1.0 EXECUTIVE SUMMARY

Sirati & Partners Consultants Ltd. (SIRATI) was retained by Vitmont Holdings (Barrie) Inc., c/o Marydel Homes (“the Client”) to complete a Phase One Environmental Site Assessment (Phase One ESA) at the property located at 79 Collier Street, Barrie, ON (hereinafter referred to as the “Phase One Property” or the “Site”).

The objective of this Phase One ESA was to determine the likelihood that contaminants affecting the Site are present on, in or under the property and to identify actual or potential contamination, which might pose a hazard to humans or the environment, or which may have a significant impact on the value of the Phase One Property.

This Phase One ESA is intended to support the filing of a Record of Site Condition (RSC) for the Phase One Property with the Ministry of Environment Conservation and Parks (MECP) for site plan approval purposes in accordance with the Ontario Regulation (O. Reg.) 153/04, as amended.

Information regarding the Phase One Study Area was compiled through a records review, site reconnaissance and interviews with individuals knowledgeable about the Site. The gathered information was evaluated and compiled in this Phase One ESA report.

This Phase One ESA was carried out in accordance with the O. Reg. 153/04, as amended. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards. Sampling and testing of potentially contaminated media were not within the scope of this Phase One ESA.

This report was prepared for the exclusive use of the Client. Any use of this report by any third-party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. SIRATI accepts no responsibility for damages, if any, suffered by any third-party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 11 of this report.

SIRATI carried out a visual inspection of the Phase One Property and other properties within the Phase One Study Area (the Site and properties within 250 m of the Site boundaries) on June 24, 2020.

The Phase One Property is developed as a parking lot. Adjacent to the east of the Site is Mulcaster Street, and to the north is Collier Street. The Grey & Simcoe Foresters – Regimental Museum is located along the southeast boundary of Phase One Property. SIRATI understands that the Phase One Property is proposed for the development of a 15 storey building with one (1) level of basement.

The Site is located on the southwest corner of Collier Street and Mulcaster Street, in the City of Barrie. The total area of the Site is approximately 0.41 acres. The Site is bounded by Collier Street to the north, a residential/commercial building to the south, a driveway and a residential/commercial building to the west, and Mulcaster Street to the east. The Phase One Study Area consists of residential, commercial, and institutional properties within the radius of 250 meters from the Site boundaries. This 250 m radius extends roughly to McDonald Street to the north, Simcoe Street to the south, Poyntz Street to the east, and Clapperton Street to the west.

Based on available physiography, geology and topography information, the Phase One Study Area is located in an area with a physiography of Simcoe Lowlands with a surficial geology of littoral deposits of sand, gravelly minor silt and clay, over bedrock of limestone, dolostone, shale, arkose and sandstone from the Shadow Lake Formation. These soils have a relative moderate to high permeability; hence, the Site is susceptible to contaminant migration from adjacent properties. According to the Bedrock Topography of Barrie Area map it is anticipated that the Bedrock is at an elevation of approximately 130 metres above mean sea level (mAMSL), approximately 100 metres below ground surface (mbgs).

According to the topographic maps, the inferred groundwater flow direction in the area is likely to flow towards the southeast in a similar manner as the topography of the area.

The interactive natural heritage area map, published by the Ministry of Natural Resources and Forestry (MNRF) (2015), indicates no areas of natural significance within the Phase One Study Area. No surface water, lagoon, or standing water was observed on the Phase One Property; Lake Simcoe is in the south portion of Phase One Study Area. A request made to the MECP indicated no records were located in their database regarding the Phase One Property.

The information, obtained through the records review, interview and Site Reconnaissance, identified eleven (11) potentially contaminating activities (PCAs) within the Phase One Study Area. The location of the PCAs are presented in Figure 3. Two (2) of these PCAs are considered to be areas of potential environmental concern (APECs) for the Site. The location of the APECs are presented in Figure 4.

The PCAs and APECs are listed on Tables 1 and 2 below.

Table 1: PCAs Identified within the Phase One Study Area

Potentially Contaminating Activity	Location of PCA			Source of Information	Considered an APEC	Potentially Impacted Media (Ground Water, Soil and/or Sediment)
	On-site or off-site	Up-gradient (Y/N)	Proximity to Site			
(1) #30. Importation of Fill Material of Unknown Quality across the Site.	On-Site	N/A	N/A	Site Reconnaissance (Section 6.2)	Yes.	Soil and Groundwater
(2) (Other) Gasoline spill at the corner of Mulcaster Street and Collier Street	Off-Site	Y	Approximately 20 m NE of Site	Environmental source information (Section 4.2.3)	Yes	Soil and Groundwater
(3) (Other) waste generation including pathological wastes, photo processing wastes and inorganic laboratory chemicals, at 75 Collier Street.	Off-Site	N	Adjacent west of Site	Environmental source information (Section 4.2.4)	No, due nature of regulated activity	N/A
(4) (Other) waste generation including petroleum distillates, light fuels, paint/pigment/coating residues, inorganic laboratory chemicals, oil skimmings' & sludges, waste oils & lubricants, detergents/soaps, organic laboratory chemical, photoprocessing wastes, waste compressed gases, acid waste-heavy metals, other inorganic acid wastes and alkaline wastes - other metals, at 70 Collier Street.	Off-Site	Y	Approximately 36 m N of Site	Environmental source information (Section 4.2.4)	No, due to nature of regulated activity (offices)	N/A
(5) (Other) waste generation including photo-processing wastes, at 17 Mulcaster Street.	Off-Site	N	Approximately 47 m SE of Site	Environmental source information (Section 4.2.4)	No, due to inferred down -gradient location relative to the Site.	N/A
(6) (Other) waste generation including alkaline wastes, at 57 Collier Street.	Off-Site	N	Approximately 76 m W of Site	Environmental source information (Section 4.2.4)	No, due to inferred cross -gradient location and distance relative to the Site.	N/A
(7) #37. Operation of Dry Cleaning Equipment (where chemicals are used)	Off-Site	N	Approximately 100 m NE of Site	Other Historical Information (Section 4.1.6)	No, due to inferred cross-gradient location and the surface slope of the Site.	N/A

Potentially Contaminating Activity	Location of PCA			Source of Information	Considered an APEC	Potentially Impacted Media (Ground Water, Soil and/or Sediment)
	On-site or off-site	Up-gradient (Y/N)	Proximity to Site			
(8) #49 Rail Yards, Tracks and Spurs	Off-Site	N	Approximately 150 m S of Site	1880 Ontario Base Map (Section 6.2.16)	No, due to inferred down -gradient location and distance relative to the Site.	N/A
(9) (Other) waste generation including waste oils and lubricants, at 114 Worsley Street.	Off-Site	N	Approximately 188 m NE of Site	Environmental source information (Section 4.2.4)	No, due to inferred cross -gradient location and distance relative to the Site.	N/A
(10) #28. Gasoline and Associated Products Storage in Fixed Tanks. Presence of gasoline tank in Site Building	Off-Site	N	Approximately 250 m E of Site	Environmental source information (Section 4.2.4)	No, due to inferred cross -gradient location and distance relative to the Site.	N/A
(11) #53. Tannery 87 and then 87-89 Collier Street 1942 and 1963 N.M Meyer Hides and Shins. Although the nature of the operations in not known, the potential does exist for tanning activities to have been undertaken at these locations.	Off-Site	N	Approximately 40 m E of Site	Environmental source information (Section 4.2.4)	No, due to inferred cross -gradient location and distance relative to the Site.	N/A

Table 2: APECs Identified on the Phase One Property

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on the Phase One Property	Potentially Contaminating Activity	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
1) APEC-1	Entire Site	#30. Importation of Fill Material of Unknown Quality.	PCA#1 On-Site	Petroleum hydrocarbons (PHCs), polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), metals and inorganic parameters (As, Sb, Se, Na, B-HWS, Cl-, CN-, Cr-VI, Hg, low or high pH, EC and SAR)	Soil
2) APEC-2	Northeast portion of Site	(Other) Gasoline spill at the corner of Mulcaster Street and Collier Street	PCA#3 Off-Site	PHCs, Volatile Organic Compounds (VOCs)	Soil and Groundwater

Based on the findings of the Phase One ESA, SIRATI recommends a Phase Two ESA to investigate the above APECs at the Site.

2.0 INTRODUCTION

Sirati & Partners Consultants Ltd. (SIRATI) was retained by Vitmont Holdings Inc., c/o Marydel Homes (“the Client”) to complete a Phase One Environmental Site Assessment (Phase One ESA) at the property located at 79 Collier Street (hereinafter referred to as the “Phase One Property” or the “Site”). Figure 1 shows the Site Location.

The objective of this Phase One ESA was to determine the likelihood that contaminants affecting the Site are present on, in or under the property and to identify actual or potential contamination which might pose a hazard to humans or the environment, or which may have a significant impact on the value of the Phase One Property.

This Phase One ESA is intended to support the filing of a Record of Site Condition (RSC) for the Phase One Property with the Ministry of Environment Conservation and Parks (MECP) for site plan purposes in accordance with the Ontario Regulation (O. Reg.) 153/04, as amended.

