostone, shale, arkose, sandstone”. Based on a review of the Ontario Well Records, the bedrock in the Phase One Study Area is anticipated to be encountered at depths greater than 88.4 mbgs.
- ◆ Site Building A has historically been used for warehousing and distribution, and was registered in 2017 for the generation, use, and/or storage waste crankcase oils and lubricants, and aromatic solvent and residues (**PCA-1**).
- ◆ The Site Building B was historically occupied by several autobody shops followed by a car restoration facility, including spray paint booths for autobody repair. It is inferred that the waste disposal records for the Site are associated with the historical autobody shop. At the time of the Site reconnaissance, Site Building B was occupied by Cara Panel System, a wood frame construction operation (**PCA-2**).
- ◆ Based on the previous reports reviewed as part of this investigation, one (1) 910 L fuel oil AST was historically present on the Phase One Property. During the Site reconnaissance, the former AST was observed at the exterior of Site Building B but was disconnected (**PCA-23**).
- ◆ It is possible that fill material was used to backfill the structures historically present in the northeastern portion of the Site, and potentially for grading purposes at the time of development of the current Site Buildings (**PCA-32**).
- ◆ A total of twenty-four (24) off-site potentially contaminating activities (PCAs) were identified within the Phase One Study Area. The off-site PCAs which are considered to be contributing to areas of potential environmental concern on the Phase One Property include:
 - Various vehicle accessory operations were identified. It is inferred that the waste disposal records for the property are associated with these operations;
 - A railway line was depicted approximately 20 m north of the Site;
 - Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on Jacobs Terrace north adjacent to the Phase One Property; and,
 - Done Right Auto Care was located east adjacent to the Phase One Property at the time of the Site reconnaissance.

Based on the information obtained as part of this investigation, it is concluded that thirty-two (32) PCAs were identified within the Phase One Study Area, of which eight (8) are considered to be contributing to seven (7) APECs on, in or under the Phase One Property. A summary of the PCAs

identified and the associated APECs is provided in Table 1-1 below. Note that the PCA numbers used below are per Table 2, Schedule D of O.Reg. 153/04

Table E-1: Summary of APECs Identified on Phase One Property

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, soil and/or sediment)
APEC-1	Footprint of Site Building A	#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	On Site PCA-1	Metals, As, Sb, Se, Hg, PHCs, BTEX, VOCs, PAHs	Soil and Groundwater
APEC-2	Footprint of Site Building B	#10 - Commercial Autobody Shops	On Site PCA-2	PHC, BTEX, VOCs, PAHs, metals	Soil and Groundwater
APEC-3	Western portion of the Phase One Property	#52: Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	Off Site PCA-3	PHCs, VOCs, metals	Groundwater
APEC-4	Northern portion of the Phase One Property	# N/S: Application of De-Icing Agents PCA-7: #46 – Rail Yards, Tracks and Spurs	Off Site PCA-5	Na, Cl-	Groundwater
APEC-5	Vicinity of the former AST South of Site Building B	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On Site PCA-23	PHCs, BTEX, PAHs	Soil and Groundwater
APEC - 6	Southwestern Portion of the Phase One Property	#28 – Gasoline and Associated Products Storage in Fixed Tanks Vehicles	Off Site PCA-24	PHCs, VOCs, metals	Groundwater
APEC-7	Entire Phase One Property	#30 – Importation of Fill Material of Unknown Quality	On Site	Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

The PCAs identified in Table E-1 above are considered by the Qualified Person (QP) to be contributing to Areas of Potential Environmental Concern on the Phase One Property. The Potential Contaminants of Concern (PCOCs) identified by the QP include PHCs, VOCs, BTEX, Metals, Sb, As, Cr (VI), Hg, Se, Na, Cl-, PAHs, PCBs. Based on the findings of this Phase One ESA, it is concluded that a Phase Two ESA would be required in order to investigate the aforementioned APECs and to assess the environmental soil and groundwater conditions on the Phase One Property. A Record of Site Condition cannot be filed based on the findings of the Phase One ESA.

Based on the age of the buildings on the Phase One Property it is possible that asbestos containing materials (ACMs) and other designated substances are present. A designated substances survey should be completed prior to demolition of the houses.

1.0 Introduction

DS Consultants Ltd. (DS) was retained by Tonlu Properties (the “Client”) to conduct a Phase One Environmental Site Assessment (ESA) of the Property located at 17-27 Jacobs Terrace, Barrie, ON, herein referred to as the “Phase One Property” or the “Site”. DS understands that this Phase One ESA may be used to support the filing of a Record of Site Condition (RSC) as part of the proposed redevelopment of the Phase One Property for residential purposes.

The intended future residential property use constitutes a more sensitive property use, as defined under O.Reg. 153/04 (as amended) than the current industrial use. Given that the proposed change in property use is to a more sensitive property use, the filing of a Record of Site Condition (RSC) with the Ontario Ministry of Environment, Conservation and Parks (MECP) will be mandated under O.Reg. 153/04 (as amended).

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objective of the Phase One ESA is to identify the presence or absence of potentially contaminating activities (PCAs) on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an Area of Potential Environmental Concern (APEC) on the Phase One Property. The information obtained by the Phase One ESA will be used to assess whether further investigation in the form of a Phase Two ESA is merited. It should be noted that this Phase One ESA does not include any sampling or testing and is based solely on a review of readily available data, and observations made during the Phase One Site Reconnaissance.

1.1 Phase One Property Information

The information for the Phase One Property is provided in the following Table.

Table 1-1: Phase One Property Information

1.2 Site Description

The Phase One Property is a 0.91 hectares (2.26 acres) parcel of land situated within a mixed residential, commercial, and industrial neighbourhood in the City of Barrie, Ontario. The Phase One Property is located approximately 45 m east of the intersection of Anne Street and Jacobs Terrace. A Site Location Plan is provided in Figure 1.

For the purposes of this report, Jacobs Terrace is assumed to be aligned in an east-west orientation, and Anne Street in a north-south orientation. A Plan of Survey for the Phase One Property dated December 8, 2020 and prepared by C. Wahba Surveying Ltd. an Ontario Land Surveyor, has been provided under Appendix A.

The Site currently includes one (1) single-storey warehouse building (Site Building A) on the northwestern portion of the Site and one (1) single-storey building (Site Building B) on the northeastern portion of the Site, herein referred to as the “Site Buildings”. Site Building A is precast concrete and is currently used as a warehouse and distribution centre for First Line Rinks. Site Building B is a slab-on-grade building with stucco siding, and is currently used as office space, storage, and as a workshop for Cara Panel System, a house/building frames operation. A Site Plan depicting the orientation of the buildings on-site is provided in Figure 2

2.0 Scope of Investigation

The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04, as amended (Phase One ESA requirements). This included:

- ◆ A review of reasonably ascertainable records and reports regarding historical and current use, regulatory information, occupancy, and activities for the Phase One Property, including:
 - Physical setting information such as aerial photographs, topographic mapping, available historical maps and drawings;
 - Company records (e.g., site plans, building plans, permit records, production and maintenance records, asbestos surveys, site utility drawings, emergency response and contingency plans, spill reporting plans and records, inventories of chemicals and their

usage (e.g. WHMIS), environmental monitoring data, waste management records, inventory of underground and aboveground tanks, environmental audit reports) provided to DS;

- Geological and hydrogeological information in published government maps and/or reports;
 - A review of information on file with Ecolog ERIS, a commercial database that provides information from numerous private, provincial, and federal environmental databases/registries;
 - Review of fire insurance plans, municipal directory documentation and available environmental reports that are pertinent to the Phase One Property;
 - Regulatory Information, including such as Permits or Certificates of Approval (pertaining to activities that may impact the condition of the property, orders, control orders, or complaints related to environmental compliance that may impact the condition of the property, and violations of environmental statutes, regulations, by-laws, and permits that may impact the condition of the property);
 - Environmental source information including published and online records from Ministry of Environment, Conservation and Parks (MECP), Environment Canada, Technical Standards and Safety Authority (TSSA), and the City of Toronto; and
 - The Ontario Ministry of Natural Resources (MNR) Natural Heritage Information Centre database and the Conservation Authority website for information specific to natural areas, such as locations of environmentally sensitive areas or species.
- ◆ Interviews with available individuals having knowledge of current and/or past site activities;
- ◆ An inspection of the Phase One Property, and the activities on the adjacent properties, including and assessment of the following:
- The site operations, processes, and waste management currently carried out on the Phase One Property.
 - The neighbouring land uses (i.e. identification of environmentally sensitive neighbours, as well as an assessment of potential off-site sources of contamination);
 - The source of potable water for the Phase One Property and properties within the Phase One Study Area;
 - The potential presence of existing or former above-ground or underground fuel storage tanks (ASTs or USTs);
 - Possible cut and fill operations that may resulted in the importation of fill material of unknown quality;
 - The presence/absence of floor cracks, hydraulic hoists, elevators, sumps and drains;
 - Areas suspected to contain evidence of surficial and sub-surface impacts (e.g. areas of staining);

- The potential presence of various Designated Substances and building materials including:
 - Friable and non-friable asbestos
 - Urea formaldehyde foam insulation (UFFI)
 - Chlorofluorocarbons (CFCs) in air conditioning and refrigeration equipment
 - PCB-containing materials and electrical equipment
 - Lead-based paint
 - Mould
 - The presence/absence of wells, pits and lagoons, drainage sumps and floor drains, sewage and wastewater disposal pipelines; and
 - General site conditions, including topography and drainage, standing water, right-of-ways, presence of underground utilities, evidence of stained or odorous soils, and stressed vegetation.
- ◆ Evaluation of the information and documentation of the results in the form of a Phase One ESA Report.

The objectives of the Phase One ESA are:

1. To assess the environmental condition of the Phase One Property to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property;
2. To identify potentially contaminating activities within the Study Area (i.e., areas within 250 m of the Property), and to assess if Areas of Potential Environmental Concern (APECs) exist on the Phase One Property;
3. To identify the Potential Contaminants of Concern associated with the PCAs identified; and
4. To provide a basis for subsequent investigation, if required, based on the findings of the Phase One ESA.

3.0 Records Review

3.1 General

3.1.1 Phase One Study Area Determination

Based on a review of the available historical records and the observations made during the Phase One Site Reconnaissance, no heavy industrial properties or other relevant potentially contaminating activities were observed which were considered to merit expanding the Phase One Study Area. As such the Phase One Study Area was defined by a 250 m radius around the Phase One Property boundary, in accordance with O.Reg. 153/04 (as amended).

The properties within 250 m of the Phase One Property generally consist of residential, community, industrial, and commercial land uses. An assessment of the historical and current use of all properties within the Phase One Study Area was conducted in order to assess for the presence/absence of

potentially contaminating activities. A summary of the potentially contaminating activities identified within the Phase One Study Area is provided under Section 6.2. A plan depicting the Phase One Study Area limits as well as the current land uses is presented in Figure 3.

3.1.2 First Developed Use Determination

The first developed use of the Phase One Property is considered under O.Reg. 153/04 (as amended) to be either the first use of the Phase One Property in or after 1875 that resulted in the development of a building or structure on the property, or the first potentially contaminating use or activity on the Phase One Property.

The determination of the first developed use of the Phase One Property was based on a review of available aerial photographs, historical maps, fire insurance plans, city directories, and interviews. Based on the information obtained, the first developed use of the Phase One Property was for industrial purposes and occurred in 1946.

