Principal & Environmental Manager

## 1 EXECUTIVE SUMMARY

HLV2K Engineering Limited (HLV2K) was retained by Typhon Group Limited (hereinafter referred to as the Client) to conduct a Phase One Environmental Site Assessment (ESA) report for the property located at 272 Innisfil Street, Barrie, Ontario (hereinafter referred to as the site and Phase One Property). The Phase One Property is situated in a commercial area between Anne Street and Essa Road, south of the downtown core of Barrie. The Phase One Property is bounded by individual autobody shops to the south and west, by Jacobs Terrace and a CN Rail Line to the north, and by Innisfil Street and commercial land to the east.

The Phase One Property is currently in commercial land use as a multi-tenant building. The purpose of the Phase One ESA is to support the demolition of the current building and future development of a new residential condominium consisting of at least ten (10) stories with one (1) level of underground parking, on the Phase One Property. An application for a Record of Site Condition (RSC) will be required in order to address the more sensitive use of the property as residential.

| <p><b>Interviewee:</b><br/>Mr. Steven Striegl,<br/>Owner</p>                           | <p>Date: July 23, 2018<br/>Weather: Sunny with an outdoor temperature of 25° C<br/>Assessor: Mr. John (Gianni) Lametti<br/>Duration: 1.5 hours</p> <p><b>Question 1: When was the building constructed approximately.</b> The building was constructed in the 1930's.</p> <p><b>Question 2: What type of Operation was it?</b> It was a slaughterhouse for Hogs.</p> <p><b>Question 3: When did this operation cease.</b> The slaughterhouse ceased in approximately 1970.</p> <p><b>Question 4: Were there fuel oil tanks on the property for the operation of the property?</b> Originally the property was much larger than today and there were above ground storage tanks for diesel and fuel oil on the property. After 1970 the southern portion of the property was subdivided into two properties and the AST and the Maintenance garage that existed were no longer part of the main property but lie along the northern most boundary of the adjoining property to the south. The property to the west boundary used to encompass the Marshalling yard comprised of two buildings from the west which now reside on the property to the west.</p> <p><b>Question 5: Is the entire building floor constructed with concrete?</b> Yes except in one area where the floor is brick lined over concrete located in the area where the furniture was stripped and re-stained and varnished.</p> <p><b>Question 6: Is there any water wells on the property.</b> No</p> <p><b>Question 7: Is the building supplied with Municipal Services?</b> Yes</p> <p><b>Question 8: Does the building have a natural gas hot water or forced air heating system?</b> Natural Gas. <b>Any ideal when the natural gas was first introduced to the building?</b> Building was using natural gas as of 1979 when it was purchased by our family.</p> |

| <b>Contaminants of Potential Concern</b>                | <ul style="list-style-type: none"> <li>• Petroleum Hydrocarbons (PHCs);</li> <li>• Volatile Organic Compounds (VOCs) including Benzene, Toluene, Ethylbenzene and Xylenes (BTEX);</li> <li>• Polychlorinated Biphenyls (PCBs);</li> <li>• Polycyclic Aromatic Hydrocarbons (PAHs); and,</li> <li>• Metals and metal forming hydrides</li> </ul>                                                                                                                                                                                                                                            |
| <b>Uncertainty/ Absence of Information</b>              | Information that was requested was received with the exception of the Freedom of Information (FOI). It is unlikely that the FOI will change the conclusion of the report, however, should new information be found then this report will be amended.                                                                                                                                                                                                                                                                                                                                       |
| <b>Conclusions and Recommendations</b>                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Conclusions</b>                                      | <p>Based on the historical searches, site reconnaissance, and interview, APECs were identified within the Phase One Property. It is recommended that an intrusive investigation be carried out to assess the quality of the soil and groundwater through a Phase Two ESA.</p> <p>For the purpose of development, the Phase One Property was previously used as commercial, and the future development will be residential or residential/commercial. The Phase One Property land use will be more stringent. Therefore, a Record of Site Condition (RSC) is not required at this time.</p> |
| <b>Recommendations</b>                                  | For the purpose of submitting a Record of Site Condition (RSC) for filing under subsection 168.4 (1) of the Act in respect of the Phase One Property, an RSC cannot be filled based on a stand-alone Phase One ESA Report.                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Limitations</b>                                      | The Client may use the findings in this report for these purposes subject to the <i>Statement of Limitations</i> , which forms an integral part of this document. No other third parties are entitled to rely upon this report without the express written consent of HLV2K Engineering Limited. Any use, which a third party makes of this report, is the sole responsibility of the said third party; HLV2K Engineering Limited accepts no responsibility for any damages.                                                                                                               |

We trust you will find this report to be complete within our terms of reference. Should you have any questions regarding the information contained in the report, or require further assistance please contact the undersigned at HLV2K's office.