SIRATI carried out this Phase One ESA in accordance with the scope of work detailed in SIRATI’s proposal P20-04-131, dated April 24, 2020. The authorization for SIRATI to proceed with the Phase One ESA was given by Vito Montesando of Vitmont Holdings (Barrie) Inc.

This Phase One ESA was carried out in accordance with the O. Reg. 153/04, as amended. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards. Sampling and testing of potentially contaminated media were not within the scope of this Phase One ESA.

This report was prepared for the exclusive use of the Client. Any use of this report by any third-party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. SIRATI accepts no responsibility for damages, if any, suffered by any third-party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 10.0 of this report.

2.1 Phase One Property Information

The Phase One Property is located at the municipal address of 79 Collier Street, Barrie, Ontario. Figure 1 in shows the Site Location. A survey plan is provided in Appendix A. Selected Site photographs are included in Appendix B. The information for the Phase One Property is provided in the following Table 3:

Table 3: Phase One Property Information

Municipal Address	Legal Description	Property Identification number (PIN)	Zoning	UTM Coordinates - Centre Point of the Site
79 Collier Street, Barrie, ON	Part Market Block on Plan 2 Barrie, Being Parts 2 to 6 on Plan 51R39976; Subject to an Easement over Part 2 ON Plan 51R39976 As In RO1167938; Subject to An Easement Over Part 6 On Plan 51R39976 As In SC1216519; Subject to an Easement in Gross Over Part 4 ON Plan 51R39976 As In SC1216520; City of Barrie	58817-0421 (LT)	Central Area Commercial	Easting: 604663m Northing: 4916041 m.

2.2 Contact Information

At the time of the Phase One ESA, the Site was owned by Vitmont Holdings (Barrie) Inc. The contact information is as follows:

Company Name: Vitmont Holdings (Barrie) Inc
Company Address: 100 Caster Avenue, Woodbridge, Ontario
Contact Name: Ben Murray
Contact Telephone: (416) 419-2829
Contact email: ben@marydelhomes.com

2.3 Site Description

The Site is irregular in shape with a total property area of 0.41 acres.

The Site is developed with a twenty-five (25) space grade level parking lot. The surface of parking lot was asphalt and grassed/vegetated areas are located to the north of the Site.

The overall topography of the Site slopes gently towards the southeast and is situated at an approximate elevation of 230 metres above mean sea level (mAMSL).

The Site is surrounded by the following properties:

North: Collier Street followed by offices
East: Mulcaster Street followed by retail businesses
Southeast: Regimental Museum (adjacent)
South: Driveway followed by Residential/Commercial properties
West: Residential/Commercial properties (adjacent)

2.4 Objectives of Investigation

The objectives of the Phase One ESA are to:

- Assess the environmental condition of the Phase One Property to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property.
- Identify potentially contaminating activities within the Study Area (i.e., areas within 250 m of the Property's boundary).
- Determine the need for a Phase Two ESA.
- Provide a basis for carrying out any Phase Two ESA.
- Identify issues of obvious or potential environmental concern of the Property from the current and historical activities at the Phase One Property and Phase One Study Area.

3.0 SCOPE OF INVESTIGATION

This report was prepared by SIRATI for the Client. The Phase One ESA was executed in order to determine the likelihood that contaminants affecting the Site are present on, in or under the Phase One Property.

The Phase One ESA was completed in accordance with the O. Reg. 153/04, as amended.

The scope of work for this Phase One ESA included the following tasks carried out by SIRATI:

- Reviewed historical records of the past uses of the Site and adjacent lands through documentation including city directory searches and historical topographic maps from the Toronto Reference Library, aerial photographs from the Toronto Archives and fire insurance plans (FIPs) collection at the Toronto Reference Library, and Library and Archives Canada online collection;
- Reviewed geological, physiological and topographical maps of the Phase One Study Area;
- Obtained and reviewed a chain of title report for the Phase One Property;
- Obtained an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One Property and surrounding properties within 250 m radius from the Phase One Property boundaries;
- Carried out interviews with designated Site representative(s), as a resource for current and historical property information, with unrestricted access to all areas of the Site;
- Contacted municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Carried out a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Carried out a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that could have potentially impacted the environmental condition of the Site;
- Completed an evaluation of the information from the above to determine potentially contaminating activities (PCAs), and preparing a Conceptual Site Model (CSM) to identify areas of potential environmental concern (APECs) for the Site; and,
- Prepared a phase One ESA report (this report) to document the findings of this investigation.

The scope of Phase One ESA did not include any intrusive investigations, including sampling, analysis or monitoring.

SIRATI has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

Although this report discusses designated substances and hazardous materials, the review was performed at a cursory level and for the Phase One Property as a whole. No sampling or analytical testing for designated substances and/or hazardous materials was performed. This report is not considered a designated

substance or hazardous materials survey or assessment. Recommendations made with respect to these items are provided as guidance only.

All activities of this Phase One ESA were completed under the supervision of the Qualified Person (QP), Bob Gordanifar, P. Eng., QP_{ESA and RA}, as defined by the O.Reg. 153/04, as amended. In addition, the QP prepared the Conceptual Site Model, in accordance with Part VII of the Regulation. The Phase One ESA work was carried out by Alice Gong and Bob Gordanifar, P. Eng., QP_{ESA and RA}. Appendix C includes the qualifications of SIRATI staff, who conducted the Phase One ESA.

4.0 RECORDS REVIEW

4.1 General

4.1.1 Phase One Study Area Determination

The default 250 m radius from the Phase One Property boundaries was selected for the Phase One Study Area. The QP for this Phase One ESA, determined that the conventional distance of 250 m from the Site boundaries was adequate for defining the Phase One Study Area for all records reviewed. This was based on the facts that the Site is located in an urbanized area and said radius would cover most potential environmental concerns.

The Site is located on the southwest corner of Collier Street and Mulcaster Street in the City of Barrie. The Phase One Study Area consists of commercial, residential and institutional properties within the default radius of 250 meters, from the Site boundaries. This default 250 m radius extends roughly to McDonald Street to the north, Simcoe Street to the south, Poyntz Street to the east, and Clapperton Street to the west.

The Phase One Study Area and property uses are shown on Figure 2.

4.1.2 First Developed Use Determination

According to the past uses of the Site, as summarized in Section 7.1 of this report, the earliest records available for former uses at the Site indicate that the Site was utilized for residential purposes.

According to the historical title search, the Phase One Property was historically listed under the addresses of 36 Mulcaster Street. The earliest listed owners of the Site were Council of District of Simcoe in 1846, and Corporation of the Town of Barrie in 1855, respectively.

Based on the 1871 and 1880 Historic Country Map of Simcoe County published by the Ontario Historic County Map Project of the University of Toronto, indicates that the Phase One Property was located in a developed area in Barrie at the time. Copies of the Maps are included in Appendix I.

The Site was redeveloped in the 1960s for parking lot.

4.1.3 Fire Insurance Plans

Fire Insurance Plans (FIPs) can provide detailed information regarding aboveground storage tanks (ASTs) and underground storage tanks (USTs), transformers, boilers, electrical rooms, changes in building locations, building additions, site re-development, utilities, and information on surrounding properties.

A search was completed through the City of Toronto Archives website for Fire Insurance Plans pertaining to the Phase One Study Area.

A FIP dated 1907 is included in Appendix D. A review of the FIP identified the following:

- Two (2) adjacent building with municipal addresses 79 and 81 Collier Street, containing the Fire Station, Police, Court and Council Chamber were located on the northwest portion of the Site.

- The adjacent property to the southeast of the Site had the address 36 Mulcaster Street and was used as an Armoury. Reportedly, due to the small size of the building, likely no bulk storage of ammunition was taken place at this property.

4.1.4 Chain of Title

A chain of title search was conducted for the Phase One Property. The Phase One Property has the PIN number: 58817-0421(LT) and was owned by public sectors from 1846 to 2020. The Phase One Property was transfer to the current owner, Vitmont Holdings (Barrie) Inc , in 2020.

The Chain of Title did not suggest any activities of potential environmental concern to the Phase One Property.

The Chain of Title report is included in Appendix E.

4.1.5 Environmental Reports

The following environmental reports, provided to SIRATI, by the Client, were reviewed:

1. “Phase I Environmental Site Assessment, 36 Mulcaster Street, Barrie, Ontario,” prepared by Spice Environmental Inc, for EDEV Real Estate Advisors Inc, dated February 2015 (Spice Environmental 2015 Phase I ESA Report).
2. “Phase II Environmental Site Assessment, 36 Mulcaster Street, Barrie, Ontario,” prepared by PGL Environmental Consultants, for Grant Thornton Limited as Court Appointed Receiver of PACC Mulcaster Corporation, dated June 2019 (PGL 2019 Phase II ESA Report); and
3. “Soil Analytical Testing, 36 Mulcaster Street, Barrie, Ontario,” prepared by V. A. Wood Associates Limited, for Edgecon Inc, dated April 8, 2016 (V.A. Woods 2016 Soil Analytical Testing Report)

Based on the SIRATI review of the above reports, a description of data, analysis and findings, relevant to the phase one environmental site assessment, such as the existence of an area of potential environmental concern, for each report is included below:

Spice Environmental 2015 Phase I ESA Report

According to this report, the Site had the municipal address of 36 Mulcaster Street at that time. The Site was occupied by a twenty-five (25) space grade level pay parking lot. Around 2,500 m³ of fill material have been placed on the Phase 1 Property. Based on the Phase 1 ESA, Potentially Contaminating Activities (PCAs) were identified on the entire Property as follow:

- #30. Importation of Fill Material of Unknown Quality (On-Site)
- #28. Gasoline and Associated Storage in Fixed Tanks (Off-Site)
- #53. Tannery (Off-Site)

The 2025 Phase I ESA considered PCA#30 to be an APEC for the Site and recommended a soil investigation.