3.1.3 Fire Insurance Plans

Fire insurance plans were prepared between 1875 and 1923 and revised in some areas until the 1970s. A search of Fire Insurance Plans (FIPs) was undertaken at the Metropolitan Toronto Reference Library and City Toronto's online services. FIPs were reviewed to confirm the building construction, occupancy, and potential fire hazardous with details regarding storage tanks, boilers, transformers, electrical room, etc. A summary of the pertinent information depicted in the FIPs is provided in Table 3-1 below:

Table 3-1: Summary of FIP Observations

Date	Location	PCA ID No.
1917	Phase One Property	
	Phase One Property not covered by the 1917 FIPs.	N/A
	Phase One Study Area	
	North Neighbouring Properties:	
	The properties north of the Site appeared to be commercial and residential land uses.	N/A
	East Neighbouring Properties:	
	The properties east of the Site appeared to be commercial, institutional, and industrial land uses.	N/A
	South Neighbouring Properties:	
	The south adjacent properties appeared to be occupied by residential dwellings.	N/A
	West Neighbouring Properties:	
	Not covered by the 1917 FIPs.	N/A

1946	Phase One Property	
	Phase One Property appeared to be vacant, with the exception of two (2) small structures located on the northeast corner of the Site. The structures were not similar in size or configuration as the present-day Site Buildings.	N/A
	Phase One Study Area	
	North Neighbouring Properties:	
	Jacobs Terrace (PCA-5) and a railway line (PCA-7) were located to the north of the Site followed by several residential dwellings at present-day 113 Tiffin Street.	PCA-5 PCA-7
	123 Tiffin Street was occupied by an Imperial Oil Ltd. facility containing three (3) oil tanks and an oil building located on the southern portion of the property (PCA-6).	PCA-6
	91 Tiffin Street was occupied by a McGill-Frontenac Oil Co. Ltd. facility containing four (4) oil tanks located on the southern portion of the property (PCA-10).	PCA-10
	131 Tiffin Street (formerly 135 Tiffin Street) was occupied by a petroleum bulk fuel outlet containing four (4) oil tanks located along the south property line (PCA-25).	PCA-25
	East Neighbouring Properties:	
	The east adjacent property (present-day 272 Innisfil Street) was occupied by a large-scale pork packing plant. The building contained a hog shed in the west portion and a packaging factory in the east portion.	No PCA
	South Neighbouring Properties:	
	The south neighbouring properties consisted of residential dwellings.	No PCA
	West Neighbouring Properties:	
	The Simcoe County Corp. Yard is depicted at 141 Tiffin Street. The property is depicted with a service garage, an asphalt tank, and two diesel underground storage tanks. 141 Tiffin Street is located approximately 130 m northwest of the Site.	PCA-27
1971	Phase One Property	
	Phase One Property not covered by the 1971 FIP.	No PCA
	Phase One Study Area	
	North Neighbouring Properties:	
	113 Tiffin Street was occupied by Simcoe Block Co. Ltd., a concrete block manufacturing facility, and two USTs were depicted on the property (PCA-9)	PCA-9
	123 Tiffin Street was occupied by Imperial Oil Ltd., with ten (10) oil tanks and an oil warehouse depicted on the southern portion of the property (PCA-6).	PCA-6
	91 Tiffin Street was occupied by Texaco Canada Ltd., with nine (9) oil tanks and an oil warehouse depicted on the property (PCA-10).	PCA-10
	East Neighbouring Properties:	

	280 Innisfil Street, east adjacent to the Site, was occupied by a truck maintenance garage and contained two (2) diesel underground storage tanks (USTs) (PCA-24).	PCA-24
	272 Innisfil Street, east adjacent to the Site, was occupied by various warehousing tenants including a tile facility, storage facilities and a veterinary supplier, similar to present day. Two (2) ASTs were depicted on the property (PCA-26).	PCA-26
South Neighbouring Properties:		
	Not covered by the 1971 FIPs.	No PCA
West Neighbouring Properties:		
	Additional commercial development was observed at the west neighbouring properties.	No PCA

Based on a review of the FIPs, the Phase One Property appears to have been first developed in 1946; however, the Phase One Property was not covered in the subsequent 1971 FIPs. Several PCAs were identified on the FIPs, and further discussion on the PCAs identified is presented under Section 6.2.

3.1.4 Chain of Title

A Chain of Title search for the Property was prepared as part of the Phase One ESA. The Chain of Title covered the period from 1820 to the current (2021), and is summarized in Section 6.1 of this report. The Chain of Title search indicated that the date of patent for the Phase One Property was 1820. The Phase One Property appears to have been occupied by various private individuals from 1821 to 1935, and by private companies from 1947 to 2021. Based on the information provided, it is inferred that the first developed use of the Phase One Property was for industrial land use. The current owners of the property “Tonlu Holdings Limited” took ownership in 2021 for industrial land use.

Information for the chain of title and parcel register is provided in Appendix A.

3.1.5 Environmental Reports

DS reviewed the following environmental reports prepared for the Property. The reports were provided by the client to DS.

- ◆ *“Phase I Environmental Site Assessment, 17-21 Jacobs Terrace, Barrie, ON”, prepared for 2564757 Ontario Ltd., prepared by Pinchin Ltd., dated May 25, 2017 (Pinchin 2017 Phase I ESA);*
- ◆ *“Phase I Environmental Site Assessment, 17-21 Jacobs Terrace, Barrie, ON”, prepared for Tonlu Holdings Limited c/o Rinomato Group of Companies. Prepared by prepared by Pinchin Ltd., dated November 19, 2020 (Pinchin 2020 Phase I ESA).*

These reports were reviewed in order to assess for the presence of known or suspected PCAs and APECs, and to determine if there are known soil and/or groundwater impacts on the Phase One

Property or on Properties within the Phase One Study Area. A summary of the pertinent details of the reports reviewed is provided below:

Pinchin 2017 Phase I ESA

The 2017 Pinchin Phase I ESA was conducted in general accordance with CSA document entitled "Phase I Environmental Site Assessment" (CSA Document Z768-01), dated November 2001 (reaffirmed 2006), and included a review of readily available historical records and reasonably ascertainable regulatory information, a Site Reconnaissance, interviews, evaluation of information, and reporting. The following pertinent information was noted by DS:

- ◆ During the completion of the Phase I ESA, the Site was used for commercial and industrial purposes by Radical Rods, Rides and Restorations.
- ◆ 17-27 Jacobs Terrace was developed with one vacant (1) single-storey warehouse and two (2) single-storey buildings that were being utilised as a commercial vehicle restoration and repair facility at the time of the investigation. According to Pinchin, the Site Buildings were constructed between 1971 and 1978.
- ◆ 17-27 Jacobs Terrace was historically occupied by various automobile repair shops **(PCA-2)** and warehouse operations **(PCA-1)**.
- ◆ Various fuel companies (Esso, Imperial Oil, and Four Star Fuels) were listed at 123 Tiffin Street, located approximately 30 m north of the Site, between 1961 and 1998/1999 **(PCA-6)**.
- ◆ Various fuel companies (Huron Fuels and Texaco) were listed at 91 Tiffin Street, located approximately 30 m northeast of the Site, between 1961 and 1992 **(PCA-10)**.
- ◆ Supertest Petroleum Corporation was listed at 131 Tiffin Street, located approximately 70 m northwest of the Site, in 1961 **(PCA-25)**.
- ◆ 280 Innisfil Street was occupied by a small truck maintenance garage and contained two (2) diesel oil USTs **(PCA-24)**.
- ◆ 113 Tiffin Street was occupied by Simcoe Block Co. Ltd., a concrete block manufacturing facility, and two USTs were depicted on the property **(PCA-9)**

A Phase II ESA was recommended to assess the soil and groundwater quality with respect to the issues of potential environmental concern identified.

Pinchin 2020 Phase I ESA

The 2020 Pinchin Phase I ESA was conducted in general accordance with CSA document entitled "Phase I Environmental Site Assessment" (CSA Document Z768-01), dated November 2001 (reaffirmed 2006), and included a review of readily available historical records and reasonably ascertainable regulatory information, a Site Reconnaissance, interviews, evaluation of information, and reporting. The following pertinent information was noted by DS:

- ◆ During the completion of the Phase I ESA, the Site was developed with one (1) single-storey building and one (1) single-storey warehouse building. The Site Buildings were unoccupied at the time of the investigation.
- ◆ One (1) fuel oil AST, with a capacity of 910 L, was observed at the exterior of Site Building B (PCA-23).

Based on the results of the 2020 Phase I ESA completed by Pinchin, a Phase II ESA was not recommended.

Previous Report Summary

Based on a review of the previous environmental investigations completed for the Site, the following potentially contaminating activities were noted:

- ◆ **PCA-1:** #58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
- ◆ **PCA-2:** #10 - Commercial Autobody Shops and #27 - Garage and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
- ◆ **PCA-6:** #28 – Gasoline and Associated Products Storage in Fixed Tanks
- ◆ **PCA-9:** #28 – Gasoline and Associated Products Storage in Fixed Tanks
- ◆ **PCA-10:** #28 – Gasoline and Associated Products Storage in Fixed Tanks
- ◆ **PCA-23:** #28 – Gasoline and Associated Products Storage in Fixed Tanks
- ◆ **PCA-24:** #28 – Gasoline and Associated Products Storage in Fixed Tanks and #27 - Garage and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
- ◆ **PCA-25:** #28 – Gasoline and Associated Products Storage in Fixed Tanks

3.1.6 City Directories

Ecolog ERIS provided the City Directories from the years 1937 to 1999 at approximately 5-year intervals.

The Phase One Property is first listed in the directories in 1976 for commercial and industrial use, occupied by A1 Auto Body and Emco Supply. The Site was occupied by No Name Auto Body from 1982 to 1999. The adjacent properties were first listed in 1952 and generally appeared to have been used for commercial and industrial purposes. The following listings in the City Directories were noted by DS to be of potential environmental concern:

Table 3-2: Historical Occupants of Potential Environmental Concern on the Phase One Property

Address	Occupant	Date Range	Inferred Property Use	PCA ID No.
17 Jacobs Terrace (Site Building B)	A1 Auto Body	1976	Commercial – Autobody shop	PCA-2
	No Name Auto Body	1982 - 1999	Commercial – Autobody shop	PCA-2
27 Jacobs Terrace (Site Building A)	Emco Supply	1976 - 1999	Commercial – Warehouse	PCA-1

Table 3-3: Historical Occupants of Potential Environmental Concern within Phase One Study Area

Address	Location Relative to Phase One Property	Occupant	Date Range	Inferred Property Use	PCA ID No.
89 Tiffin Street	80 m northeast of the Phase One Property	- Marathon Oil Co. - Imperial Oil Ltd. - Supertest Oil Co	1937	Commercial – Fuel Oil Operation	PCA-28
100 Tiffin Street	130 m north of the Site	McColl Frontenac Oil Co	1952	Commercial – Fuel Oil Operation	PCA-29
		A-1 Automotive Services	1999	Commercial – Autobody shop	PCA-31
131 Tiffin Street	80 m northwest of the Site	Supertest Petroleum Corp.	1952 - 1961	Commercial – Fuel Oil Operation	PCA-25
91 Tiffin Street	50 m northeast of the Site	Texaco Canada Ltd	1961 - 1971	Commercial – Fuel Oil Operation	PCA-10
		Huronias Fuels Ltd.	1976 - 1989	Commercial – Fuel Oil Operation	
		Four Star Fuels	1994	Commercial – Fuel Oil Operation	
113 Tiffin Street	40 m north of the Site	Simcoe Block Ltd.	1961 - 1976	Commercial – Fuel Oil Operation	PCA-9
123 Tiffin Street	30 m north of the Site	Imperial Oil Ltd.	1961 - 1976	Commercial – Fuel Oil Operation	PCA-6
		Four Star Fuels	1989 - 1999	Commercial – Fuel Oil Operation	
84 Tiffin Street	150 m northeast of the Site	- Cowden's Service Station - Klein's Texaco Service Station -Texaco Service Station	1961 - 1976	Commercial – Gas Station	PCA-30
		B & K Auto Service	1994	Commercial – Auto Repairs	
		Stroud Motor Garage	1999	Commercial – Auto Repairs	
134 Tiffin Street	130 m northwest of the Site	Stephenson's Rent-All Inc	1994 - 1999	Commercial – Auto retail	PCA-13
151 Tiffin Street	160 m west of the Site	Central Ontario Tire Motor Sports	1999	Commercial – Auto Repairs	PCA-19
		Gator Automotive Inc.	1999	Commercial – Auto Repairs	
81 Essa Road	140 m southeast of the Site	Pierce Motors Ltd.	1966	Commercial – Auto Repairs	PCA-20
		B & K Auto Service	1999	Commercial – Auto Repairs	
91 Essa Road	140 m southeast of the Site	Smith Texaco Service	1976	Commercial – Gas Station	PCA-15
		Cunnington Texaco Service	1989	Commercial – Gas Station	
		C J's Esso	1994	Commercial – Gas Station	
259 Innisfil Street	120 m east of the Site	Simcoe District Co-Operative Services	1976 - 1999	Commercial – Gas Station	PCA-16

Address	Location Relative to Phase One Property	Occupant	Date Range	Inferred Property Use	PCA ID No.
				Commercial – Auto Repairs	
				Commercial- Bulk Fertilizer	PCA-17
280 Innisfil Street	East Adjacent to the Site	Rennick's Auto Centre	1989 - 1994	Commercial – Auto Repairs	PCA-24
		- Northwest Auto Sales -Moffatt Used Car Sales -Beatty Automotive Services -Klassy Kar	1999	Commercial – Auto Retail/Repairs	
18 Centre Street	170 m south of the Site	Piper Pest Control	1999	Commercial – Bulk Pesticides	PCA-14
159 Anne Street	West adjacent to the Site	H & H Sports Vehicles & Small Engines	1982	Commercial – Vehicle Equipment Storage	PCA-3

A complete summary of the City Directory listings reviewed has been included under Appendix B. The locations of the historical occupants of potential environmental concern are presented on Figure 4 and are discussed further under Section 6.2.