## 2 INTRODUCTION

HLV2K Engineering Limited (HLV2K) was retained by Typhon Group Limited (hereinafter referred to as the Client) to conduct a Phase One Environmental Site Assessment (ESA) report for the property located at 272 Innisfil Street, Barrie, Ontario (hereinafter referred to as the site and Phase One Property). The Phase One Property is situated in a commercial area between Anne Street and Essa Road, south of the downtown core of Barrie. The Phase One Property is bounded by individual autobody shops to the south and west, by Jacobs Terrace and a CN Rail Line to the north, and by Innisfil Street and commercial land to the east.

The Phase One Property is currently in commercial land use as a multi-tenant building. The purpose of the Phase One ESA is to support the demolition of the current building and future development of a new residential condominium consisting of at least ten (10) stories with one (1) level of underground parking on the Phase One Property. An application for a Record of Site Condition (RSC) will be required to address the more sensitive use of the property as a residential use Phase One Property.

### 2.1 Phase One Property Information

A summary of the Phase One Property Information and the contact information of the owner are provided in the following **Table 1** and **Table 2**.

The location of the Phase One Property is presented in **Drawing No. 1**.

The Legal Survey of the Phase One Property is presented in **Appendix A**.

**Table 1: Phase One Property Information – Authorization and Regulation**

| Parameters                                         | Information                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Work Authorization</b>                          | Authorization to proceed with the Phase One ESA was received on February 22, 2021.                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Purpose of Phase One ESA</b>                    | To support the future development of commercial property to residential or residential/commercial and for the submission of an RSC.                                                                                                                                                                                                                                                                                                                                |
| <b>Record of Site Condition (RSC)</b>              | The Phase One Property is currently in commercial land use as a multi-tenant building. The future development of the Phase One Property is to construct a new residential condominium consisting of at least ten (10) stories with one (1) level of underground parking on the Phase One Property. An application for a Record of Site Condition (RSC) will be required to address the more sensitive use of the property as a residential use Phase One Property. |
| <b>Regulation/Guideline used for Phase One ESA</b> | Ontario Regulation (O. Reg.) 153/ 04 (as amended).                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Sampling and Testing</b>                        | The Phase One ESA does not include any quantifying, sampling, or testing of soil, groundwater, or building materials (if present) on the Phase One Property. Such analysis would be carried out in a Phase Two ESA or a designated hazardous building materials survey if warranted.                                                                                                                                                                               |
| <b>Reliance of Report</b>                          | The findings in this report may be used and relied upon by the Client. No other third parties are entitled to rely upon this report without the express written consent of HLV2K Engineering Limited. Any use that a third party makes of this report is the sole responsibility of the said third party; HLV2K Engineering Limited accepts no responsibility for                                                                                                  |