PGL 2019 Phase II ESA Report

According to this report, six (6) boreholes were advanced and five (5) of them were completed as monitoring wells. Soil and groundwater results were compared to the Ontario Regulation (O.Reg.) 153/04 Table 2 Site Condition Standards (SCS).

Impacts of polycyclic aromatic hydrocarbon (PAHs), and metals parameters were identified in the fill material on the west side of the Site.

Groundwater samples were collected from two (2) out of five (5) monitoring wells. The results of the groundwater samples met the applicable Table 2 SCS for both industrial/commercial/community and residential/parkland/institutional land uses.

V. A. Woods 2016 Soil Analytical Testing Report

According to this report, six (6) samples were submitted for analysis for Petroleum hydrocarbons (PHCs), PAHs, and Metals and Inorganic parameters. The test results show that some of soil samples have elevated concentrations of PAHs, metals, and de-icing salt related parameters that exceed the MECF Table 1, 2 and 3 SCS.

4.1.6 Other Historical Information

The city directory search was conducted by EcoLog ERIS Ltd. for the Phase One Property and other properties within the Phase One Study Area. The city directories that available to view were dated from 1952 to 1999. Significant environmental concerns identified by directory search are included in Table 4 table below:

Table 4: Historical Business Directory Listings with Significant Environmental Concerns

Municipal Address	Listing Year	Listing
36 Mulcaster Street-Site	1999, 1982, 1974, 1966, 1961, 1952	Barrie Farmer's Market
55 Mulcaster Street - Property to the northeast of the Site	1998	A dry cleaner shop
87 and then 87-89 Collier Street	1942 and 1963	N.M Meyer Hides and Shins. Although the nature of the operations in not known, the potential does exist for tanning activities to have been undertaken at these locations.

The area surrounding the Phase One Property consists of mainly residential and commercial properties. The listings in the city directories identified the presence of historic dry cleaner shop in the Phase One Study Area. The properties at 55 Mulcaster Street were historically occupied by a dry cleaner shop. Based on the elevation of the property, the Property slopes towards west, so the property didn't present an environmental concern for the Site. The remaining listings are inferred to be located hydraulically down/cross-gradient relative to the Site, and thus are not expected to present significant environmental concern for the Site.

The other identified occupants are not considered to be potential environmental concern for the Site. Detail information of occupants within the Phase One Study Area is included in Appendix F.

4.2 Environmental Source Information

An Environmental Risk Information Services (ERIS) report was prepared by EcoLog ERIS Ltd. for the Phase One Property and other properties within the Phase One Study Area. The report details a search of federal, provincial and private sector databases to identify areas of potential environmental concern at the Phase One Property.

The following sub-sections summarize the findings of various databases included in the ERIS report for the Phase One Property and other properties within the Phase One Study Area. Due to restricted access, private databases were researched strictly as they appear in the EcoLog report.

The EcoLog ERIS Ltd. report is included in Appendix G.

4.2.1 National Pollutant Release Inventory Information

A search of the National Pollutant Release Inventory (NPRI) database, maintained by Environment Canada, dated 1993-2013, identified one (1) listings in the Phase One Study Area, as follows:

1. One (1) listing for Ontario Government Complex at 114 Worsley Street for the substance release of Sulphur dioxide, HFC-134a Hydrofluorocarbon and Nitrogen Oxides

4.2.2 Environmental Compliance Approvals, Certificates and Permits

A search of the MECP's "Certificates of Approval" (CA) (1985-October 2011), "Environmental Activity and Sector Registry" (EASR) (October 2011-October 2015), "Environmental Registry" (EBR) (1994-Jan 2016), "Environmental Compliance Approval" (ECA) (October 2011 – June 2015), "Non-Compliance Reports" (NCPL) (1994 – 2012), "Pesticide Register" (PES) (1988-June 2013) and "Permit to Take Water" (PTTW) (1994 – Jan 2016) databases did not identify any listings for the Phase One Property.

However, there are thirteen (11) CA listings for other properties within the Phase One Study Area. The above listings are not expected to present significant environmental concern for the Phase One Property any property on, under or adjacent to the Phase One Property.

4.2.3 Environmental Incidents, Orders, Offences, Spills, Discharges or Inspections

A search of the "Compliance and Convictions" (CONV) (1989 – June 2013), "Non-Compliance Reports" (NCPL) (1992[water only], 1994 – 2010), "Ontario Spills" (SPL) (1988 – August 2019) and the "Orders" (ORD) (1994 – July 2015) databases, maintained by the MECP, did not identify any listings for the Phase One Property.

However, there are fifty-four (54) SPL listings for other properties within the Phase One Study Area. Significant listings are listed as follows:

1. Two (2) listings for gasoline spill at the corner of Mulcaster Street and Collier Street, listed in 2007. An environmental impact was considered possible for one of the spill events.

4.2.4 Waste Management Records

Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management), made under the of the Ontario EPA, defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. A search of the GEN (1986 – Jan 2020) database, maintained by the MECP did not identify any listings for the Phase One Property and any property on, under or adjacent to the Phase One Property.

However, fifty-three (53) GEN listings were identified for other properties within the Phase One Study Area, as follows:

1. Seven (7) listings for Altima Barrie Dental Centre at 75 Collier Street for the generation of pathological wastes, photo-processing wastes and inorganic laboratory chemicals, listed in 2012 to 2016.
2. Three (3) listing for City of Barrie Corporate Facilities at 37 Mulcaster Street for the generation of waste oils/sludges, listed in 2010 to 2019.
3. Eleven (11) listings for The Corporation of The City of Barrie at 70 Collier Street for the generation of petroleum distillates, light fuels, paint/pigment/coating residues, inorganic laboratory chemicals, oil skimmings' & sludges, waste oils & lubricants, detergents/soaps, organic laboratory chemical, photoprocessing wastes, waste compressed gases, acid waste-heavy metals, other inorganic acid wastes and alkaline wastes - other metals listed in 2003 to 2019.
4. Three (3) listings for Sprint Printing at 17B Mulcaster Street for the generation of photo-processing wastes.
5. Three (3) listings for City of Barrie Engineering Department at 57 Collier Street for the generation of alkaline wastes.
6. Twelve (12) listings for Ontario Addiction Treatment Centres at 20 Owen Street for the generation of pathological wastes, listed in 2004 to 2020.
7. Eight (8) listings for The City of Barrie at 157 Dunlop Street East for the generation of halogenated solvents, listed in 2012 to 2019.
8. Ten (10) listings for the Abdel-Gaward Dentistry Professional Corporation at 50 Dunlop Street East for the generation of pathological wastes, inorganic laboratory wastes and photo-processing wastes, listed in 2013 to 2019.
9. Four (4) listings for the Ministry of Government Services at 114 Worsley Street for the generation of waste oils and lubricants, listed in 1989 to 1997.
10. Two (2) listings for City of Barrie at 31 Collier Street for the generation of waste oils/sludges, listed in 2018 to 2019.
11. Three (3) listings for Simcoe Muskoka District Health Unit at 24 Collier Street for the generation of pathological wastes, listed in 2012 to 2014.

12. Two (2) listings for Ministry of Correctional Services at 87 Mulcaster Street for the generation of pathological waste, listed in 1992 to 2001.

Due to close proximity (<100 m), the listings at 75 Collier Street, 70 Collier Street are of environmental concern for the Phase One Property. The remaining listings are not expected to present significant environmental concern the Phase One Property and any property on, under or adjacent to the phase one property, due to distance and/or inferred hydraulic cross-/down-gradient location.

A search of the “Ontario Regulation 347 Waste Receivers Summary” (REC) (1986-2016) database maintained by the MECP did not identify any listings for the Phase One Study Area.

4.2.5 Reports Submitted to the Ministry

To investigate reports submitted to the Ministry related to the environmental conditions of the Phase One Property and any property on, under or adjacent to the phase One Property, SIRATI carried out a search of the “Certificates of Property Use” (CPU) database and the “Wastewater Discharger Registration Database” (SRDS) database, maintained by the MECP.

The above search identified no listings for the Phase One Property or Phase One Study Area.

Furthermore, a search of the “Environmental Effects Monitoring” (EEM) (1992 – 2007), “Environmental Issues Inventory System” (EIIS) (1992 – 2001) and “Contaminated Sites on Federal Land” (FCS) (June 2000 – Nov 2019) databases, maintained by the Federal Government, did not include any listings for the Phase One Property. However, one (1) contaminated site listing was identified within the Phase One Study Area. One at 48 Owen Street for an office building listed. Initial testing was completed in 2011; no further work required. Thus, the listing is not expected to pose significant environmental concern for the Phase One Property.