3.2 Environmental Source Information

3.2.1 Ecolog Eris Report

EcoLog Environmental Risk Information Services Ltd. (ERIS) is an organization that maintains and searches various government and private databases for property-related environmental information.

DS contacted EcoLog Environmental Risk Information Services Ltd. (EcoLog ERIS), an environmental database and information service company, to request a search of government and private records for information pertaining to the Phase One Property and Phase One Study Area. EcoLog searched 15 Federal databases, 37 Provincial databases and 10 private databases. A summary of the databases provide by ERIS is provided in the Table below:

Table 3-4: Summary of Environmental Databases Reviewed

Federal Government Source Databases	Private Source Databases
-------------------------------------	--------------------------

Contaminated Sites on Federal Land; Environmental Effects Monitoring; Environmental Issues Inventory System; Federal Convictions; Fisheries & Oceans Fuel Tanks; Indian & Northern Affairs Fuel Tanks; National Analysis of Trends in Emergencies System (NATES); National Defense & Canadian Forces Fuel Tanks; National Defense & Canadian Forces Spills; National Defense & Canadian Forces Waste Disposal Sites; National Environmental Emergencies System (NEES); National PCB Inventory; National Pollutant Release Inventory; Parks Canada Fuel Storage Tanks; and Transport Canada Fuel Storage Tanks.	Anderson's Storage Tanks; Anderson's Waste Disposal Sites; Automobile Wrecking & Supplies; Canadian Mine Locations; Canadian Pulp and Paper; Chemical Register; ERIS Historical Searches; Oil and Gas Wells; Retail Fuel Storage Tanks; and Scott's Manufacturing Directory.
Provincial Government Source Databases	
Abandoned Aggregate Inventory; Abandoned Mine Information System; Aggregate Inventory; Borehole; Certificates of Approval; Certificates of Property Use; Commercial Fuel Oil Tanks; Compliance and Convictions; Drill Hole Database; Environmental Activity and Sector Registry; Environmental Compliance Approval; Environmental Registry; Fuel Storage Tank; Fuel Storage Tank – Historic; Inventory of Coal Gasification Plants and Coal Tar Sites; TSSA Historic Incidents; TSSA Incidents; TSSA Pipeline Incidents; TSSA Variances for Abandonment of Underground Storage Tanks;	Inventory of PCB Storage Sites; Landfill Inventory Management Ontario; List of TSSA Expired Facilities; Mineral Occurrences; Non-Compliance Reports; Ontario Oil and Gas Wells; Ontario Regulation 347 waste Generators Summary; Ontario Regulation 347 Waste Receivers Summary; Ontario Spills; Orders; Permit to Take Water; Pesticide Register; Private and Retail Fuel Storage Tanks; Record of Site Condition; Waste Disposal Sites – MECP 1991 Historical Approval Inventory; Waste Disposal Sites – MECP CA Inventory; Wastewater Discharger Registration Database; and Water Well Information System

The ERIS report indicated that there were thirteen (13) listings for the Phase One Property, and 409 listings for the remaining properties within the Phase One Study Area. A copy of the ERIS report has been provided under Appendix C. A summary of the potentially contaminating activities identified in the ERIS report and other pertinent information is provided in the Table below:

Table 3-7: Summary of ERIS Report Findings on Phase One Property

Database/Date	Entry Details	PCA ID No.
ERIS Historical Searches (EHS)	Four (4) EHS listings were found for the Phase One Property, indicating that previous environmental investigations have been conducted. No environmental concerns were identified in the ERIS historical searches.	N/A
Ontario Regulation 347 Waste Generator Summary (GEN)	Copperhead Capital Corp., located at the Site (27 Jacobs Terrace), was registered in 2017 for the generation, use, and/or storage waste crankcase oils and lubricants, and aromatic solvent and residues.	PCA-1
	No Name Auto Body, a garage and general auto repair operation located at the Site (17 Jacobs Terrace), was registered from 1986 to 2001 for the generation, use, and/or storage of petroleum distillates.	PCA-2
Water Well Information System (WWIS)	Five (5) test holes were identified on the Site.	N/A

Table 3-5: Summary of ERIS Report Findings within Phase One Study Area

Database/Date	Entry Details	PCA ID No.
Certificates of Approval (CA)	Esso Petroleum Canada, located at the corner of Anne Street and Tiffin Street, approximately 110 m northeast the Site, had one (1) CA issued for industrial wastewater in 1988. P.U.C. Barrie had one (1) CA issued for municipal water in 1996.	PCA-21
	10722872 Ontario Limited, located at 49 Jacobs Terrace, approximately 70 m east of the Site, had one (1) CA issued for municipal and private sewage works in 2002.	N/A
	P.U.C. Barrie, located at the corner of Innisfil Street and Essa Road, approximately 200 m southeast from the Site, had one (1) CA issued for municipal water in 1999.	N/A
	3170497 Canada Inc., located at 55 Essa Road, approximately 210 m east of the Site, had one (1) CA issued for air approval in 2008.	N/A
Delisted Fuel Tanks (DTNK)	Imperial Oil Ltd., located at 123 Tiffin Street, approximately 30 m north of the Site, was listed as an expired FS facility in 1996 and for FS piping in 2012. 1182778 Ontario Ltd O/A Ted's Haulage was listed for one (1) expired FS highway gas/diesel tank in 2012.	PCA-6
	Imperial Oil Ltd., located at 91 Tiffin Street, approximately 50 m northeast of the Site, was listed as an expired FS facility in 1992. Huronias Fuels Ltd. was listed for one (1) expired gas/diesel highway tank in 2012.	PCA-10
	Labar Sales & Distribution Ltd., located at 94 Tiffin Street, approximately 70 m west of the Site, was registered for one (1) 4500 L steel fuel oil tank in 2013.	PCA-11

Database/Date	Entry Details	PCA ID No.
	Stephenson's Rent All Inc., located at 134 Tiffin Street, approximately 130 m northwest of the Site, was listed as an expired FS facility with one (1) propane tank in 2012. Due to the nature of the operations at this property (i.e., propane cylinder handling), it was not anticipated to have impacted the environmental quality of the Site and is not a PCA.	No PCA
	Esso, located at 91 Essa Road, approximately 140 m southeast of the Site, was listed as an expired FS facility in 1992.	PCA-14
	Growmark Inc., located at 259 Innisfil Street, approximately 120 m east of the Site, was listed for the following records in 2012: • An expired FS facility and gas station; • Five (5) expired highway gasoline/diesel tanks; • An expired propane cylinder handling facility; • An expired propane refill facility; • Six (6) records for expired FS piping; and, • Two (2) expired propane tanks.	PCA-16
Environmental Activity and Sector Registry (EASR)	An automotive refinishing facility, located at 151 Tiffin Street, approximately 160 m west of the Site, was registered for one (1) EASR in 2019.	PCA-19
Environmental Compliance Approval (ECA)	10722872 Ontario Limited, located at 49 Jacobs Terrace, approximately 70 m east of the Site, had one (1) ECA issued for municipal and private sewage works in 2002.	N/A
	3170497 Canada Inc., located at 55 Essa Road, approximately 210 m east of the Site, had one (1) ECA issued for air approval in 2008.	N/A
	The Corporation of the City of Barrie had one (1) ECA issued for municipal and private sewage works and municipal drinking water systems in 2002 for Anne Street between 159 Jacob's Terrace and 281 Dunlop Street.	N/A
ERIS Historical Searches (EHS)	Nineteen (19) listings were identified for ERIS Historical Searches within the vicinity of the Phase One Study Area. No environmental concerns were identified in the ERIS historical searches.	N/A
List of Expired Fuels Safety Facilities (EXP)	Imperial Oil Ltd., located at 123 Tiffin Street, approximately 30 m north of the Site, was listed for one (1) liquid fuel tank in 1989.	PCA-6
	Simcoe Block (1979) Ltd., located at 113 Tiffin Street, approximately 40 m north of the Site, was listed for one (1) liquid fuel tank in 1990.	PCA-9
	Imperial Oil Ltd., located at 91 Tiffin Street, approximately 50 m northeast of the Site, was listed for one (1) liquid fuel tank in 1989.	PCA-10
	Esso, located at 91 Essa Road, approximately 140 m southeast of the Site, was listed for one (1) liquid fuel tank in 1992.	PCA-14

Database/Date	Entry Details	PCA ID No.
	The property located at 259 Innisfil Street, approximately 120 m east of the Site, was listed for seven (7) liquid fuel tanks in 1995 and six (6) liquid fuel tanks in 2000.	PCA-16
Fuel Storage Tank (FST)	Imperial Oil Ltd., located at 123 Tiffin Street, approximately 30 m north of the Site, was listed for one (1) liquid fuel tank in 1989.	PCA-6
	Simcoe Block (1979) Ltd., located at 113 Tiffin Street, approximately 40 m north of the Site, was listed for one (1) steel liquid fuel single wall UST in 1990.	PCA-9
	Imperial Oil Ltd., located at 91 Tiffin Street, approximately 50 m northeast of the Site, was listed for one (1) steel liquid fuel single wall UST in 1989.	PCA-10
	Labar Sales & Distribution Ltd., located at 94 Tiffin Street, approximately 70 m west of the Site, was registered for one (1) 4500 L steel single wall UST in 2009.	PCA-11
	Esso, located at 91 Essa Road, approximately 140 m southeast of the Site, was listed for one (1) steel liquid fuel single wall UST in 1992.	PCA-14
	Thirteen (13) steel liquid fuel single wall USTs were listed for 259 Innisfil Street, approximately 120 m east of the Site, between 1995 and 2000.	PCA-16
Ontario Regulation 347 Waste Generator Summary (GEN)	Mckerlie Millen, a vehicle accessory operation, located at 159 Anne Street west adjacent to the Site, was registered for the generation, use, and/or storage of paint/pigment/coating residues in 1998. - Barrie Part Mart, a tire store, was registered for the generation, use, and/or storage of petroleum distillates in 1986 through 1998. - Carquest, a vehicle accessory operation, was registered for the generation, use, and/or storage of paint/pigment/coating residues in 1997 through 2001.	PCA-3
	Frantic Freddy's Ltd., a clothing operation, located at 272 Innisfil Street west adjacent to the Site, was registered for the generation, use, and/or storage of petroleum distillates and halogenated solvents in 1986 through 1998. The operation is not anticipated to generate significant quantities of waste, as such this is not considered to be a PCA.	N/A
	Health Canada, a general warehousing and storage operation, located at 272 Innisfil Street west adjacent to the Site was registered for pharmaceutical wastes in 2009. Due to the nature of the operation and associated waste products, it was not anticipated to have impacted the environmental quality of the Site.	N/A

