Dear Resident,

Re: Allandale 'B' Neighborhood Reconstruction – Utility Relocations

The City of Barrie Infrastructure Department is continuing with the detailed design for the reconstruction of Allandale 'B' Neighborhood, which includes the following streets:

- Holgate Street, from Innisfil Street to Bayview Drive
- William Street, from Baldwin Lane to Gowan Street
- Burton Avenue, from Essa Road to William Street
- Granville Street, from Holgate Street to Burton Avenue
- Innisfil Street, from Holgate Street to Essa Road

Features of the reconstruction project include:

- Road reconstruction
- Watermain replacement
- Sanitary sewer and lateral replacement
- Storm sewer replacement
- Sidewalk installation and replacement
- Street lighting replacement

The expected project schedule is:

- 2026 – 2027: Utility relocations
- 2028 – 2030: Construction

In preparation for the reconstruction work scheduled for 2028 (pending budget approval), various utility companies will be working in the area to relocate their services as required for the proposed work. All contractors and consultants are required to

conduct work in a safe manner, and we ask that you take extra caution during these relocations to ensure everyone's safety.

The utility relocation work is scheduled to take place intermittently starting in June of 2026, and will continue into 2027. During the relocation work, driveway and sidewalk access within the project limits will be provided most of the time.

If you have any questions or comments regarding this project, please feel free to contact the undersigned via email at jonathan.innes@barrie.ca.

Further information on this project or other City construction projects can be found online by visiting barrie.ca/roadwork.

Regards,

J Innes