| <b>Regulation/<br/>Guideline used for<br/>Phase One ESA</b> | The Phase One ESA is to be carried out in accordance with Parts I through VI of Schedule D of O. Reg. 153/04 (as amended), made under the Environmental Protection Act (R.S.O. 1990, Chapter E.19).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Records Review</b>                                       | <p>The records review for the Phase One Property and the Phase One study area (A minimum 250-meter (m) zone around the property boundaries) will include a review and interpretation of Chain of Title Search, Fire Insurance Plans, Aerial Photographs Historical and Current, Topographical, Physiography, and Geological Maps, Previous Phase One ESA, Phase Two ESA and Geotechnical Reports if available, Well Head Protection Areas, Areas of Natural and Scientific Interest (ANSI) maintained by MNR, Water Well Information System, Permits to Take Water, Waste Disposal, Sites, Waste Generator and Receiver Information (Ontario Regulation 347), Private &amp; Retail Fuel Storage Tanks (TSSA), Coal Gasification Plants and Coal Tar and Related Tar Industries, Certificates of Approval, Environmental Compliance Reports, Orders, Spills, Notices, Offences or Inspection Reports by the MECP, Inventory of PCB Storage Sites, RSC on adjoining property, Certificates of Property Use, National Pollution Release Inventory (NPRI), National PCB Inventory and all other available illustrated atlases, land registry records and government records.</p> <p>A Freedom of Information (FOI) request was ordered to the Ministry of the Environment, Conservation and Parks (MECP) for a record search in relation to any reportable spills, orders, and convictions associated with the Phase One Property.</p> <p>EcoLog Environmental Risk Information Service (ERIS) was obtained for a search in all available environmental databases, which included but not limited to the following databases:</p> <ul style="list-style-type: none"> <li>• National Pollutant Release Inventory (NPRI); PCB information; Environmental Approvals, permits and certificates;</li> <li>• Inventory of coal gas plants; Records concerning environmental incidents;</li> <li>• Waste management records including Ontario Regulation 347 Waste Generators;</li> <li>• Fuel storage tanks information including Technical Standards and Safety Authority (TSSA) database;</li> <li>• Landfill information; and,</li> <li>• Records of Site Condition.</li> </ul> |
| <b>Interviews</b>                                           | Interview with the knowledgeable person for the Phase One Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Site<br/>Reconnaissance</b>                              | The site reconnaissance consisted of a walk-through of the Phase One Property and the Phase One Study Area, including a visual inspection of the current land use for the purpose of validating the current and past land uses of Phase One Property that will be identified by the historical searches. The visual inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Parameters        | Information                                                                                                                                                                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   | of the property was also used to identify the potential presence of staining, distressed vegetation on the ground surface. There has been no material change to the property since the last inspection in 2018. Some of the tenants have changed but not the structure. |
| <b>Evaluation</b> | The information gathered from the records review, interview, and site reconnaissance were reviewed and evaluated for any Potentially Contaminating Activities (PCAs) and any Areas of Potential Environmental Concerns (APECs).                                         |
| <b>Reporting</b>  | Preparation of a Phase One ESA Report, which summarizes the findings and provides recommendations for further investigation (if necessary).                                                                                                                             |

## **4 RECORDS REVIEW**

### **4.1 General**

The historical records review of current and past land use of the Phase One Property and the surrounding areas included:

- Land registry records;
- Chain of Title Search;
- Fire Insurance Plans;
- Topographical, Physiographical, Geological Maps; and,
- Aerial photographs (historical and current).

#### **4.1.1 Phase One Study Area Determination**

According to Ontario Regulation 153/ 04, an area that encompasses a minimum 250 m zone around the Phase One Property boundaries (Phase One Study Area) was established to assess Potentially Contaminating Activities (PCAs) associated with current and historical land uses of the surrounding properties, which may potentially affect the environmental quality of the soil and groundwater on, in or under the Phase One Property. Any properties wholly or partly located within the 250 m zone were included in the assessment.

An EcoLog ERIS report (**Appendix F**) was obtained for the Phase One Study Area. Additional searches for other records and databases not included in the EcoLog ERIS report or the city directory search were updated specifically for the Phase One Property.

#### **4.1.2 First Developed Use Determination**

The first developed use was determined from a review of the Aerial Photographs (**Appendix D**), interview with the knowledgeable person, and the Chain of Title search from Crown Land onwards.

The Phase One Property had been developed as a residential property and owned by various landlords. According to the chain of title search, the first development occurred in 1931 when the land changed from Agricultural to industrial use.

#### **4.1.3 Fire Insurance Plans**

A Fire Insurance Plan (FIP) search was updated by EcoLog ERIS and five (5) records were found for the Phase One Property and surrounding areas (**Appendix H**).

##### **FIP Map 1917**

There was no Fire Insurance Map available for the property in 1917.

##### **FIP Map 13 1946**

The Phase One Property operating as a hog slaughterhouse (First Cooperative Packers of Ontario Limited). The main building is visible as one building. The heat for the building is created by a steam boiler fired by coal. The location of coal storage area onsite was not provided.

North of the Grand Trunk Railroad (now known as CNR) were industrial properties which included Imperial Oil LTD., CCIL Frontenac Oil Co LTD and other industrial operations that are not legible on the map.