Database/Date	Entry Details	PCA ID No.
	Esso Petroleum Canada, located at 123 Tiffin Street, approximately 30 m north of the Site, was registered for the generation, use, and/or storage of other specified inorganics, light fuels, oil skimmings and sludges, and waste oils and lubricants in 1988 through 2003. Imperial Oil, a petroleum product wholesale distributor, was registered for the generation, use, and/or storage of other specified inorganics, light fuels, oil skimmings and sludges, and waste oils and lubricants in 2004 through 2017, 2020, and 2021.	PCA-6
	The Corporation of the County of Simcoe, located at 113 Tiffin Street, approximately 40 m north of the Site, was registered for the generation, use, and/or storage of oils skimmings and sludges in 2004 through 2006, and in 2009 through 2016; and for waste oils/sludges (petroleum based) in 2018 and 2020. The operation is not anticipated to generate significant quantities of waste, as such this is not considered to be a PCA.	PCA-9
	Texaco Canada Inc., a petroleum product wholesaler, located at 91 Tiffin Street, approximately 50 m northeast of the Site, was registered for the generation, use, and/or storage of light fuels in 1986 through 1998. - Esso Petroleum Canada, a petroleum product wholesaler, was registered for the generation, use, and/or storage of other specified inorganics, light fuels, oil skimmings and sludges, and waste oils & lubricants in 1992 through 1998. - Imperial Oil Ltd., a petroleum product wholesale distributor, was registered for the generation, use, and/or storage of light fuels and oil skimmings and sludges in 2002 through 2009; and for waste oils and lubricants in 2010 through 2016, 2018, 2020, and 2021.	PCA-10
	Simcoe Condominium Corporation, located at 49 Jacobs Terrace, approximately 70 m east of the Site, was registered for the generation, use, and/or storage of oil skimmings and sludges in 2014 through 2015; and for waste oils/sludges (petroleum based) in 2018, 2020, 2021. The operation was not anticipated to generate significant quantities of waste, as such it was not considered to be a PCA.	N/A
	Labar Sales & Distribution Ltd., located at 94 Tiffin Street, approximately 70 m west of the Site, was registered for the generation, use, and/or storage of waste compressed gases and paint/pigment/coating residues in 2004, 2007, and 2008; for waste oils and lubricants in 2012 through 2016, and 2018; and for aromatic solvent and residues in 2021. The operation is not anticipated to generate significant quantities of waste, as such it was not considered to be a PCA.	N/A

Database/Date	Entry Details	PCA ID No.
	Stephenson's Rent All Inc., an industrial machinery rental operation, located at 134 Tiffin Street, approximately 130 m northwest of the Site, was registered for the generation, use, and/or storage of petroleum distillates, light fuels, halogenated solvents, oil skimmings and sludges, aromatic solvents, and waste oils and lubricants in 1989 through 2001. Barrie Rent-All Inc., was registered for the generation, use, and/or storage of petroleum distillates, light fuels, halogenated solvents, oil skimmings and sludges, aromatic solvents, waste oils and lubricants, and paint/pigment/coating residues in 2002 through 2016, 2018, and 2021.	PCA-13
	Tantalo Enterprises Ltd., located at 151 Tiffin Street, approximately 160 m west of the Site, was registered for the generation, use, and/or storage of oil skimmings and sludges in 1992 through 2004. A commercial screen printing operation was registered for the generation, use, and/or storage of petroleum distillates in 2015. Due to the nature of the operations and associated waste products, they were not anticipated to have impacted the environmental quality of the Site.	N/A
	Westburne Industrial Enterprises Ltd., located at 141 Tiffin Street, approximately 140 m northwest of the Site, was registered for the generation, use, and/or storage of halogenated solvents, waste compressed gases, and waste oils and lubricants in 1990 through 1994. The operation is listed as an equipment supplier and is not anticipated to generate significant quantities of waste, as such it was not considered to be a PCA. 780463 Ontario Ltd. was registered for the generation, use, and/or storage of waste oils/sludges (petroleum based) in 2020 and 2021. The operation was not anticipated to generate significant quantities of waste, as such it was not considered to be a PCA.	N/A
	Simcoe District Co-op, located at 259 Innisfil Street, approximately 120 m east of the Site, was registered for the generation, use, and/or storage of light fuels in 1988 through 2004. It is inferred that the waste disposal records for the property are associated with the vehicle repair operation.	PCA-19
	Glenn Taylor Dentistry Professional Corporation, located at 104 Essa Road, approximately 220 m southeast of the Site, was registered for the generation, use, and/or storage of pathological wastes in 2012 through 2019. The type of waste generated is not considered to be an issue of concern with respect to the soil and groundwater quality at the Phase One Property.	N/A

Database/Date	Entry Details	PCA ID No.
	Canadian Mental Health Association, located at 128 Anne Street, approximately 240 m northwest of the Site, was registered for the generation, use, and/or storage of pathological wastes in 2018, 2020, and 2021. The type of waste generated is not considered to be an issue of concern with respect to the soil and groundwater quality at the Phase One Property.	N/A
TSSA Historic Incidents (HINC)	Natural gas was released at a private residence located at 188 Anne Street South, approximately 210 m southwest of the Site, in 2006.	N/A
Fuel Oil Spills and Leaks (INC)	An incident was listed at the intersection of Anne Street and Tiffin Street for a natural gas release due to a pipeline hit in 2009.	N/A
	Vapour was released in 2016 at 259 Innisfil Street, approximately 120 m east of the Site, due to a damaged propane tank.	N/A
National Pollutant Release Inventory (NPRI)	Imperial Oil (NPRI ID 8800001180), a petroleum product wholesale distributor, located at 123 Tiffin Street, approximately 30 m north of the Site, reported the on-site releases of VOCs in 2004.	PCA-6
Pesticide Registry (PES)	TSC Stores L.P., located at 259 Innisfil Street, approximately 120 m east of the Site, was listed as a general vendor. Simcoe District Co-op was listed as a general vendor and operator. The retail sale of pesticides is not considered to be a potentially contaminating activity to the Phase One Property.	N/A
	Piper Pest Control, located at 18 Centre Street, approximately 170 m south from the Site, was listed as an operator.	PCA-15
Pipeline Incidents (PINC)	A natural gas leak was recorded in 2017 at 304 Innisfil Street due to a pipeline incident.	N/A
	A pipeline incident was recorded in 2018 at 15 Marcus Street. No further information was provided.	N/A
	A pipeline incident was recorded in 2017 at 321 Innisfil Street. No further information was provided.	N/A
Private and Retail Fuel Storage Tanks (PRT)	Four Star Fuels, located at 123 Tiffin Street, approximately 30 m north of the Site, was listed for one (1) retail tank in 1995.	PCA-6
	Texaco Canada Inc., located at 91 Tiffin Street, approximately 50 m northeast of the Site, was listed for one (1) retail tank in 1993.	PCA-10
	Stephenson's Rent All Inc., located at 134 Tiffin Street, approximately 130 m northwest of the Site, was listed for one (1) retail tank in 1994.	PCA-13
	Esso, located at 91 Essa Road, approximately 140 m southeast of the Site, was listed for one (1) retail tank in 1996.	PCA-14

Database/Date	Entry Details	PCA ID No.
	Simcoe District Co-op, located at 259 Innisfil Street, approximately 120 m east of the Site, was listed for the following retail tanks: - One (1) 5000L retail tank listed in 1993; and, - One (1) 1750L retail tank listed in 1994.	PCA-16
Retail Fuel Storage Tanks (RST)	Simcoe District Co-op, located at 259 Innisfil Street, approximately 120 m east of the Site, was listed for propane gas tanks and refilling, and oil changes and lubrication services.	PCA-19
	Simcoe Oil & Lube, located at 81 Essa Road, approximately 140 m southeast of the Site, was listed for oil changes and lubrication services.	PCA-20
Scott's Manufacturing Directory (SCT)	G.E. Sallows Inc., located at 159 Anne Street South, west adjacent to the Site, was listed in 1978 for the following operations: - Office and store fixtures, partitions, shelving, and lockers (except wood) - Metal doors, sash, frames, molding, and trim - Lumber plywood, millwork, and wood panels - Hardware manufacturing - Metal window and door manufacturing - Showcase, partition, shelving and locker manufacturing UCA Branding was listed in 1990 for digital printing and graphic design services. Due to the nature of the operations at this property (i.e., suppliers/distributors), they were not anticipated to have impacted the environmental quality of the Site and are not PCAs.	N/A
	Powerline Screen Printing, located at 272 Innisfil Street west adjacent to the Site, was listed in 1995 for commercial screen printing.	N/A
	SGO Designer Glass Cnetral, located at 250 Innisfil Street, approximately 80 m northeast of the Site, was listed for glass product manufacturing from purchased glass and as glass and glazing contractors.	N/A

Database/Date	Entry Details	PCA ID No.
	Thumbprint Studios, located at 151 Tiffin Street, approximately 160 m west of the Site, was listed in 1978 for the following operations: • Piece goods, notions and other dry goods wholesaler-distributors • Hardware wholesaler-distributors • All other miscellaneous manufacturing • Commercial screen printing • Clothing and clothing accessories wholesaler-distributors • Commercial screen printing Due to the nature of the operations at this property (i.e., suppliers/distributors), they were not anticipated to have impacted the environmental quality of the Site and are not PCAs.	N/A
	Central Welding & Machine, located at 141 Tiffin Street, approximately 130 m west of the Site, was listed in 1988 for other ornamental and architectural metal products manufacturing.	N/A
	Simcoe District Co-op, located at 259 Innisfil Street, approximately 120 m east of the Site, was listed in 1942 for preparing feeds and feeds ingredients for animals and for mixed fertilizer manufacturing.	PCA-17
	Carriage House Picture Framing, located at 100 Essa Road, approximately 210 m southeast of the Site, was listed in 2003 for print and picture frame stores, other home furnishings wholesaler-distributors, art dealers, non-commercial art museums and galleries, and all other miscellaneous manufacturing.	N/A
	J. Murray Pratt MFG Co. Ltd., located at 155 Tiffin Street, approximately 200 m west of the Site, was listed in 1947 for plumbing, heating and air-conditioning equipment and supplies wholesaler-distributors, sheet metal, and heating equipment, except electric and warm air furnaces.	N/A
Ontario Spills (SPL)	An unknown quantity of battery acid (sulfuric acid) was spilled at a pumping station located at 165 Anne Street southeast of the Site in 2012.	PCA-4
	10 L of gasoline was spilled on to the ground due to a valve leak at 123 Tiffin Street, approximately 30 m north of the Site, in 1991. • 2 L of gasoline was spilled on to the ground due to a valve leak in 1992. Due to the relatively small size of the spills, they are not anticipated to have impacted the environmental quality of the Site and are not PCAs.	N/A
	A natural gas leak was recorded in 2009 at the corner of Anne Street and Tiffin Street.	N/A

Database/Date	Entry Details	PCA ID No.
	50-100L of hydraulic oil was spilled onto the ground near the intersection of Innisfil Street and Tiffin Street in 2017.	PCA-12
	Jessy's Country Diner, located at 90 Tiffin Street, approximately 120 m northeast of the Site, listed gasoline odours coming from the washroom drain in 1992.	N/A
	A natural gas leak was recorded in 2017 at 304 Innisfil Street as a result of a pipeline leak.	N/A
	5 L of paint was spilled on to the roadway at 151 Tiffin Street, approximately 160 m west of the Site, in 2016. Due to the relatively small size of the spill, it is not anticipated to have impacted the environmental quality of the Site and is not a PCA.	N/A
	An unknown quantity of paint spilled into the storm sewer at 141 Tiffin Street, approximately 130 m west of the Site, in 1998.	N/A
	75000 L of urea ammonium nitrate spilled into the watercourse due to a tanker leak at 259 Innisfil Street, approximately 120 m east of the Site, in 1988.	N/A
	500L of furnace oil spilled on the ground at 259 Innisfil Street, approximately 120 m east of the Site, in 1991. ◆ 270L of diesel fuel spilled onto the ground in 1991. ◆ 60L of diesel fuel spilled onto the ground due to a hose leak in 1993. ◆ Vapour was released into the air at 259 Innisfil Street, approximately 120 m east of the Site, due to a damaged propane tank in 2016. It is not anticipated to have impacted the environmental quality of the Site.	PCA-16
	100L of gasoline spilled onto the ground and into a catch basin at the corner of Innisfil Street and Essa Road in 2002.	PCA-31
	5L of transformer oil was spilled onto the ground at 58 Carolyn Street, approximately 220 m southeast of the Site, in 1998. Due to the relatively small size of the spill, it is not anticipated to have impacted the environmental quality of the Site and is not a PCA.	N/A
	10L of gasoline was spilled onto the ground at 134 Anne Street South, approximately 220 m northwest of the Site, in 2004. Due to the relatively small size of the spill, it is not anticipated to have impacted the environmental quality of the Site and is not a PCA.	N/A
	50L of motor oil was spilled onto the ground at Essa Road and Burton Road, approximately 230 m east of the Site, in 2013.	PCA-22

Database/Date	Entry Details	PCA ID No.
Water Well Information System (WWIS)	Thirty-eight (34) wells were identified within the Phase One Study Area: ◆ 1 domestic well ◆ 16 observation/monitoring wells ◆ 10 unlisted use ◆ 7 test holes	N/A

3.2.2 Ministry of the Environment- Freedom of Information

A request was submitted to the MECP Freedom of Information and Protection of Privacy Office (Appendix D) to determine if there were any environmental incidents or violations associated with the Phase One Property; whether any Control Orders have been issued; whether there have been any other environmental concerns associated with the property such as complaints, inspections, etc.; whether any environmental investigations have been carried out regarding the subject property; and, to determine if the Ministry's Spills Action Centre's (SAC's) files contain any reported spills that had occurred in the site vicinity. Note that the SAC's database dates back only to 1988 and many of the occurrences on file have only been reported voluntarily. In addition, the MECP was requested to search their files (all years) regarding the following parameters: air emissions, water, sewage, wastewater and pesticides.