4.2.6 Commercial Fuel Oil Tanks

The Commercial Fuel Oil Tanks (CFOT) is a database of underground fuel oil tanks obtained under the access of public information:

There were no records for the Phase One Property. However, two (2) commercial fuel oil tank listings were identified within the Phase One Study Area. Two at 168 Dunlop Street East for an active 800 L single wall steel UST listed.

The listings are inferred to be hydraulically cross-/down-gradient relative to the Site, and thus are not expected to pose significant environmental concern for the Phase One Property.

4.2.7 Records of Site Condition

The Record of Site Condition (RSC) database summarizes the environmental conditions of a property as determined by a QP, by conducting a Phase One ESA and where necessary, a Phase Two ESA, confirmatory sampling and risk assessment. Upon completion of the necessary environmental site assessments, a RSC for an assessed property can be filed with the MECP and added to the Environmental Brownfields Site

Registry database. This online publicly available database can be searched to identify what properties may have potential environmental concerns.

There were four (4) listings for other properties within the Phase One Study Area:

- One (1) listing at 90 Collier Street, listed in 2012.
- One (1) listing at 61 Owen Street, listed in 2020
- One (1) listing at 129 Collier Street, listed in 2020
- One (1) listing at 205 Dunlop Street East, listed in 2016.

4.2.8 Other Database Listings

The EcoLog ERIS Ltd. report's search of the "Abandoned Aggregate Inventory" (AAGR), "Aggregate Inventory" (AGR), "Abandoned Mine information System" (AMIS), "Chemical Register" (CHEM), "Canadian Mine Locations" (MINE), "Mineral Occurrences" (MNR), and the "Canadian Pulp and Paper" (PAP) databases did not identify any listings for the Phase One Study Area.

The "ERIS Historical Searches" (EHS) (1999 – March 2020) private database contains fifty-four (54) listings for other properties within the Phase One Study Area. Some of the listings are listed below:

- One (1) listing at 36 Mulcaster Street, listed in 2015.
- One (1) listing at 24 Mulcaster Street, listed in 2018.
- One (1) listing at 63 Collier Street, listed in 2013.
- One (1) listing at 110 Dunlop Street East, listed in 2019.
- Two (2) listings at 17 Mulcaster Street, listed in 2000 and 2015.
- One (1) listing at 130 Dunlop Street East, listed in 2000.
- Two (2) listings at 143, 145, 147 Dunlop Street East, listed in 2011 and 2012.
- Two (2) listings at 89 Collier Street, listed in 2007 and 2015.
- Two (2) listings at 149-153 Dunlop Street East, listed in 2017 and 2009.
- Two (2) listings at 140 Dunlop Street East, listed in 2019 and 2008.
- Two (2) listings at 49 Collier Street, listed in 2018 and 2020.
- One (1) listing at 80 Dunlop Street East, listed in 2017.

The "TSSA Historic Incidents" (HINC) database identified three (3) listings for other properties within the Phase One Study Area:

- One (1) listing at 100 Dunlop Street for a natural gas pipeline strike, listed in 2008.
- One (1) listing at 47 Collier Street for a natural gas pipeline strike, listed in 2007.
- One (1) listing at 67 McDonald Street for a liquid petroleum spill, listed in 2009.

The “Scott’s Manufacturing Directory” (SCT) database identified seven (7) listings for properties within the Phase One Study Area:

- One (1) listing at 65 Collier Street for professional machinery, equipment and supplies wholesale, listed in 1984.
- One (1) listing at 17B Mulcaster Street for commercial printing, listed in 1982.
- One (1) listing at 143 Dunlop Street East for commercial printing, listed in 1988.
- One (1) listing at 123 Dunlop Street East for glass product manufacturing, listed in 1979.
- One (1) listing at 107 Dunlop Street East for breweries, listed in 2004.
- One (1) listing at 53 Owen Street
- One (1) listing at 24 Dunlop Street East for newspapers: publishing or publishing and printing.

The above listings are not expected to present any significant environmental concern to the Phase One Property, due to the type of activity, distance and/or inferred hydraulic cross-/down-gradient location.

4.3 Physical Setting Sources

4.3.1 Aerial Photographs

Aerial photographs provide a visual chronology of previous land uses and activities on the Site and other properties within the Phase One Study Area. Historic aerial photographs, dated from 1954 to 2018, were available for review and reproduction from the City of Barrie Archives and Google Earth. The development and land use history of the Phase One Property and the properties adjacent to the Phase One Property are summarized on Table 5 below:

Table 5: Aerial Photographs for the Phase One Property and the Adjacent Properties

Year	Phase One Property	Adjacent Properties
1954	Site appears to be vacant (cannot glean details from photograph).	Adjacent properties appear to be developed. Collier Street and Mulcaster Street had been developed.
1989	Site is developed as a parking lot.	The adjacent property to the north and south have been developed with the current building structures.
1997, 2002, 2012, 2018	No significant change from 1989 photographs.	No significant change from 1989 photographs.

Copies of the aerial photographs are included in Appendix H.

4.3.2 Topography, Hydrology, Geology

The Phase One Property is located in UTM Zone 17, with approximate coordinates at the centre of the Site of Easting 604663 m and Northing 4916041 m. Maps detailing geology, physiography and topography for the Phase One Study Area were reviewed from the following sources: EcoLog ERIS Ltd., the Ontario Geological Survey map publications on the Ontario Ministry of Northern Development and Mines website (via Google Earth) and the Toronto Reference Library. Copies of the maps are included in Appendix I.

The information provided in the maps are shown in Table 6 below.

Table 6: Topography, Geology and Physiography of the Phase One Study Area

Map	Map Source	Findings
Surficial Geology	- Ontario Ministry of Northern Development and Mines website, available for viewing via OGS Earth (on Google Earth) - Surficial Geology of Southern Ontario, 2010. - Ontario Ministry of Northern Development and Mines website, available for viewing via OGS Earth (on Google Earth) - Ontario's Quaternary Geology Map (2000).	The Phase One Study Area is located in a region of glaciomarine deposits (sand, gravel, minor silt and clay). These soils may range from moderate to high permeability.
Physiography	Ontario Ministry of Northern Development and Mines website, available for viewing via OGS Earth (on Google Earth) - Physiography of Southern Ontario 2007.	The overburden in the Phase One Study Area is derived from Simcoe Lowlands.
Bedrock Geology	- Ontario Ministry of Northern Development and Mines website, available for viewing via OGS Earth (on Google Earth) - Bedrock Geology of Ontario, 2011 – MRD 126. - Ontario Ministry of Northern Development and Mines website, available for viewing via OGS Earth (on Google Earth) - Bedrock Topography and Overburden Thickness – MDR 207. - Ontario Well Records – interactive well record map, 2016.	Bedrock is comprised of limestone, dolostone, shale, arkose and sandstone from the Shadow Lake Formation. The bedrock is at an approximate elevation of 130 metres above mean sea level (mAMSL), approximately 100 mbgs.
Surface Topography	- EcoLog ERIS Ltd: Ontario Base Map; Ontario Ministry of Natural Resources - Surveys and Mapping Branch, 2010. - Google Earth - Elevation Profile provided by NASA's Shuttle Radar Topography Mission (SRTM), not dated. - Atlas of Canada – Toporama website, Topographic Map dated 2015.	The Phase One Property lies at an approximate elevation of 230 mAMSL. The Phase One Property slopes gently towards southeast.

Topographic maps provide information about the topographic features of the Phase One Property and its physical setting, including features such as ground elevation contours, spot elevations, wetlands, surface water bodies, roadways, railways, mines, and historical buildings and structures. They identify that the general topography of the area has not changed significantly throughout the years. Furthermore, the soil and geology of the Phase One Study Area discussed in Table 6 above identifies that the soils may range from moderate to high permeability.

Based on topographic features and knowledge gained from other properties in the area, the regional groundwater flow direction is expected to be to the southeast towards Lake Simcoe, situated approximately 190 m southeast of the Site. Locally, the shallow ground water flow may be influenced by underground

utility trenches, conduits, and structures, variations in soil type, and minor fluctuations in topography. No surface water, lagoon, or standing water was observed on the Phase One Study Area.

The “Borehole” (BORE) (1875 – July 2014) database includes borehole information from many sources, including the Ministry of Transportation (MTO) and the Ontario Geological Survey (OGS), the Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database. The EcoLog ERIS report did not identified any listings, in the above databases, for the Phase One Study Area.

Copies of the Maps including Ontario Base Map from the EcoLog ERIS report, the topographic maps from the Atlas of Canada and the Toronto Reference Library, Surface Geological Map and Bedrock Geological Map from the Ontario Ministry of Northern Development and Mines website are included in Appendix I.

4.3.3 Fill Materials

Areas of fill may be recognized by unusual surface formations or unnatural topography. Fill material from construction or demolition activities often differs in colour, texture, and drainage properties from native soils, and may include such things as construction debris, municipal solid waste, or industrial waste products such as slag, cinders or ash.

Based on the site dimensions and average grade difference with the adjacent lands, there is a potential for fill material of unknown environmental quality could have been used in the original site development and below the asphalt parking lot.

