Dear Resident,

**Re: Allandale 'B' Neighborhood Reconstruction – Detailed Design Field Investigations**

The City of Barrie (The City) Infrastructure Department is preparing the detailed design for the reconstruction of Allandale 'B' Neighbourhood, which includes the following streets:

- Holgate Street, from Innisfil Street to Bayview Drive
- William Street, from Baldwin Lane to Gowan Street
- Burton Avenue, from Essa Road to William Street
- Granville Street, from Holgate Street to Burton Avenue
- Innisfil Street, from Holgate Street to Essa Road

The City will complete several investigations and surveys during the detailed design phase to gather site conditions and background information on the existing conditions. These include:

- Geotechnical (soils) investigations,
- Subsurface utility investigations,
- Topographical and Legal Surveys, and
- Street lighting surveys.

The City has retained the services of several consultants to complete the work noted above. All individuals will wear protective vests and carry identification showing who they work for during the investigations. City staff and contracted consultants are required to conduct work in a safe manner, and we ask that you take extra caution during the investigations to ensure everyone's safety. **Please note that this work will not require entrance into your residence unless contacted directly by a City of Barrie Project team member.**

Investigations are anticipated to take a few days to complete the work, with periodic returns to site throughout the investigation window. Investigations are scheduled to take place intermittently starting in November of 2024 and will continue into 2025.

During the design investigations, driveway and sidewalk access within the project limits will be provided at almost all times during the investigations.

Project Features of the reconstruction project include:

- Road reconstruction
- Watermain replacement
- Sanitary sewer and lateral replacement
- Storm sewer replacement
- Sidewalk installation and replacement
- Street lighting replacement

The expected project schedule is:

- 2024 – 2025: Detailed design
- 2026 – 2027: Utility relocations
- 2027 – 2029: Construction

If you have any questions or comments regarding this project, please feel free to contact the undersigned by email at [Jonathan.Innes@barrie.ca](mailto:Jonathan.Innes@barrie.ca).

Further information on this project or other City construction projects can be found online by visiting [barrie.ca/roadwork](http://barrie.ca/roadwork).

Regards,

[J Innes \(Nov 11, 2024 14:14 EST\)](#)

Jonathan Innes, C.E.T.  
Senior Project Technologist.