Files pertinent to this investigation would include, though are not limited to: regulatory permits, records; material safety data sheets; underground utility drawings; inventories of chemicals, chemical usage and chemical storage areas; inventory of aboveground storage tanks and underground storage tanks; monitoring data, including that done at the request of the MECP; historical and current waste management, receiver and generator records; process, production and maintenance documents related to areas of potential environmental concern; spills/discharge records; emergency and contingency plans; environmental audit reports; site plan of facility showing areas of production and manufacturing.

A response has not yet been received from the MECP. The client will be made aware of any records identified by the MECP file search, when a response is received from the Ministry.

3.2.3 Technical Standards and Safety Authority

The Technical Standards and Safety Authority (TSSA) maintain records related to storage tanks for petroleum related products. The TSSA was contacted to review records related to the Property and Study Area. According to the response received on October 28, 2021, from Ms. Mariah of TSSA, no records for the Phase One Property and properties located in the Study Area at following inquired addresses:

- 17 Jacobs Terrace
- 19 Jacobs Terrace
- 27 Jacobs Terrace
- 49 Jacobs Terrace

- 123 Tiffin St
- 131 Tiffin St
- 280 Innisfil St
- 113 Tiffin St
- 159 Anne St South

A copy of the correspondence with the TSSA has been appended under Appendix D.

3.2.4 Areas of Natural and Scientific Interest

The Natural Heritage Areas database published by the Ministry of Natural Resources (MNR) was reviewed in order to identify the presence/absence of areas of natural significance including provincial parks, conservation reserves, areas of natural and scientific interest, wetlands, environmentally significant areas, habitats of threatened or endangered species, and wilderness areas. The regional and municipal Official Plans were also reviewed as part of this assessment.

No areas of natural or scientific interest were identified within the Phase One Study Area.

3.2.5 Lake Simcoe Region and Conservation Authority (TRCA)

According to the LSRCA online mapping system, no watercourse is presented on the Site. One (1) watercourse, Hotchkiss Creek, was identified within the Phase One Study Area, approximately 150 m north of the Site. The Phase One Property is located in the Lake Simcoe Watershed.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs and Historical Mapping

Aerial Photographs for the years 1946, 1967, 1981, and 1995 were obtained from the ERIS report and reviewed as part of this assessment. The Simcoe County Atlas was reviewed in order to provide a more historical image from the year 1878. The Royal Canadian Airforce Air Photos was used to review the 1928 Aerial Photograph. Google Earth was used to review satellite imagery from the years 2006, 2013, 2015, 2016, and 2021. A summary of pertinent information obtained from the aerial photographs reviewed is presented in the Table below. The supporting documents have been appended under Appendix E.

Table 3-6: Summary of Aerial Photographs

Location	Observations	PCA ID No.
1878		
Phase One Property	According to the Simcoe County Atlas from 1880, the Phase One Property appeared to be part of an agricultural lot, with no buildings or structures present on the Site.	No PCA
North of the Site	A railway was observed to the north of the Phase One Property.	PCA-7
South, East, and West of the Site	The adjacent properties appeared to be undeveloped rural parcels of land.	No PCA
1928		
Phase One Property	The Phase One Property appeared to be undeveloped.	No PCA
Phase One Study Area	No significant changes.	No PCA

Location	Observations	PCA ID No.
1946		
Phase One Property	The Phase One Property appeared to be undeveloped.	No PCA
North, South, East, West of the Site	The surrounding area appeared to be agricultural, residential, and potentially commercial land uses. A small, wooded area was observed to the north of the Site.	No PCA
1967		
Phase One Property	Site Building B appeared to have been developed on the northeastern portion of the Phase One Property. A smaller building was observed in the footprint of what is now Site Building A. A parking area appeared to be located on the eastern portion of the Site.	PCA-2
North and East, of the Site	The northern, eastern, and western neighbouring properties appeared to be developed for commercial, residential, and potentially industrial land uses.	No PCA
West of the Site	A western neighbouring property appeared to be under construction and fill of unknown environmental appeared to have been imported.	PCA-8
South of the Site	The southern adjacent properties appeared to be utilized for residential purposes.	No PCA
1981		
Phase One Property	Site Building A appeared to have been developed over the smaller building's footprint.	PCA-1
North, South, East, West of the Site	No significant changes, with the exception of a commercial building developed west adjacent to the Site.	No PCA
1995		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
2006		
Phase One Property	No significant changes.	No PCA
West of the Site	Additional commercial development was observed to the west of the Site.	No PCA
North, South, East of the Site	No significant changes.	No PCA
2013		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
2015		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
2016		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA
2021		
Phase One Property	No significant changes.	No PCA
North, South, East, West of the Site	No significant changes.	No PCA

3.3.2 Topography, Hydrology, Geology

The topography of the Phase One Property is generally flat with a surface elevation of 230 masl. The topography within the Phase One Study Area generally slopes to the northeast, towards Lake Simcoe, located approximately 670 m northeast of the Phase One Property. The nearest body of water is Hotchkiss Creek located approximately 150 m north of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 3 to 6 mbgs. The shallow groundwater flow direction within the Phase One Study Area is inferred to be northeast towards Lake Simcoe.

The Site is situated within an Ordovician physiographic region. The surficial geology within the Phase One Study area is described as “Middle Ordovician”, and the bedrock is described as “limestone, dolostone, shale, arkose, sandstone”. Based on a review of the Ontario Well Records, the bedrock in the Phase One Study Area is anticipated to be encountered at depths greater than 88.4 mbgs.

3.3.3 Fill Materials

It is possible that fill material was used to backfill the structures historically present in the northeastern portion of the Site, and potentially for grading purposes at the time of development of the current Site Buildings.

3.3.4 Water Bodies and Areas of Natural Significance

During the site visit, standing water was not observed on the Property. The nearest body of water to the Phase One Property is Hotchkiss Creek, located approximately 150 m to north of the Site. Environmentally Significant Areas are natural areas that have been identified as significant and worthy of protection on three criteria – ecology, hydrology, and geology. Municipalities have developed policies to protect natural heritage features. The Region uses Environmentally Significant Areas as a means to protect natural areas like wetlands, fish habitat, woodlands, habitat of rare species, groundwater recharge and discharge areas, and Areas of Natural and Scientific Interest.

The Property includes no Areas of Natural Significance. Additional details are provided in Section 3.2.4 above.

3.3.5 Well Records

Water well records were also searched as part of the EcoLog ERIS database query. Five (5) test holes were identified on the Phase One Property. Thirty-eight (34) records were identified within the Phase One Study Area. Based on a review of the previous reports available for the Site, five (5) monitoring wells are present on the Phase One Property.

Additional detail regarding the well construction, lithology encountered, and well purpose is included in the ERIS report provided under Appendix C.

3.4 Site Operating Records

The Site Buildings have historically been used for commercial purposes. No operating records were available.

4.0 Interviews

4.1 Personnel Interviewed

The following persons with the knowledge of the Property were interviewed or provided the required information.

Table 4-1: Summary of Personnel Interviewed

Date	Name	Affiliation	Method of Interview
October 7 th , 2021	Roxanne Kaus	Office Manager at 17-27 Jacobs Terrace	In person

4.2 Interviewee Rationale

Ms. Kaus is the current office manager for the Phase One Property. Ms. Kaus is considered a knowledgeable person regarding the historical Site operations. The Phase One Interview was conducted by Ms. Julia Arends, B.Sc., MES under the supervision of Patrick M. Fioravanti, B.Sc., P.Geo., QP_{ESA}.

4.3 Results of Interview

The following summarizes the information that was provided by the Site representative, based on their knowledge of Site activities.

- Site Building B was constructed in the 1960s and Site Building A was constructed in 1978;
- According to Ms. Kaus, Site Building B was originally two separate buildings that were connected in 2017;
- Site Building B was historically occupied by an autobody garage followed by Radical Rods, Rides and Restorations, a car restoration facility (**PCA-2**);
- A former fuel oil AST was observed at the southern exterior of Site Building B; however, it appeared to be empty and disconnected (**PCA-23**);
- Site Building B was occupied by Cara Panel System, a house/building frames operation, at the time of this investigation (**PCA-2**). Operations included the construction of wooden frames for off-Site use;
- Site Building A was occupied by First Line Rinks, an artificial rink warehouse and wholesaler, at the time of this investigation (**PCA-1**);

- According to Ms. Kaus, de-icing agents are not applied to the parking areas on the Phase One Property;
- No information was available for the Site if cited for violations of any provincial or federal environmental laws or regulations;
- No information for individuals with additional knowledge of the Site was available to interview; and,
- No soil or ground water remediation has been completed at the Site.

DS compared the information obtained through the Phase One Interview with the information obtained from the historical records for the Site. The information provided by the interviewee was corroborated by the historical records, as such DS has no concern regarding the accuracy of the information provided.

5.0 Site Reconnaissance

5.1 General Requirements

Table 5-1: Site Reconnaissance Notes

Information	Details
Date of Investigation:	October 7 th , 2021
Time of Investigation:	8 am
Weather Conditions:	Cloudy, 12°C
Duration of Investigation:	2 hours
Facility Operation:	The Phase One Property was used for commercial purposes at the time of the Site reconnaissance.
Name and Qualification of Person(s) conducting the assessment	Ms. Julia Arends, B. Sc., MES., under the supervision of Mr. Patrick Fioravanti, B.Sc., P.Geo., QP _{ESA}
Limitations	No limitations

5.2 Specific Observations at Phase One Property

The Site reconnaissance involved a visual assessment of the Phase One Property for the purpose of identifying potential PCAs, and associated APECs. Photographs of the Phase One Property were taken at the time of the Site Reconnaissance, and have been included under Appendix F.