4.3.4 Water Bodies, Areas of Natural Significance & Ground Water Information

To assess the presence of water bodies and areas of natural significance, a Ministry of Natural Resources and Forestry’s Natural Heritage Map was reviewed. Surface water is present on the south portion of the Phase One Study Area.

A review of the interactive natural heritage area map published by the Ministry of Natural Resources and Forestry (MNRF) (2015) identified no areas of natural significance within the Phase One Study Area. A copy of the natural heritage area map is included in Appendix I.

A review of the source water intake map of City of Barrie determined that the Site is located in Well Head Protection Area “B, This means it will two (2) years for surface water to infiltrate the subsurface and migrate to a potential drinking water well.

The properties within the Phase One Study Area, including the Phase One Property, are serviced by municipal water.

4.3.5 Well Records

Well records can be useful in determining the hydrogeological and geological characteristics of the Phase One Study Area by providing information on the stratigraphy of the overburden from ground surface to bedrock, as well as the approximate depths to the bedrock and the water table.

4.3.5.1 Water and Test Wells

The “Water Well Information System” (WWIS) is a provincial database that covers well records data from 1899 - 2019. The database describes locations and characteristics of water wells found in Ontario in accordance with Ontario Regulation 903. A search of the WWIS database through the EcoLog ERIS report and the MECP online database has identified 25 well records within the Phase One Study Area. None of the records are related to the Phase One Property.

Details of depth, construction, and locations of these wells are illustrated in the EcoLog ERIS report in Appendix G.

4.3.5.2 Oil, Gas, and Salt Wells

A search of the Oil, Gas and Salt Resources database by EcoLog ERIS did not find any wells within the Phase One Study Area.

4.4 Site Operation Records

Site operating records must be reviewed where the Phase One Property is an enhanced investigation property as defined under the O. Reg. 153/04, as amended: (a) the property was used at any time, in whole or in part, for an industrial use; or (b) used at any time, in whole or in part, for any of the following commercial uses:

- i. As a garage;
- ii. As a bulk liquid dispensing facility, including a gasoline outlet; and
- iii. For the operation of dry-cleaning equipment.

There are no historical records that indicate that the Site was used for any of the above purposes. As such, the Phase One Property is not considered an Enhanced Investigation Property.

5.0 INTERVIEWS

5.1 Property Owner Representative

On-site interviews with individuals knowledgeable about the history and use of the Phase One Property can identify details that might not be obtainable from a review of historical records.

Alice Gong of SIRATI interviewed Ms. Krystina Chang, Site Development Manager, to obtain details on the Site, on June 8, 2020. Ms. Krystina indicated that the Site is currently a parking lot.

The results of the interview are summarized according to the information obtained from the completed Phase One ESA Questionnaire Form:

- The property was purchased in April 2020, and the site is currently a parking lot.
- There were no activities occurring on Site, which were related to industrial operations, dry cleaning, fuel distribution or storage, vehicle servicing and/or maintenance.
- No operations which involve storage and/or use of environmentally sensitive or hazardous products occur on Site.
- There are no herbicides, pesticides or other agricultural chemicals being used on the properties.
- There are no underground structures, such as in-ground hoists, pits, storage tanks, or oil/water separators located on the properties.
- There was no existing or previous fuel storage tank or related leaks/spills or removal and remediation on the Site.
- There were no issues related to PCBs occurring on Site.
- There was no waste generation or emission at the Site. The Owner is not sure if an old decommissioned septic tank is present on Site.
- No environmental site assessment or required soil and/or groundwater remediation took place on Site.
- There was no violation or possible violation of environmental laws which was investigated or cited for the property.

A copy of the completed interview questionnaire is included in Appendix J.

5.2 Regulatory Correspondence

A formal request was made on July 7, 2020 to the MECP for the release of any information they may have on file regarding the presence of any waste disposal sites, industrial discharges, sewer use violations or other environmental problems in the area, and any issuance of orders to comply against the Phase One Property.

Upon receipt of the MECP response the Client will be informed if this information has any impact on the conclusions of this Phase One ESA report.

In addition, Email correspondence with the Technical Standards and Safety Authority (TSSA) was carried out. Email correspondence with the Technical Standards and Safety Authority (TSSA) identified no record

of an active tank at the Site.

Appendix J includes a copy of the regulatory requests and correspondences.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

The purpose of the Site reconnaissance was to determine if APECs exist, through observations about current and past uses and PCAs on, in or under the Phase One Property and within the Phase One Study Area, as well as to identify potential contaminant pathways. Interior and exterior observations of the Phase One Property and surrounding properties were carried out. The exterior observations were recorded by walking over the grounds surrounding the building on the Site. Adjoining properties and properties within the Phase One Study Area were observed from the Phase One Property and public accessible roadways. The following Table 7 includes information regarding the site reconnaissance:

Table 7: Site Reconnaissance Information

Date of Investigation:	June 24, 2020
Time of Investigation:	9 am -10 am
Weather Conditions:	Cloudy, 25°C
Duration of Investigation:	~1 hour
Was the facility operating?	Yes, a parking lot
Name and Qualification of Person(s) conducting the site reconnaissance	Alice Gong, B.Sc.
Limitations	No

6.2 Specific Observations at Phase One Property

6.2.1 Site Description

The Phase One Property is located on the southwest corner of Collier Street and Mulcaster Street in the City of Barrie. The total area of the Phase One Property is approximately 0.41 acres. The Phase One Property is currently developed with a twenty-five (25) space grade level parking lot. Photographs taken during the site visit and the accompanying descriptions are presented in Appendix B.

The Site is surrounded by the following properties:

North: Collier Street followed by offices
East: Mulcaster Street/ followed by retail businesses
Southeast: Regimental Museum (adjacent)
South: Driveway followed by Residential/Commercial properties
West: Residential/Commercial properties (adjacent)

6.2.2 General Description of Below-Ground Structures

During the site reconnaissance, the Site is developed with a twenty-five (25) space grade level parking lot, no below-ground structures was observed.

6.2.3 Tanks

6.2.3.1 Underground Storage Tank

During the site reconnaissance, no underground storage tanks (USTs) or indications of fuel storage tanks were observed at the Site.

6.2.3.2 Aboveground Storage Tank

During the site reconnaissance, no aboveground storage tanks (ASTs) or indications of fuel storage tanks were observed at the Site.

6.2.3.3 Other Storage Containers

During the site reconnaissance, some storage containers of soil cutting from previous drilling events were observed at the southwest corner of Phase One Property. No concerns were identified.

6.2.4 Potable and Non-Potable Water Sources

The City of Barrie supplies the Site with potable water. It is expected that the properties within the Phase One Study Area are serviced by the municipal drinking water as well as sanitary and storm water systems. No water well was observed on the Phase One Property during the site visit.

6.2.5 Underground Utilities

The inspection of the Phase One Property indicated the following information related to utility services:

- A hydro pole with overhead lines was observed to be located along north property boundary of the Phase One Property.
- Sign indicating the presence of an Enbridge natural gas line were observed along the southeast property boundary.
- Three (3) catch basins were observed on the Phase One Property.
- At the time of the site visit, utility markings for hydro, water and natural gas were noted on the south and west portion of the property.

Based on the above noted features, underground utilities such as electricity, water and natural gas or other service lines would be anticipated to be present on the Phase One Property. However, the exact locations should be confirmed by the utility locators.

6.2.6 Building Exit and Entry Points

There is no building on the Site at the time of the site reconnaissance.

6.2.7 Heating Systems

No heating system was observed at the Phase One Property.

6.2.8 Cooling Systems

No cooling system was observed at the Phase One Property.

6.2.9 Drains, Pits and Sumps

Visual observations of the catch basins, floor drains and sump pits at the Phase One Property can provide visual or olfactory evidence of contamination.

Catch basins can be conduits for the migration of contaminants from the Phase One Property, especially when storm water runoff flows across a spill or hazardous waste storage area before discharging to the catch basin. Furthermore, drains and sumps may have been used to discharge hazardous wastes, particularly when located near manufacturing, processing, or hazardous material storage areas.

No sumps/pits were observed at the site. The catch basins observed on the Phase One Property appeared to be in good condition; no odours were noted and no oily sheen on the water surfaces were present.

6.2.10 Hydraulic Equipment

No hydraulic equipment was identified at the Phase One Property, during the Site reconnaissance.

6.2.11 Unidentified Substances

No unidentified substances were present at the Phase One Property at the time of the Site reconnaissance.

6.2.12 Stains or Corrosion on Floors Near Drains, Pits, Sumps, Cracks and Discharge Points

No significant stains or corrosions were observed on floors, close to drains, pits, sumps, cracks or other potential discharge locations, at the Phase One Property during the Site reconnaissance.

6.2.13 Abandoned or Existing Wells

Improper well construction and the failure to carry out routine preventative maintenance on wells can often result in contamination of the groundwater. Unplugged, abandoned water wells may constitute a hazard to public health and safety, and may provide a conduit for the downward migration of contaminants to the groundwater.

During the site visit, three (3) flush-mount type monitoring wells, were observed at the Site. Based on the MECP water well records, no water well was recorded for the Phase One Property.

6.2.14 Sewage Works

The Phase One Property and the surrounding area are serviced by the City of Barrie municipal sanitary and storm sewer systems. Industrial wastewater is not generated at the Phase One Property.