West of the Phase One Property is vacant land, to south is vacant land and to the east is an industrial property that contains the Simcoe District CO-OP services and Feed mill, Oil storage tanks and coal storage

sheds located along a spur line off the main railroad line.

To the south of the property was an emptied vacant lot followed by residential homes.

#### **FIP Map 7 1971**

New additions compared to the 1946 FIP consisting of new additions to the west with concrete floors that are brick lined, walls and roof. A marketing yard with earthen floor building and concrete floor building with a weigh scale for hogs. There are two refrigerant storage tanks on the roof that were removed in mid 1970's and a transformer north of the building on site. There were two USTs fuel tanks associated with the transport truck maintenance shop to the south.

Northeast corner of the building was used as a veterinary Supplies storage area. North of the CNR railroad line is a concrete block manufacturing site, Texaco Canada Ltd fuel storage tanks and Fertilizer Storage Building.

East of the site is Simcoe District Co-Operative Services. Which now includes USTs for fuel, a Lumber Yard and storage area. Coal storage shed along railroad siding converted to Storage building for Tile , Grain bins and Material storage forming part of the Allendale Lumber, Fuel and Construction Company LTD.

#### **4.1.4 Chain of Title**

A Chain of Title search for the Phase One Property was updated; the following table is a summary for Chain of Title (**Table 4**).

**Table 4: Chain of Title**

| Phase One Property - PIN #58755-0007(LT) |                                                   |                                                   |

The chain of title is attached in **Appendix G**.

#### **4.1.5 Environmental Reports**

The following reports were available for HLV2K's review.

***“Phase One Environmental Site Assessment, 272 Innisfil Street, Barrie, Ontario.”, prepared by Terraqua Investigations Limited. for Copaco Space Rental (Report T677, dated August 8, 1997) (Author: Kim S. Hawkes, P.Eng.)***

- Automotive fluid leaks from trucks and motorcycles impacting surficial soils property to the west.
- Dichloromethane and residual lead-based paints discharging discharged into the sanitary sewer system via the floor drain at No Drip Furniture Stripping Operation.
- Soil or groundwater impacts resulting from spills or leaks associated with the existing or former underground storage tanks located on the property.
- Fluorescent light ballasts and transformer that may contain PCBs.
- Lead-based paints and asbestos possibly present in the initial construction are not considered a hazard unless exposed and disturbed during renovations/deconstruction.
- Recommendation for a Phase II ESA investigating the soil and groundwater.

***“Phase Two Environmental Site Assessment, 272 Innisfil Street, Barrie, Ontario.”, prepared by HLV2K Engineering Limited. for Typhon Group Limited (Report 1800064AE, dated August 23, 2018) (Author: John (Gianni) Lametti, P.Eng.)***

- The site was found to meet the MECP Table 2 Standard RPI in potable groundwater condition for fine and coarse-grained soils suggesting that the PCA's have not adversely impacted the Site at the locations sampled.
- The groundwater flow direction was determined through the groundwater table measurements taken prior to well development and based upon those measurements the groundwater is moving across the subject site in from a southwesterly to north-easterly direction. The groundwater table on the Phase II Property ranged from 3.3 to 4.22 m below ground surface.

#### **4.2 Environmental Source Information**

A search in Federal, Provincial and Private Databases pertaining to the Phase One Property and surrounding properties within the Phase One Study Area was carried out by reference to the following information providers:

- EcoLog ERIS (Order No: 21022500276) dated March 2, 2021
- A Freedom of Information (FOI) request from MECP (**Appendix B**)
- Ontario Water Well Registry
- City of Toronto Interactive Maps

A summary of the records pertaining to the study area interpreted from the ERIS report is provided in the following **Table 5**.

**Table 5: Summary of Environmental Source Information**

### 4.3 Physical Setting Sources

A summary of the current physical setting of the Phase One Property is provided in **Drawing No. 2**

The site is located at approximately 229.8 m above sea level (ASL) and is generally flat land. According to EcoLog ERIS the land slopes to the northeast. The Hotchkiss Creek exist approximately 293 m north and 312 m northwest of the site. Kempelfent Bay is approximately 500 m east of the Phase One Property.