Table 5-2: Summary of Site Reconnaissance Observations

General

i.	Description of structures and other improvements, including the number and age of buildings	Site Building A: 27 Jacobs Terrace, located on the western portion of the Site, reportedly constructed in 1978. The building is one (1) storey and has no basement levels. Exterior building finishes were precast concrete. The building has a footprint of approximately 940 m². Interior finishes included concrete walls and floors. Site Building B: 17 Jacobs Terrace, located on the northeast portion of the Site, reportedly constructed as two separate buildings prior to 1967 and were connected in 2017. The building is one (1) storey and has no basement levels. Exterior building finishes were stucco siding and an asphaltic shingled roof. The building has a footprint of approximately 725 m². Interior finishes included drywall and tiled and concrete floors.
ii.	Description of the number, age and depth of below-ground structures	None observed and none reported by the Site representatives.
iii.	Details of all tanks, above and below ground at the Phase One Property, including the material and method of construction of the tank, tank age, tank contents, tank volume, and whether in use or not	One (1) former fuel oil AST, with a capacity of 910 L, was observed at the southern exterior of Site Building B; however, it appeared to be empty and was reportedly decommissioned (PCA-23). No further details were provided at the time of this investigation.
iv.	Potable and non-potable water sources	Potable water is supplied by the municipality to the Site. There were no potable water wells observed on the Site.
Underground Utilities and Corridors		
i.	Type and location of underground utility and service corridors, such as sewer, water, electrical or gas lines located on, in or under the Phase One Property.	It is anticipated that underground utilities and corridors exist under the Phase One Property to connect the buildings on the Phase One Property to municipal water and wastewater and supplied utilities; however, the exact location were not known at the time of this investigation.
Features of Structures and Buildings at the Phase One Property		
i.	Entry and exit points	The main entry/access point to the Site is from Jacobs Terrace. Site Building A: The entry/exit points to the building are located on the east and south sides of the building. The main entrance to Site Building A is located on the east side of the building. Site Building B: The entry/exit points to the building are located on the north, west, and south sides of the building. The main entrance to Site Building B is located on the north side of the building.
ii.	Details of existing and former heating systems, including type and fuel source	Site Building A: Natural gas-fired forced air furnace and natural gas-fired suspended unit heater vents through the roof. Site Building B: Propane-fired forced air furnace.

iii.	Details of cooling systems, including type and fuel source, if any	Cooling for Site Building A was generally provided by a forced-air rooftop heating ventilation air conditioning unit (HVAC). Cooling for Site Building B was generally provided by individual electric AC units.
iv.	Details of any drains, pits and sumps, including their current use, if any, and former use	No drains, pits, or sumps were observed during the Site reconnaissance.
v.	Details of any unidentified substances	No evidence of unidentified substances that could influence the environmental conditions at the Site was observed.
vi.	Details, including locations of stains or corrosion on floors other than from water, where located near a drain, pit, sump, crack or other potential discharge location	None observed during the Site reconnaissance.
vii.	Details, including locations, of current and former wells, including all wells described or defined in or under the <i>Ontario Water Resources Act</i> and the <i>Oil, Gas and Salt Resources Act</i>	According to the 2019 Pinchin Phase II ESA Report, five (5) monitoring wells were installed across the Site; however, these wells were not observed at the time of the Site reconnaissance.
viii.	Details of sewage works, including their location	The Site is serviced by municipal sanitary sewers, located along Jacobs Terrace to the north of the Site.
ix.	Details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement	The majority of the ground surface of the Site was occupied by the buildings' footprints and a gravel parking area. Landscaped vegetation was present on the northwest corner of the Site along Jacobs Terrace.
x.	Details of current or former railway lines or spurs and their locations	A railway line was observed north of the Site.
xi.	Areas of stained soil, vegetation or pavement	None observed during the Site reconnaissance.
xii.	Stressed vegetation	None observed during the Site reconnaissance.
xiii.	Areas where fill and debris materials appear to have been placed or graded	It is possible that fill material was used to backfill the structures historically present in the northeastern portion of the Site, and potentially for grading purposes at the time of development of the current Site Buildings (PCA-32).
xiv.	Potentially contaminating activity	One (1) former fuel oil AST, with a capacity of 910 L, was observed at the exterior of Site Building B (PCA-23).
xv.	Details of any unidentified substances found at the Phase One Property	None observed during the Site reconnaissance.
Enhanced Investigation Property		

Where subsection 13(3) applies to the Phase One Property, provide the documentation referred to in subsection 13(3)	In order to be classified as an enhanced investigation property, the Phase One Property must be used or have been used in whole or in part for any of the following uses: ◆ Any industrial use ◆ As a garage ◆ As a bulk liquid dispensing facility, including a gasoline outlet ◆ For the operation of dry-cleaning equipment The Phase One Property is currently used for commercial and industrial purposes and historically operated as an autobody shop. As such, the Phase One Property is considered an enhanced investigation property; however, the autobody operations ceased prior to present-day ownership and site operating records regarding the manufacturing operations were not available to DS at the time of this assessment.
The operations at the property, including processing or manufacturing	At the time of the site reconnaissance, Site Building A was operating as a warehouse and distribution centre and Site Building B was a wood frame construction operation. Historically, the Site was operating an auto service repair shop in the mid late 1980s to the early 2000s.
Hazardous materials used or stored at the Phase One Property	No hazardous material was observed or reported at the Phase One Property.
Products manufactured at the Phase One Property	No manufacturing operations were observed or reported at the Phase One Property.
By-products and wastes at the Phase One Property	One (1) former fuel oil steel AST, with a capacity of 910L, was observed at the southern exterior of Site Building B.
Raw materials handling and storage locations at the Phase One Property	No raw material handling was observed or reported at the Phase One Property.
Details of drums, totes and bins at the Phase One Property	Several plastic drums containing ethylene glycol (antifreeze) for the ice rink operation were noted to be present at the southern exterior of Site Building A
Details of all oil/water separators at the Phase One Property, including one for each separator, the location, installation date, source of incoming liquid and effluent discharge location	None observed and none reported by the Site Representatives.
All vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, waste storage areas, wither in use or not	Site Building B was historically used as an auto service repair shop equipped two (2) commercial paint booths.
Details of all spills including dates, locations and materials involved, and the volumes of material spilled	No spills were observed or reported during the Site reconnaissance.
Details of liquid discharge points such as water and French drains, including their locations	No liquid discharge points were identified during the Site reconnaissance.
Details of operations at the property, including processing or manufacturing and equipment used in processing or manufacturing	No other processing or manufacturing was observed or reported to be present during the Site reconnaissance.
Details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks	Five (5) electric bay doors were noted along the south and east sides of the Site Building A.

Hazardous Materials	
i. Asbestos containing materials	Asbestos and asbestos-containing materials were used as insulation and construction materials until being phased out in the late 1970s. Based on the age of Site Buildings, which were constructed prior to 1980s, there is a potential for asbestos insulation and asbestos-containing construction materials to be present in the site building. A designated substances survey is recommended prior to demolition of the house.
ii. Lead containing materials	The use of lead as a base in paints and plumbing solder was phased out in the late 1970s. Based on the age of the Site Buildings it is possible that lead containing materials are present. A designated substances survey is recommended prior to demolition of the house.
iii. PCB materials and equipment	Prior to the mid- to late-1970s, PCBs were used in the manufacture of electrical equipment, including fluorescent light ballasts. The Site Buildings were constructed between the 1960s and 1978; as such, there is potential for PCB to be present on electrical equipment in the house, and potentially within lighting fixtures in the remaining structures.
iv. Urea Formaldehyde Foam Insulation (UFFI)	Urea-Formaldehyde Foam Insulation (UFFI) was introduced in Canada during the 1970s and was banned in 1980. No record of UFFI was available for the subject building. No older foam insulation was noted in the building; therefore, the potential for UFFI to be present on the property is considered to be low.
v. Ozone Depleting Substances (ODS)	Cooling for the Site Buildings was provided by AC units. The AC units may contain R-410A type refrigerants.
vi. Herbicides and Pesticides	During the site inspection no material containing herbicides or pesticides were observed to be stored at the building.
vii. Mould	None observed.
viii. Mercury	Based on the age of the building, there is potential for mercury to be present in fluorescent lights observed in the building. Mercury with small quantity could be present inside the electrical switches or thermostats observed in the units of the building.
ix. acrylonitrile, arsenic, benzene, coke oven emissions, ethylene oxide, isocyanates, silica, vinyl chloride	These items were not observed at the Phase One Property. The presence of the special attention items in building/construction materials were investigated through observations made by DS and does not necessarily imply adverse impact to the environmental condition of the property.
x. Pits and Lagoons	None observed.
xi. Air Emissions	None observed.

xii. Radioactive Materials & Radon Gas	Based on local geological formations in the area, it is unlikely the site is exposed to natural sources of radiation such as radon or uranium. Manmade sources of radioactive materials were not observed during the site inspection. A radiometric survey was not conducted during this investigation.
--	---

5.3 Written Description of Investigation

The Site reconnaissance included a visual inspection of the Phase One Property to confirm current conditions and identify any current land uses or activities, which may have or may cause environmental impacts. The adjoining and neighbouring properties were observed from the Phase One Property and publicly accessible areas.

At the time of the Site reconnaissance the land use within the Phase One Study Area was primarily residential, commercial, and industrial, as described in the table below:

Table 5-3: Summary of Site Reconnaissance Observations within Phase One Study Area

Observation	Details
Phase One Property	The Phase One Property was occupied by two (2) single-storey buildings at the time of the site reconnaissance. Site Building A was used for commercial and light industrial purposes, including a warehouse for supplies, materials, and equipment. Site Building B was used for commercial and light industrial purposes, including an office, construction workspace, and storage space for supplies, materials, and equipment. One (1) 910 L AST made of steel, storing fuel oil was observed at the south exterior of Site Building B (PCA-23). The orientation of the Site Building is depicted on Figure 2.
North Adjacent Property	North adjacent to the Site was Jacobs Terrace (PCA-5) followed by a railway line and an ambulance services facility (113 Tiffin Street).
East Adjacent Property	The east adjacent properties were occupied by a multi-tenant commercial building (e.g., tile gallery, mini storage, antiques store, etc.) and Done Right Auto Care (PCA-24) at the time of the site reconnaissance.
South Adjacent Property	The south adjacent properties were used for residential purposes at the time of the site reconnaissance.
West Adjacent Property	The west adjacent Property was occupied by a multi-tenant commercial building (e.g., custom countertops, autobody supplies, appraisal office, etc.) at the time of the site reconnaissance.
Water Bodies	Hotchkiss Creek was located 150 m north of the Phase One Property, oriented from east to west.
Areas of Natural Significance	There were no areas of natural significance identified within the Phase One Study Area.

Photographs illustrating the Phase One Property and adjacent properties are provided under Appendix F. A summary of the PCAs observed is provided in Section 6.2. A visual depiction of the PCAs identified within the Phase One Study Area is provided under Figure 4.

6.0 Review and Evaluation of Information

6.1 Current and Past Uses

Current and past uses of the Phase One Property have been inferred based on the information provided in the aerial photographs, chain of title, city directories and conversations with the site representative. The Phase One Property has been historically used for commercial and industrial purposes. By the mid 1960s the Site was developed with Site Building B for commercial purposes. The Site is currently used for commercial and light industrial purposes. Summary of Current and Past Uses of the Phase One Property is presented in the Appendix G.

6.2 Potentially Contaminating Activity

According to the Table 2, Schedule D, O. Reg. 153/04 as amended, potentially contaminating activities are activities that may be contributing to areas of potential environmental concern on the Phase One Property. The PCAs identified on the Phase One Property and within the Phase One Study Area are summarized in the table below and are illustrated on Figure 4.