6.2.15 Ground Surface Description

The ground surface at the Phase One Property is covered with asphalt and concrete pavements, as well as other hard and soft landscaping features.

6.2.16 Current or Former Railway Lines or Spurs

The 1880 Ontario based map indicates that a railway track was located approximately 150 m south of the Phase One Property. A copy of Map is included in Appendix I.

During the Site reconnaissance, there was no evidence of current or former railway lines or spurs on the Phase One Property.

6.2.17 Stained Soil, Vegetation or Pavement

Various types of raw or waste materials may discolour soil directly or through the precipitation of chemicals in the soil. Chemical contaminants in runoff or discharge can stain concrete pavements.

No significant stains were observed at the Phase One Property during the Site reconnaissance.

6.2.18 Stressed Vegetation

No stressed vegetation was observed at the Site as well at the Phase One Property during the Site reconnaissance.

6.2.19 Fill or Debris

Areas of fill may be recognized by unusual surface formations or unnatural topography. Fill material from construction or demolition activities often differs in colour, texture, and drainage properties from native soils, and may include such things as construction debris, municipal solid waste, or industrial waste products such as slag, cinders or ash.

Based on the Site dimensions and average grade difference with the adjacent lands, there is a potential that fill material of unknown environmental quality could have been used in the original Site development.

6.2.20 Potentially Contaminating Activities on the Site

During the Site Reconnaissance, there was no evidence of on-going activities at the Site that would be considered potentially contaminating activities for the Phase One Property.

6.2.21 Chemical Inventory

During the Site Reconnaissance, no chemicals were observed at the Site.

6.2.22 Liquid Chemical Waste Generation, Storage & Disposal

No concerns regarding liquid waste generation, storage and disposal were observed, during the Site reconnaissance.

6.2.23 Solids Waste Generation, Storage & Disposal

No special or hazardous solid industrial wastes are generated at the Phase One Property. The Phase One Property is not currently registered as a generator of special or hazardous solid industrial wastes.

6.2.24 Special Attention Items

Special attention items include designated substances and hazardous materials that may be present in the building materials. There is not building on the site and no possibility of any designated substances or hazardous building material.

6.2.25 Odours

No chemicals or other odours were detected during the Site reconnaissance.

6.2.26 Noise

No unusual/excessive noise was detected at the Phase One Property during the Site reconnaissance.

6.2.27 Watercourses, Ditches or Standing Water

During the site visit, no watercourses, ditches or standing water was observed on the Phase One Property.

6.2.28 Air Emissions

At the time of the site visit, there is no structure at the Site designated to release gases into atmosphere.

6.2.29 Road, Parking Facilities and Rights of Way

Access to the Phase One Property is provided from designated paved driveway from Mulcaster Street, east of the Site.

6.3 Enhanced Investigation Property

A Site is considered an Enhanced Investigation Property, as per the O. Reg. 153/04,

“if the property is used, or has ever been used, in whole or part, for an industrial use or for any of the following commercial uses (i) as a garage; (ii) as a bulk liquid dispensing facility, including a gasoline outlet, or (iii) for the operation of dry cleaning equipment.”

There are no historical records that indicate that the Site was used for any of the above purposes. As such, the Phase One Property is not considered an Enhanced Investigation Property.

6.3.1 Site Production and Manufacturing

The Site is currently occupied by a commercial parking lot. No production or manufacturing occurs at the Site.

6.3.2 Hazardous Materials

No hazardous materials were identified during the Site reconnaissance.

6.3.3 Products Manufactured

The Site is currently occupied by a commercial parking lot. No production or manufacturing occurs at the Site.

6.3.4 By-Products and Wastes

No industrial by-products or wastes are generated at the Site.

6.3.5 Raw Material Handling and Storage Locations

No raw materials were identified during the Site reconnaissance.

6.3.6 Drums, Totes and Bins

Metal drums containing soil from a previous drilling activity are present at the Site. The metal drums appear to be in good condition.

No totes or bins were identified during the Site reconnaissance.

6.3.7 Oil/Water Separators

No oil/water separators were identified during the Site reconnaissance.

6.3.8 Vehicle and Equipment Maintenance

No vehicle or equipment maintenance activities were present on the Phase One Property.

6.3.9 Spills

Reportedly, there have been no spills or occurrence of other environmental incidents on the Phase One Property.

6.3.10 Liquid Discharge Points

No liquid discharge points, or generation of industrial wastewater, were observed during the Site reconnaissance.

6.3.11 Hydraulic Lifts

Based on Site observations and interviews, no hydraulic lifts have ever been present at the Site.

6.4 Investigation of Phase One Study Area

6.4.1 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Site was carried out from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Site.

The conditions of the adjacent properties were observed from the public accessible roadways and the Phase One Property at the time of the Site reconnaissance. The findings of the visual reconnaissance of the adjacent properties are shown in the photographs included in Appendix B

The Site is surrounded by the following properties:

North: Collier Street followed by offices
East: Mulcaster Street followed by retail businesses
Southeast: Regimental Museum (adjacent)
South: Driveway followed by Residential/Commercial properties
West: Residential/Commercial properties (adjacent)

6.4.2 Water Bodies

Naturally occurring surface waters such as rivers, streams, lakes, ponds, or wetlands may be significant because they are potential waste discharge points and may provide a conduit for off-site contaminants to migrate on-site or vice-versa.

No naturally occurring water bodies are located on the Phase One Property. The Lake Simcoe is in the south portion of Phase One Study Area.

6.4.3 Areas of Natural Significance

As previously mentioned in Section 4.3.4, a review of the interactive natural heritage area map published by the Ministry of Natural Resources and Forestry (MNRF) (2015), identified no areas of natural significance within the Phase One Study Area. Furthermore, no land that would be an area of natural significance was observed in the Phase One Study Area, during the Site reconnaissance.

6.5 Written Description of Investigation

The site reconnaissance was conducted by SIRATI personnel on June 24, 2020 and included a walking tour and inspection of the Phase One Property. Written and photographic records regarding the condition of the Phase One Property and Study Area were compiled.

In areas of the Phase One Study Area, not covered by buildings or structures, observations were made of the surrounding properties within Phase One Study Area, from publicly accessible areas, for any signs of stained soil, vegetation or pavement, stressed vegetation, ASTs, evidence of USTs, water supply wells, and any potentially contaminating activities.

Copies of Site reconnaissance and interview notes were outlined throughout this Report. In summary, the Site reconnaissance and related inquiries identified the following areas of concern:

- Fill Materials may have been placed on the Phase One Property to create the level site grade extending westwards from Mulcaster Street.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses

The current and past uses of the Phase One Property were determined based on from a chain of title (Section 4.1.4), aerial photographs (Section 4.3.1), and other historical records reviewed including the property use records (Section 4.1.6).

The Phase One Property was likely used for agricultural purpose since it was transferred to the first individual owner in 1846. Historic maps dated 1871 and 1880 indicate that the site was developed at the time. A FIP dated 1907 shows that the Site was occupied by a fire station, police and court and council chamber. The Phase One Property had been used for parking lot since the 1960s.

Table of current and past uses of the Phase One Property is included in Appendix K.

7.2 Potentially Contaminating Activities

Based on the information obtained by the aerial photographs (Section 4.3.1), property use records (Section 4.1.6), previous reports (Section 4.1.5), environmental source information (Section 4.2), interview (Section 5.0) and Site Reconnaissance (Section 6.0) indicate several activities that are considered to be PCAs, as defined by Table 2 of Schedule D of the O. Reg. 153/04, and are summarized in Table 1 in Executive Summary. These PCAs have historically been or are currently located within the Phase One Study Area. The column identifying the PCAs as being up-gradient (Y/N) refers to the inferred southeast groundwater flow direction in the area relative to the Phase One Property. A comprehensive list of PCA types and locations present in the Phase One Study Area are shown on Figure 5.

7.3 Areas of Potential Environmental Concern

Details of the APECs identified on the Phase One Property are outlined in Table 2 in Executive Summary. List of APECs is included on Figure 6

7.4 Phase One Conceptual Site Model

7.4.1 CSM Figures

Figures 1 to 4 show the following information:

- i. Existing buildings and structures on the Phase One Study Area
- ii. Water bodies on the Phase One Study Area
- iii. Areas of natural significance on the Phase One Study Area
- iv. Site location map, showing roads, including names on the Phase One Study Area
- v. Uses of properties adjacent to the Phase One Property
- vi. PCAs on the Phase One Study Area
- vii. APECs on the Phase One Property

7.4.2 Description of Assessment

This Phase One Conceptual Site Model is prepared as part of a Phase One Environmental Site Assessment (Phase One ESA) for the property located at 79 Collier Street, Barrie, Ontario (hereinafter referred to as the “Phase One Property” or the “Site”).

Based on the records review, the Phase One Property has been used for mixed institutional/commercial purposes since the early 1907. At the time of the Site reconnaissance, the Phase One Property was developed as a parking lot. Adjacent to the east of the Site is Mulcaster Street, and to the north at Collier Street. The Grey & Simcoe Foresters – Regimental Museum is located along the southeast boundary of Phase One Property. SIRATI understands that the Phase One Property is proposed for the development of a 15 storey building with one (1) level of basement. SIRATI understands that the Phase One Property is proposed for the development of a 15 storey residential building with one (1) level of basement.