Table 6-1: Summary of PCAs

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-1	#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Site Building A has historically been used for warehousing and distribution, and was registered in 2017 for the generation, use, and/or storage waste crankcase oils and lubricants, and aromatic solvent and residues. The orientation of the Site Building is depicted on Figure 2.	Yes – APEC-1
PCA-2	#10 - Commercial Autobody Shops	The Site Building B was historically occupied by several autobody shops followed by a car restoration facility, including spray paint booths for autobody repair. It is inferred that the waste disposal records for the Site are associated with the historical autobody shop. At the time of the Site reconnaissance, Site Building B was occupied by Cara Panel System, a wood frame construction operation. The orientation of the Site Building is depicted on Figure 2.	Yes – APEC-2

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-3	#52: Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	Mckerlie Millen (a vehicle accessory operation) is depicted at 159 Anne Street west adjacent to the Site. The property was later used as Barrie Part Mart (a tire store) and Carquest (a vehicle accessory operation). It is inferred that the waste disposal records for the property are associated with these operations.	Yes – APEC-3
PCA-4	PCA-N/S: Battery Acid Spill	An unknown quantity of battery acid (sulfuric acid) was spilled at a pumping station located at 165 Anne Street southeast of the Site in 2012.	No- Due to the trans gradient orientation from the Site
PCA-5	PCA-N/S: Application of De-Icing Agents	Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on Jacobs Terrace north adjacent to the Phase One Property.	Yes – APEC-4
PCA-6	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Esso Petroleum Canada, located at 123 Tiffin Street, approximately 30 m north of the Site, was listed for waste management systems in 1988 through 2003. Imperial Oil, a petroleum product wholesale distributor, was listed for waste management systems in 2004 through 2017, 2020, and 2021. Ted's Haulage, located at 123 Tiffin Street, approximately 30 m north of the Site, was listed for one (1) liquid fuel tank in 1989 and one (1) expired FS highway gas/diesel tank in 2012.	No- Due to the trans gradient orientation from the Site
PCA-7	#46 – Rail Yards, Tracks and Spurs	A railway line was depicted approximately 20 m north of the Site.	Yes – APEC-4
PCA-8	#30 – Importation of Fill Material of Unknown Quality	Based on the 1967 Aerial Photograph, fill of unknown environmental appeared to have been imported during the development of 49 Jacobs Terrace, approximately 90 m west of the Site.	No- Due to the distance from the Site
PCA-9	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Simcoe Block (1979) Ltd., located at 113 Tiffin Street, approximately 40 m north of the Site, was listed for one (1) liquid fuel tank in 1990.	No- Due to the trans gradient orientation from the Site
PCA-10	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Imperial Oil Ltd., located at 91 Tiffin Street, approximately 50 m northeast of the Site, was listed as an expired FS facility in 1992 and Huronia Fuels Ltd. was listed for one (1) liquid fuel tank in	No- Due to the trans gradient orientation from the Site

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
		1989 and one (1) expired gas/diesel highway tank in 2012. Petroleum product wholesalers (Texaco Canada Inc., Esso Petroleum Canada, and Imperial Oil Ltd.), were depicted at 91 Tiffin Street, approximately 50 m northeast of the Site, and were listed for waste management systems in 1986 through 2021.	
PCA-11	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Labar Sales & Distribution Ltd., located at 94 Tiffin Street, approximately 70 m west of the Site, was registered for one (1) 4500 L steel single wall UST in 2009 and one (1) 4500 L steel fuel oil tank in 2013.	No- Due to the distance from the Site and trans gradient orientation
PCA-12	PCA-N/S: Hydraulic Oil Spill	50-100L of hydraulic oil was spilled onto the ground near the intersection of Innisfil Street and Tiffin Street in 2017.	No- Due to the distance from the Site and trans gradient orientation
PCA-13	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Stephenson's Rent All Inc., located at 134 Tiffin Street, approximately 130 m northwest of the Site, was listed for one (1) retail tank in 1994.	No- Due to the distance from the Site and trans gradient orientation
PCA-14	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Piper Pest Control, located at 18 Centre Street, approximately 170 m south from the Site, was listed as an operator.	No- Due to the distance from the Site and trans gradient orientation
PCA-15	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Esso, located at 91 Essa Road, approximately 140 m southeast of the Site, was listed for one (1) liquid fuel tank and as an expired FS facility in 1992, and one (1) retail tank in 1996.	No- Due to the down gradient orientation from the Site
PCA-16	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Simcoe District Co-op (a vehicle repair operation) and Growmark Inc., located at 259 Innisfil Street, approximately 120 m east of the Site, was listed for the following records: • One (1) 5000L retail tank in 1993; • One (1) 1750L retail tank in 1994. • Seven (7) liquid fuel tanks in 1995; • Six (6) liquid fuel tanks in 2000; • An expired FS facility and gas station in 2012; • Five (5) expired highway gasoline/diesel tanks in 2012; and, • Six (6) records for expired FS piping in 2012.	No- Due to the down gradient orientation from the Site

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
		Additionally, the following spills were recorded for the property: • 500L of furnace oil spilled on the ground at 259 Innisfil Street, approximately 120 m east of the Site, in 1991; • 270L of diesel fuel spilled onto the ground in 1991; and, • 60L of diesel fuel spilled onto the ground due to a hose leak in 1993. It is inferred that the waste disposal records for the property are associated with the gas station and vehicle repair operation.	
PCA-17	#22 - Fertilizer Manufacturing, Processing and Bulk Storage	Simcoe District Co-op, located at 259 Innisfil Street, approximately 120 m east of the Site, was listed in 1942 for preparing feeds and feeds ingredients for animals and for mixed fertilizer manufacturing.	No- Due to the down gradient orientation from the Site
PCA-18	PCA-N/S: Gasoline Spill	100L of gasoline spilled onto the ground and into a catch basin at the corner of Innisfil Street and Essa Road in 2002.	No- Due to the distance from the Site and trans gradient orientation
PCA-19	#27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	An automotive refinishing facility was located at 151 Tiffin Street, approximately 160 m west of the Site.	No- Due to the trans gradient orientation from the Site
PCA-20	#27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Simcoe Oil & Lube, located at 81 Essa Road, approximately 140 m southeast of the Site, was listed for oil changes and lubrication services.	No- Due to the distance from the Site and trans gradient orientation
PCA-21	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Esso Petroleum Canada was depicted at the corner of Anne Street and Tiffin Street, approximately 110 m northeast the Site, in 1988.	No- Due to the distance from the Site and trans gradient orientation
PCA-22	PCA-N/S: Motor Oil Spill	50L of motor oil was spilled onto the ground at Essa Road and Burton Road, approximately 230 m east of the Site, in 2013.	No- Due to the distance from the Site and down gradient orientation
PCA-23	#28 – Gasoline and Associated Products Storage in Fixed Tanks	One (1) former fuel oil AST, with a capacity of 910 L, was observed at the exterior of Site Building B during the Site reconnaissance.	Yes- APEC-5

PCA ID No.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Contributing to APEC (Y/N)
PCA-24	#28 – Gasoline and Associated Products Storage in Fixed Tanks	280 Innisfil Street, east adjacent to the Site, was occupied by Done Right Auto Care at the time of the Site reconnaissance. A truck maintenance garage and two (2) diesel USTs were depicted on the 1971 FIP.	Yes- APEC-6
PCA-25	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Present-day 131 Tiffin Street (formerly 135 Tiffin Street) was occupied by a petroleum bulk fuel outlet containing four (4) oil tanks located along the south property line.	No- Due to the down gradient orientation from the Site
PCA-26	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Four (4) ASTs were depicted at 272 Innisfil Street, east adjacent to the Site, in the 1971 FIP. The approximately location of the ASTs are 70 m downgradient from the Phase One Property boundary, as such they are not anticipated to have impacted the environmental quality of the Site.	No- Due to the distance from the Site and down gradient orientation
PCA-27	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Two (2) diesel ASTs were depicted at 141 Tiffin Street, approximately 130 m northwest of the Site, in 1971.	No- Due to the distance from the Site and trans gradient orientation
PCA-28	#28 – Gasoline and Associated Products Storage in Fixed Tanks	89 Tiffin Street, approximately 80 m northeast of the Site, was listed as a gas station in 1937.	No- Due to the trans gradient orientation from the Site
PCA-29	#28 – Gasoline and Associated Products Storage in Fixed Tanks	100 Tiffin Street, approximately 130 m north of the Site, was listed as a gas station in 1952.	No- Due to the trans gradient orientation from the Site
PCA-30	#28 – Gasoline and Associated Products Storage in Fixed Tanks	84 Tiffin Street, approximately 150 m northeast of the Site, was listed as a gas station from 1961 through 1976, and a service garage in 1994 and 1999.	No- Due to the distance from the Site and trans gradient orientation
PCA-31	#10 - Commercial Autobody Shops	100 Tiffin Street, approximately 130 m north of the Site, was listed as an autobody shop in 1999.	No- Due to the trans gradient orientation from the Site
PCA-32	#30 – Importation of Fill Material of Unknown Quality	It is possible that fill material was used to backfill the structures historically present in the northeastern portion of the Site, and potentially for grading purposes at the time of development of the current Site Buildings.	Yes - APEC-7

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

6.3 Areas of Potential Environmental Concern

The table of APECs presented in the form as approved by the Director is provided below, in accordance with clause 16(2)(a), Schedule D, O.Reg. 153/04.

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, soil and/or sediment)
APEC-1	Footprint of Site Building A	#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	On Site PCA-1	Metals, As, Sb, Se, Hg, PHCs, BTEX, VOCs, PAHs	Soil and Groundwater
APEC-2	Footprint of Site Building B	#10 - Commercial Autobody Shops	On Site PCA-2	PHC, BTEX, VOCs, PAHs, metals	Soil and Groundwater
APEC-3	Western portion of the Phase One Property	#52: Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	Off Site PCA-3	PHCs, VOCs, metals	Groundwater
APEC-4	Northern portion of the Phase One Property	# N/S: Application of De-Icing Agents PCA-7: #46 – Rail Yards, Tracks and Spurs	Off Site PCA-5	Na, Cl-	Groundwater
APEC-5	Vicinity of the former AST South of Site Building B	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On Site PCA-23	PHCs, BTEX, PAHs	Soil and Groundwater
APEC - 6	Southwestern Portion of the Phase One Property	#28 – Gasoline and Associated Products Storage in Fixed Tanks Vehicles	Off Site PCA-24	PHCs, VOCs, metals	Groundwater
APEC - 7	Entire Phase One Property	#30 – Importation of Fill Material of Unknown Quality	On Site PCA-32	Metals, As, Sb, Se, B-HWS, CN-, electrical conductivity, Cr (VI), Hg, low or high pH, SAR, PAHs	Soil

The rationale used by the QP in assessing the information obtained through the course of this investigation to determine whether PCAs exist and/or are contributing to an APEC on the Phase One Property has been provided in the proceeding sections. In general the potential for a PCA to be

contributing to an APEC on the Phase One Property was assessed using the likelihood of the source to contaminate the Phase One Property, the possibility of the contaminants to migrate to the Phase One Property based on the hydraulic and geologic conditions, and the inherent properties of the contaminants of concern.

The contaminants of potential concern were determined based on the professional experience of the QP, common industry standards, literature reviews, and the inherent properties of the contaminant.

This investigation was conducted based on the assumption that all information provided to DS was factual and accurate. DS is not aware of any uncertainty factors which would affect the conclusions of this investigation.

6.4 Phase One Conceptual Site Model

A Conceptual Site Model was developed for the Phase One Property, located at 17-27 Jacobs Terrace, Barrie, ON. The Phase One Conceptual Site Model is presented in Drawings 3, 4, and 5 and visually depict the following:

- ◆ Any existing buildings and structures
- ◆ Water bodies located in whole, or in part, on the Phase One Study Area
- ◆ Areas of natural significance located in whole, or in part, on the Phase One Study Area
- ◆ Water wells at the Phase One Property or within the Phase One Study Area
- ◆ Roads, including names, within the Phase One Study Area
- ◆ Uses of properties adjacent to the Phase One Property
- ◆ Areas where any PCAs have occurred, including location of any tanks
- ◆ Areas of Potential Environmental Concern

6.4.1 Potentially Contaminating Activity Affecting the Phase One Property

All PCAs identified within the Phase One Study Area are presented on Figure 4, and discussed in Section 6.2 above. The PCAs which are considered to contribute to APECs on, in or under the Phase One Property are summarized in the table below:

Table 6-2: Summary of PCAs Contributing to APECs

PCA Item.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Rationale
1	#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Site Building A has historically been used for warehousing and distribution, and was registered in 2017 for the generation, use, and/or storage waste crankcase oils and lubricants, and aromatic solvent and residues.	PCA is on-Site
2	#10 - Commercial Autobody Shops #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	The Site Building B was historically occupied by several autobody shops followed by a car restoration facility, including spray paint booths for autobody repair. It is inferred that the waste disposal records for the Site are associated with the historical autobody shop.	PCA is on-Site
3	#52: Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems	Various vehicle accessory operations were identified. It is inferred that the waste disposal records for the property are associated with these operations.	PCA is west adjacent to Site

PCA Item.	PCA Description (Per. Table 2, Schedule D of O.Reg. 153/04)	Description	Rationale
5	# N/S: Application of De-Icing Agents	Seasonal application of de-icing salts for vehicle and pedestrian safety is anticipated on Jacobs Terrace north adjacent to the Phase One Property.	PCAs are north adjacent to Site
7	#46 – Rail Yards, Tracks and Spurs	During the Site reconnaissance, a railway line was observed to the north of the Site.	
23	PCA-24: #28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the previous reports reviewed, a fuel oil AST was present on the Phase One Property. During the Site reconnaissance, the former AST was observed to be still on the Site but disconnected.	PCA is on-Site
24	#28 – Gasoline and Associated Products Storage in Fixed Tanks	280 Innisfil Street, east adjacent to the Site, was occupied by Done Right Auto Care at the time of the Site reconnaissance. A truck maintenance garage and two (2) diesel USTs were depicted on the 1971 FIP.	PCA is east adjacent to Site
32	#30 – Importation of Fill Material of Unknown Quality	Fill material may have been used to backfill the structures historically present on the northeastern portion of the Site, and potentially for grading purposes at the time of development of the current Site Buildings.	PCA is on-Site

N/S - not specified in Table 2, Schedule D, of O.Reg. 153/04

6.4.2 Contaminants of Potential Concern

A summary of the contaminants of potential concern identified for each respective APEC is presented in Table 7-2 above. The following contaminants of potential concern were identified for the Phase One Property: PHCs, VOCs, BTEX, Metals, As, Sb, Se, B-HWS, CN-, Cr (VI), Hg, high pH, low pH, Na, Cl-, and PAHs.