The Phase One Property is approximately 0.41 acres in area and is located on the southwest corner of Collier Street and of Mulcaster Street, City of Barrie. The municipal address of the Phase One Property is 79 Collier Street. The Property Identification Number of the Phase One Property is 58817-0421(LT). The legal description of the Phase One Property is:

Part Market Block on Plan 2 Barrie, Being Parts 2 to 6 on Plan 51R39976; Subject to an Easement over Part 2 ON Plan 51R39976 As In RO1167938; Subject to An Easement Over Part 6 On Plan 51R39976 As In SC1216519; Subject to an Easement in Gross Over Part 4 ON Plan 51R39976 As In SC1216520; City of Barrie.

The Site is surrounded by the following properties:

North: Collier Street followed by offices
East: Mulcaster Street/ followed by retail businesses
Southeast: Regimental Museum (adjacent)
South: Driveway followed by Residential/Commercial properties
West: Residential/Commercial properties (adjacent)

7.4.2.1 Identify and Locate Areas Where any Potentially Contaminating Activity Has Occurred

Eleven (11) Potentially Contaminating Activities (PCAs) were identified at the Phase One Property and at properties within the Phase One Study Area based on the records review, interviews, and Site reconnaissance. The PCAs identified within the Phase One Study Area are listed in Table 1 in Executive Summary of this report.

7.4.2.2 Identify and Locate any Areas of Potential Environmental Concern

Two (2) of the PCAs identified at the Phase One Property and Phase One Study Area are considered to cause Areas of Potential Environmental Concern (APECs) at the Phase One Property. These two (2) APECs are included in Table 2 in Executive Summary of this report.

The locations of the PCAs and APECs are shown on Figure 3.

7.4.2.3 Potential Underground Utilities to Affect Contaminant Distribution and Transport

At the time of the assessment, the Phase One Property was occupied by a parking lot. No other subsurface structures or underground utilities were observed or expected at the Phase One Property.

7.4.2.4 Regional or Site Specific Geological and Hydrological Information

Based on available physiography, geology and topography information, the Phase One Study Area is located in an area with a physiography of Simcoe Lowlands with a surficial geology of littoral deposits of sand, gravelly minor silt and clay, over bedrock of limestone, dolostone, shale, arkose and sandstone from the Shadow Lake Formation. These soils have a relative moderate to high permeability; hence, the Site is susceptible to contaminant migration from adjacent properties. According to the Bedrock Topography of Barrie Area map it is anticipated that the Bedrock is at an elevation of approximately 130 mAMSL approximately 100 mbgs.

The Phase One Property is located within the larger hydrogeological region known as the Lake Simcoe Watershed.

The ground surface at the Phase One Property slopes towards the southeast. Shallow groundwater flow is expected to flow towards the southeast.

7.4.2.5 Uncertainty or Absence of Information Obtained

No uncertainty or absence of information noted in the Phase One ESA could affect the validity of this conceptual site model.

7.4.3 Exemption Set out in Paragraph 1, 1.1 or 2 of Section 49.1 of the Regulation

The Phase One Property has been historically used as a municipal parking lot. It is expected that de-icing salt was applied to the Site and adjacent roads for the safety of pedestrian and vehicle traffic. Therefore, exemption set out in Paragraph 1 of Section 49.1 of the Regulation applies to the Site.

8.0 CONCLUSIONS AND RECOMMENDATIONS

Sirati & Partners Consultants Limited (SIRATI) was retained by Vitmont Holdings (Barrie) Inc., c/o Marydel Homes (“the Client”) to complete a Phase One Environmental Site Assessment (Phase One ESA) at the property located at 79 Collier Street, Barrie, ON (hereinafter referred to as the “Phase One Property” or the “Site”).

The objective of this Phase One ESA was to determine the likelihood that contaminants affecting the Site are present on, in or under the property and to identify actual or potential contamination, which might pose a hazard to humans or the environment, or which may have a significant impact on the value of the Phase One Property.

This Phase One ESA is intended to support the filing of a Record of Site Condition (RSC) for the Phase One Property with the Ministry of Environment Conservation and Parks (MECP) for property site plan approval purposes in accordance with the Ontario Regulation (O. Reg.) 153/04, as amended.

Information regarding the Phase One Study Area was compiled through a records review, site reconnaissance and interviews with individuals knowledgeable about the Site. The gathered information was evaluated and compiled in this Phase One ESA report.

This Phase One ESA was carried out in accordance with the O. Reg. 153/04, as amended. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards. Sampling and testing of potentially contaminated media were not within the scope of this Phase One ESA.

This report was prepared for the exclusive use of Vitmont Holdings (Barrie) Inc. c/o Marydel Homes. Any use of this report by any third-party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. SIRATI accepts no responsibility for damages, if any, suffered by any third-party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 11 of this report.

SIRATI carried out a visual inspection of the Phase One Property and other properties within the Phase One Study Area (the Site and properties within 250 m of the Site boundaries) on June 24, 2020.

The Phase One Property is developed as a parking lot. Adjacent to the east of the Site is Mulcaster Street, and to the north is Collier Street. The Grey & Simcoe Foresters – Regimental Museum is located along the southeast boundary of Phase One Property. SIRATI understands that the Phase One Property is proposed for the development of a 15 storey building with one (1) level of basement.

The Site is located on the southwest corner of Collier Street and Mulcaster Street, in the City of Barrie. The total area of the Site is approximately 0.41 acres. The Site is bounded by Collier Street to the north, a residential/commercial building to the south, a driveway and a residential/commercial building to the west, and Mulcaster Street to the east. The Phase One Study Area consists of residential, commercial, and institutional properties within the radius of 250 meters from the Site boundaries. This 250 m radius extends roughly to McDonald Street to the north, Simcoe Street to the south, Poyntz Street to the east, and Clapperton Street to the west.

Based on available physiography, geology and topography information, the Phase One Study Area is located in an area with a physiography of Simcoe Lowlands with a surficial geology of littoral deposits of sand, gravelly minor silt and clay, over bedrock of limestone, dolostone, shale, arkose and sandstone from the Shadow Lake Formation. These soils have a relative moderate to high permeability; hence, the Site is susceptible to contaminant migration from adjacent properties. According to the Bedrock Topography of Barrie Area map it is anticipated that the Bedrock is at an elevation of approximately 130 mAMSL approximately 100 mbgs.

According to the topographic maps, the inferred groundwater flow direction in the area is likely to flow towards the southeast in a similar manner as the topography of the area.

The interactive natural heritage area map, published by the Ministry of Natural Resources and Forestry (MNRF) (2015), indicates no areas of natural significance within the Phase One Study Area. No surface water, lagoon, or standing water was observed on the Phase One Property; Lake Simcoe is in the south portion of Phase One Study Area. A request made to the MECP indicated no records were located in their database regarding the Phase One Property.

The information, obtained through the records review, interview and Site Reconnaissance, identified eleven (11) potentially contaminating activities (PCAs) within the Phase One Study Area. The location of the PCAs are presented in Figure 3. Two (2) of these PCAs are considered to be areas of potential environmental concern (APECs) for the Site. The location of the APECs are presented in Figure 4.

The PCAs and APECs are listed on Tables 1 and 2 in Section 1.0.

Based on the findings of the Phase One ESA, SIRATI recommends a Phase Two ESA to investigate the above APECs at the Site. The Phase Two ESA will include, but not limited to the collecting soil and groundwater samples at selected location. The samples will be submitted to a laboratory for chemical analysis of various parameters. The concentrations of the teste parameters will be compared with the applicable MECP site condition standards. The results of the findings will be summarized in a Phase Two ESA Report.

10.0 GENERAL CONSIDERATIONS AND LIMITATIONS

This report was prepared for the exclusive use of Vitmont Holdings (Barrie) Inc., c/o Marydel Homes (the Client) to provide an assessment of the environmental condition on the Property identified as 79 Collier Street, in the City of Barrie, Ontario, and may not be relied upon by any other person or entity without the written authorization of Sirati & Partners Consultants Limited (SIRATI).

The conclusions presented in this report are professional opinions based on the historical and current records search, visual observations and limited information provided by persons knowledgeable about past and current activities on this Property. As such, SIRATI cannot be held responsible for environmental conditions at the Property that was not apparent from the available information. No investigation method can completely eliminate the possibility of obtaining partially imprecise or incomplete information; it can only reduce the possibility to an acceptable level.

Professional judgement was exercised in gathering and analyzing data and formulation of recommendations using current industry guidelines and standards. Similar to all professional persons rendering advice, SIRATI cannot act as absolute insurer of the conclusion we have reached. No additional warranty or representation, expressed or implied, is included or intended in this report other than stated herein the report.

The assessment should not be considered a comprehensive audit that eliminates all risks of encountering environmental problems. The information presented herein this report is primarily based on information collected during the Phase One ESA based on the condition of the Property at the time of the site assessment/inspection followed by a review of historical data, as appended to this report.

In assessing the environmental setting of the Property, SIRATI has solely relied upon information supplied by others in good faith and has therefore assumed that the information supplied is factual and accurate. We accept no responsibility for any inaccurate information, misinterpretation, misrepresentation or for any deficiency of the information supplied by any third party.