6.4.3 Underground Utilities and Contaminant Distribution and Transport

Underground utilities can affect contaminant distribution and transport. Trenches excavated to install utility services, and the associated granular backfill may provide preferential pathways for horizontal contaminant migration in the shallow subsurface.

It is anticipated that underground utilities and corridors exist under the Phase One Property to connect the buildings on the Phase One Property to municipal water and wastewater and supplied

utilities. Plans were not available to confirm the depths of these utilities, however they are estimated to be installed at depths ranging from 2 to 3 metres below ground surface.

The depth to groundwater at the Phase One Property is inferred to range between 3 to 6 mbgs, therefore it is possible that the utility corridors may act as preferential pathways for contaminant distribution and transport in the event that shallow subsurface contaminants exist at the Phase One Property.

6.4.4 Geological and Hydrogeological Information

The topography of the Phase One Property is generally flat with a surface elevation of 230 masl. The topography within the Phase One Study Area generally slopes to the northeast, towards Lake Simcoe, located approximately 670 m northeast of the Phase One Property. The nearest body of water is Hotchkiss Creek located approximately 150 m north of the Phase One Property. Based on a review of the MECP well records, the depth to groundwater in the vicinity of the Phase One Property is approximately 3 to 6 mbgs. The shallow groundwater flow direction within the Phase One Study Area is inferred to be northeast towards Lake Simcoe.

The Site is situated within an Ordovician physiographic region. The surficial geology within the Phase One Study area is described as “Middle Ordovician”, and the bedrock is described as “limestone, dolostone, shale, arkose, sandstone”. Based on a review of the Ontario Well Records, the bedrock in the Phase One Study Area is anticipated to be encountered at depths greater than 88.4 mbgs.

6.4.5 Uncertainty and Absence of Information

DS has relied upon information obtained from federal, provincial, municipal, and private databases, in addition to records and summaries provided by EcoLog ERIS. All information obtained was reviewed and assessed for consistency, however the conclusions drawn by DS are subject to the nature and accuracy of the records reviewed.

All reasonable inquiries were made to obtain reasonably accessible information, as mandated by O.Reg.153/04 (as amended). All responses to database requests were received prior to completion of this report, with the exception of the MECP FOI request. If the MECP FOI request produces information which may alter the conclusions of this report, an addendum will be provided to the Client. This report reflects the best judgement of DS based on the information available at the time of the investigation.

Information used in this report was evaluated based on proximity to the Phase One Property, anticipated direction of local groundwater flow, and the potential environmental impact on the Phase One Property as a result of potentially contaminating activities.

The QP has determined that the uncertainty does not affect the validity of the Phase One ESA Conceptual Site Model or the conclusions of this report.

7.0 Conclusions

DS conducted a Phase One ESA for the property located at 17-27 Jacobs Terrace, Barrie, ON. The Phase One ESA was completed to satisfy the intent of the requirements, methodology and practices for a Phase One ESA as described in Ontario Regulation 153/04 (as amended). The objectives of the Phase One ESA were to identify the presence or absence of PCAs on the Phase One Property and/or within the Phase One Study Area, and to determine if the PCAs identified within the Phase One Study Area are likely to result in an APEC on the Phase One Property.

Based on the information obtained as part of this investigation, it is concluded that thirty-two (32) PCAs were identified within the Phase One Study Area, of which eight (8) are considered to be contributing to seven (7) APECs on, in or under the Phase One Property. Further investigation in the form of a Phase Two ESA will be required in order to meet the requirements of O.Reg.153/04 (as amended).

7.1 Phase Two Environmental Site Assessment Requirement

Further investigation in the form of a Phase Two ESA will be required in order to meet the requirements of O.Reg.153/04 (as amended).

7.2 RSC Based on Phase One Environmental Site Assessment

Record of Site Condition cannot be filed on the basis of the Phase One ESA due to the identification of APECs on the Phase One Property.

7.3 Limitations

This report was prepared for the sole use of Tonlu Properties and is intended to provide an assessment of the environmental condition on the property located at 17-27 Jacobs Terrace, Barrie, ON. The information presented in this report is based on information collected during the completion of the Phase One Environmental Site Assessment by DS Consultants Ltd. The material in this report reflects DS' judgment in light of the information available at the time of report preparation. This report may not be relied upon by any other person or entity without the written authorization of DS Consultants Ltd. The scope of services performed in the execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this documents or findings, conclusions and recommendations represented herein, is at the sole risk of said users.

The information and conclusions presented in this report are professional opinions in accordance with generally accepted engineering and scientific practices based on a cursory historical search, visual observations and limited information provided by persons knowledgeable about past and current activities on this site. The work completed as per the scope of work is considered sufficient in detail to form a reasonable basis for the findings presented in this report. As such, DS Consultants

Ltd. cannot be held responsible for environmental conditions at the site that was not apparent from the available information.

7.4 Qualifications of the Assessors

Julia Arends, B.Sc., MES.

Ms. Julia Arends, MES., is an Assistant Project Manager with DS Consultants Ltd. She obtained an Honours Bachelor of Environmental Science degree from Queen's University and a Master of Environmental Science from the University of Waterloo. She has experience in conducting Phase One and Two Environmental Site Assessments on numerous residential, commercial, and industrial properties. Julia also has experience in completing soil and groundwater contaminant delineation and remediation programs in accordance with Ontario Regulation 153/04 to support the future filing of Record of Site Conditions. She has also directed the implementation of soil remediation programs, verification sampling, and site restoration activities.

Mr. Patrick (Rick) Fioravanti, B.Sc., P.Geo., QP_{ESA}

Mr. Fioravanti is the Manager of Environmental Services with DS Consultants Limited. Patrick holds an Honours Bachelor of Science with distinction in Toxicology from the University of Guelph and is a practicing member of the Association of Professional Geoscientists of Ontario (APGO). Patrick has over ten years of environmental consulting experience and has conducted and/or managed hundreds of projects in his professional experience. Patrick has extensive experience conducting Phase One and Phase Two Environmental Site Assessments in support of brownfields redevelopment in urban settings, and been involved in numerous remediation projects, supported many risk assessments, and successfully filed Records of Site Condition with the Ministry of Environment, Conservation and Parks. He has conducted work across southern and eastern Ontario, and Quebec in his professional experience. Patrick is considered a Qualified Person to conduct Environmental Site Assessments as defined by Ontario Regulation 153/04 (as amended).

7.5 Signatures

DS Consultants Ltd. conducted this Phase One Environmental Site Assessment and confirms the findings and conclusions contained within this report.

Yours truly,

DS Consultants Ltd.

Julia Arends, B.Sc., MES.

Assistant Project Manager – Environmental

Patrick Fioravanti, B.Sc., P.Geo., QP_{ESA}

Manager – Environmental Services

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2021

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2021

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2021

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Apr 30, 2021

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003***National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008***National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix D

Freedom of Information Request

This form is for requesting documents which are in the Ministry's files on environmental concerns related to properties. Please refer to the guide on the completion and use of this form. Our fax no. is (416) 314-4285.

Requester Data			For Ministry Use Only	
Name, Title, Company Name and Mailing Address of Requester Alice Gong DS Consultants Ltd. 6221 Highway 7, Unit 16 Vaughan, ON, L4H 0K8 Email Address: alice.gong@dsconsultants.ca			FOI Request No.	Date Request Received

Subject: RE: Storage Tank Information Request

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello Alice,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses:

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationsservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Saara

Appendix G

"Table of current and past uses of the phase one property"
(Refer to clause 16(2)(b), Schedule D, O.Reg. 153/04)

17-27 Jacobs Terrace, Barrie, ON

Plan of Lots 7, 8, And 9, And Part of Lots 5, 6, 10, And 11
South Side of Jacobs Terrace, Registered Plan 30, City of
Barrie

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire insurance plans, etc.
Prior to 1820	Crown	Assumed agricultural or other	Agricultural or other use	No aerial photos or other records available.
1820-1821	James Pearson	Undeveloped privately-owned land	Agricultural or other use	Records indicate the Phase One Property was patented to James Pearson by the Crown in 1820.
1821-1879	Jacob Jacobs	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to Jacob Jacobs in 1821.
1879-1885	Marx Kassel	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to Marx Kassel in 1879.
1885-1894	George P. McKay	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to George P. McKay in 1885.
1894-1908	Joseph Edgar	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to Joseph Edgar in 1894.
1908	Henry D. Jamieson	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to Henry D. Jamieson in 1908.
1908-1935	Simon Dymont	Undeveloped privately-owned land	Agricultural or other use	According to the Chain of Title, the Site was transferred to Simon Dymont in March 1908.

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire insurance plans, etc
1935-1947	The Corporation of the Town of Barrie	East portion commercial, west portion undeveloped	Commercial use	According to the 1946 FIPs, the Phase One Property appeared to be vacant, with the exception of two (2) small structures located on the northeast corner of the Site. The structures were not similar in size or configuration as the present-day Site Buildings.
1947-1969	The First Co-Operative Packers of Ontario Ltd.	Industrial land use	Industrial use	According to the 1967 Aerial Photo, Site Building B appeared to have been developed on the northeastern portion of the Phase One Property. A smaller building was observed in the footprint of what is now Site Building A. A parking area appeared to be located on the eastern portion of the Site.
1969-1970	William N. Hinton	Industrial land use	Industrial use	No aerial photos or other records available. Based on previous ownership and Site activities, it is anticipated that property use was industrial.
1970-1971	John Parry	Industrial land use	Industrial use	No aerial photos or other records available. Based on previous ownership and Site activities, it is anticipated that property use was industrial.
1971-1972	Clarence A. Lackie	Industrial land use	Industrial use	No aerial photos or other records available. Based on previous ownership and Site activities, it is anticipated that property use was industrial.
1972-2010	Emco Limited	Warehouse and Autobody shop	Industrial use	According to the Site interview and the 1981 Aerial Photo, Site Building A appeared to have been developed over the smaller building's footprint in 1978. According to the 1976 City Directories, the Site was listed for commercial and industrial use, occupied by A1 Auto Body and Emco Supply. According to the 1982-1999 City Directories, the Site was occupied by No Name Auto Body.

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire insurance plans, etc
2010-2013	Securus Capital Inc.	Industrial land use	Industrial use	No aerial photos or other records available. Based on previous ownership and Site activities, it is anticipated that property use was industrial.
2013-2017	2165520 Ontario Inc,	Industrial land use	Industrial use	No aerial photos or other records available. Based on previous ownership and Site activities, it is anticipated that property use was industrial.
2017-2021	Cara Panel Systems Inc.	Industrial land use	Industrial use	According to the Site Interview, Site Building B was originally two (2) separate buildings that were connected in 2017 for use as a wood frame construction workshop.
2021-Present	Tonlu Holdings Limited	Industrial land use	Industrial use	According to the Site reconnaissance, the Site was used for warehousing and construction at the time of this investigation.

Notes:

1 - for each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies:

Agriculture or other use
 Commercial use
 Community use
 Industrial use
 Institutional use
 Parkland use
 Residential use

2 - when submitting a record of site condition for filing, a copy of this table must be attached