No intrusive investigation (to include soil sampling and analysis, groundwater monitoring or sampling or other form of intrusive investigation) was carried out as part of this assessment. Consequently, the presence and/or extent of any adverse environmental impact cannot be verified. Potential existence of any environmental liability/impact is primarily an opinion expressed based on professional judgement and within the Scope of Work of this assignment. The Phase One Environmental Site Assessment was prepared to identify existing environmental concerns based on the review of available data in accordance with the principal components of the O. Reg. 153/04, as amended, and/or CSA Z768-01 Phase I Environmental Site Assessment. Professional judgement was also exercised in the formulation of recommendations. The report is not intended to constitute or provide a legal opinion.

The scope of services performed in the execution of this investigation may not be appropriate to satisfy third parties. SIRATI accepts no responsibility for damages if any, suffered by any third party as a result of decisions made or action taken based on this report. Any use, copying or distribution of the report in whole or in part is not permitted without the express written permission of SIRATI and use of findings, conclusions and recommendations represented in this report, is at the sole risk of third parties.

In the event that during future work new information regarding the environmental condition of the Phase One Property is encountered, or in the event that the outstanding responses from the regulatory agencies indicate outstanding issues on file with respect to the Phase One Property, SIRATI should be notified in order that we may re-evaluate the findings of this assessment and provide amendments, as required.

11.0 SIGNATURES

All activities of this Phase One ESA were completed under the supervision of the Qualified Person (QP), Bob Gordanifar, P. Eng., QP_{ESA and RA}, as defined by O.Reg. 153/04, as amended. In addition, the QP prepared the Conceptual Site Model, in accordance with Part VII of the Regulation. Appendix C includes the qualifications of SIRATI staff, who conducted the Phase One ESA.

Should you have any questions regarding the information presented or limitation set in this report, please do not hesitate to contact our office.

Yours truly,

Sirati and Partners Consultants Ltd.

Alice Gong, B.Sc.
Technician, Environmental Services

Efuange Khumbah, M.Sc

APPENDIX C

Bob Gordanifar, P. Eng., QP_{ESA} and RA. Mr. Gordanifar is a Vice President of Environmental and Hydrogeological Services at SIRATI. He is a technical expert and a registered Professional Engineer in the province of Ontario (PEO License Number 90336835), with over 30 years of experience in the environmental engineering field. Mr. Gordanifar is a registered Qualified Person for both Environmental Site Assessments (QP_{ESA}) and Risk Assessments (QP_{RA}), as defined by the O. Reg. 153/04, as well as a highly qualified professional with demonstrated ability and a proven track record of successful project management and technical expertise in Canada, USA, and internationally for public and private sectors. Mr. Gordanifar has served clients in construction, financial institutions, insurance companies, legal firms, manufacturing industries, oil/gas/petrochemical, mining, milling and smelting. Also served municipal, provincial and federal clients.

- Regional/Division/Group/Project Management
- Environmental Site Assessments and Remediation Services
- Filing Record of Site Condition (RSC), in Accordance with the Ontario Regulation 153/04
- Environmental Risk Assessments
- Hydrogeological Studies
- Excess Soils Management
- Environmental Audits
- Litigation Support and Expert Witness for Cases Involving Contaminated Sites in Ontario
- Remediation Systems, including, but not limited to: soil vapour extraction, pump and treat,
- Senior Review of Environmental Reports

Alice Gong, Ms. Gong holds a degree in environmental science. Ms. Gong has experience in conducting Phase One and Phase Two Environmental Site Assessments, Site Remediations, Excess Soil Management and Hydrogeological Studies.

Sirati & Partners Consultants Ltd. is a multi-disciplinary Canadian owned consulting firm providing engineering solutions for Geotechnical, Environmental, Hydrogeological, Materials Engineering, Material Testing & Inspection, Concrete and Pavement Technology.

The principal founders are members of former geotechnical and environmental companies who achieved the highest recognition for engineering consultancy providing geotechnical, environmental and hydro geological support to our clients.

SIRATI provides expertise in these disciplines to a wide range of projects such as planning, design, and construction of pipelines, tunnels, pump stations, municipal buildings, roads, bridges, slope and landslide management, low and high rise as well as commercial buildings, light rail systems, dams and reservoirs, water and wastewater treatment facilities, outfalls, retaining walls, embankments, airports, and port facilities.

Statement of Qualified Person

The Phase One Environmental Site Assessment has been completed under the direction and supervision of **Bob Gordanifar, P. Eng., QP_{ESA and RA}**. The findings and conclusions presented in this report have been determined on the basis of the information that was obtained and reviewed, and on an assessment of the existing conditions on the Phase One Property and properties within the Phase One Study Area. The QP has determined that the phase one ESA meets the requirements of Part VII (sections 23 to 31) and Schedule D of the O. Reg. 153/04, including the requirements for reports (Table 1 of Schedule D of the Regulation).

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Feb 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Mar 31, 2020

Drill Hole Database:

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Mar 31, 2020

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Mar 31, 2020

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Mar 31, 2020

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2020

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

[EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial

[EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FED TANKS

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2019

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 29, 2020

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Mar 31, 2020

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

[PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988 - Mar 2020

Pipeline Incidents:

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Mar 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental clean-up orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2020**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2020**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011***Ontario Spills:**

Provincial

SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2019**Wastewater Discharger Registration Database:**

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953***Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Mar 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX J

Phase One Environmental Site Assessment

Interview Questionnaire

Address of Phase One Property: **79 Collier Street, Barrie, Ontario**

Date of Interview Completion: **June 8th, 2020**

Interviewee Information:

1. Full name? employer, your position or title, and how long have you been employed with them?
KRYSTINA CHANG, DEVELOPMENT MANAGER – 2.75 YEARS
2. Relation to the subject property, and how many years have you been involved with the property?
DEVELOPMENT MANAGER OF THE SITE, I HAVE BEEN INVOLVED WITH THIS PROPERTY SINCE VITMONT HOLDINGS (BARRIE) INC. HAD ACQUIRED IT.
3. Are you aware of any individuals who may have additional knowledge of current or past activities at the property? **YES**

Property Owner Information:

4. Name of Property Owner: **VITMONT HOLDINGS (BARRIE) INC.**
5. Date of Ownership: **APRIL 20, 2020**

Current and Past Site Activities

6. What are the current site activities?
NONE
7. Has the site ever been used for:
 - a. Industrial operations (list any if known) – **PARKING LOT**
 - b. On-site dry cleaning
 - c. Fuel distribution or storage
 - d. Vehicle servicing and/or maintenance

Items of Potential Environmental Concern

If the answer to any of the questions in the section is “yes”, please provide details.

General

8. Do site operations involve the storage and/or use of environmentally sensitive or hazardous products, such as paints, chemicals, fuels, oils and lubricants? **NO**
9. Are herbicides, pesticides, or other agricultural chemicals being used on the property? **NO**
10. Are there any underground structures, such as in-ground hoists, pits, storage tanks, or oil/water separators located on the property? **NO**
11. Are you aware of any wells located on the property? **NO**

Tanks

12. Are you aware of any existing or previous underground (buried) or aboveground tanks on the property? **NO**
13. Are you aware of any leaks or spills associated with any existing or previous tanks on the property? **NO**
14. Is there any documentation on file regarding removal of underground or aboveground tanks and/or related soil and ground water remediation at the property? **NO**

Polychlorinated Biphenyls (PCBs)

15. Are you aware of any PCB-containing electrical equipment on the property such as electrical transformers, large capacitors and electric motors manufactured prior to 1980? **NO**
16. Is the site a registered PCB storage facility? **NO**
17. Are you aware of any previous PCB leaks, spills or contamination on the property? **NO**
18. Have there been any previous PCB surveys or removal of PCB-containing materials? **NO**

Waste Generation and Emissions

19. Is the site registered as a waste generator with the Ministry of the Environment (registered on HWIN)? **NO**
20. Is any waste water produced at the site? If yes, please answer the following:
 - e. Is analytical testing of waste water carried out? **NO**

- f. Are you aware of any sewer-use by-law infractions? **NO**
- g. Is there a surcharge agreement for discharge to the sewers? **NO**

Fill Materials

- 21. Provide information regarding fill materials (source, volume, date of import, reports, fill quality, etc.) placed on the Property based on your knowledge.

PLEASE FIND ATTACHED GEOTECHNICAL REPORT WITHIN THE E-MAIL

Environmental Reports, Remediation and Public Agencies

- 22. Have any previous environmental assessments or studies been completed for the property with respect to soil, ground water, air quality, site facilities or processes?

YES, PHASE 1 & 2 (SEE ATTACHED)

- 23. Has any soil or ground water remediation been completed at the property?

NO

- 24. Has any public agency (e.g., the Ministry of the Environment, local municipality, etc.) ever investigated or cited the property for violation or possible violation of any environmental law, or commenced enforcement or cleanup action under environmental law with respect to the property? **NO**

- 25. Has any public agency ever listed the property as a site requiring or qualifying for cleanup under environmental law? **NO**

Would you need a further information, please do not hesitate to call our office.

Subject: RE: Storage Tank Information Request

Hello,

Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationsservices@tssa.org or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.