#### 4.3.1 Aerial Photographs

Aerial photographs provide a visual record of the physical conditions of the Phase One Property and Phase One Study Area. The aerial photographs are collected in five (5) to ten (10) year intervals based on availability to best assess the changes of the site. The first available aerial photographs were from 1946. The following aerial photographs were ordered from EcoLog ERIS: 1946, 1955, 1967, 1975, 1981, and 1995. The following satellite photographs were collected from Google Earth: 2006 and 2019.

Copies of the aerial photographs are presented in **Appendix D**.

A summary of the development of the Phase One Property and Phase One Study Area, based on information from the aerial photographs, is presented in the following **Table 7**.

**Table 7: Summary of Aerial Photographs**

| Year        | Phase One Property                                                                                                                  | Phase One Study Area                                                                                                                                                               |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1946</b> | There was one concrete building on the Phase One Property (hog slaughterhouse)                                                      | The surrounding area is mostly vacant land with vegetation. There are some commercial buildings to the north of the property. Some residential buildings are visible to the south. |
| <b>1955</b> | The Phase One Property was Similar to 1946.                                                                                         | The Phase One Study Area was similar to 1946.                                                                                                                                      |
| <b>1967</b> | There was an additional unit added to the building to the south. An additional storage unit is visible to the west of the building. | More residential/commercial developments occurred to the north, south and east along Innisfil Street. Two buildings are visible to the west of the Phase One Property.             |
| <b>1975</b> | The Phase One Property was similar to 1967.                                                                                         | The Phase One Study Area was similar to 1967, with the exception of one new building visible to the southwest of the Phase One Property.                                           |

| <b>Year</b> | <b>Phase One Property</b>                                                                                                                                                                                                                                            | <b>Phase One Study Area</b>                                                                                                        |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>1981</b> | The Phase One Property was smaller in total land area than in 1975. The two (2) warehouses to the west where severed from the Phase One Property as was the area to the south containing the former transport truck maintenance building and two(2) USTs for diesel. | The Phase One Study Area was similar to 1975.                                                                                      |
| <b>1995</b> | The Phase One Property was Similar to 1981.                                                                                                                                                                                                                          | More residential/commercial developments occurred to the west, south and east along Innisfil Street. No other changes are visible. |
| <b>2006</b> | The Phase One Property was Similar to 1995.                                                                                                                                                                                                                          | The Phase One Study Area was similar to 1995.                                                                                      |
| <b>2019</b> | The Phase One Property was Similar to 2006.                                                                                                                                                                                                                          | The Phase One Study Area was similar to 2006.                                                                                      |

According to the observations made from the aerial photographs, the current Phase One Property had been one land parcel including one (1) commercial building.

#### **4.3.2 Topography, Hydrology, and Geology**

A series of drawings are presented at the end of the report showing the topographic, physiographic, and geologic features of the Phase One Property.

Maps for bedrock geology, surficial geology, and physiography were obtained from the Ministry of Northern Development and Mines website in digital formats, which are available to view in Google Earth; Bedrock contour map was obtained from Ontario Department of Mines, Preliminary Map; A description of regional topography, physiography, hydrology and geology in the Phase One study area are presented in the following

**Table 8.**

**Table 8: Summary of Topographical, Physiographical, Hydrological and Geological Condition**

| Parameters          | Information Source                                                                                                                   | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Topography</b>   | <p>Bedrock Geology of Ontario<br/><b>(Drawing No. 5)</b></p> <p>Current Physical Setting Map<br/><b>(Drawing No. 2)</b></p>          | <p>The ground surface elevation of the site is approximately 292.3 m above sea level (ASL). The Phase One Property is bounded by individual autobody shops to the south and west, by Jacobs Terrace and a CN Rail Line to the north, and by Innisfil Street and commercial land to the east.</p> <p>The Hotchkiss Creek exist approximately 293 m north and 312 m northwest of the site. Kempelfent Bay is approximately 500 m east of the Phase One Property.</p>                                            |
| <b>Physiography</b> | Physiography of Southern Ontario<br><b>(Drawing No. 4)</b>                                                                           | The entire Phase One Property is situated on the Sand Plains.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Hydrology</b>    | <p>Toporama – The Atlas of Canada<br/><b>(Drawing No. 3)</b></p> <p>Aerial Photo<br/><b>(Appendix D)</b></p>                         | <p>The closest water body is Kempenfelt Bay at the northwestern portion of Lake Simcoe which lies approximately 0.5 km from the Site.</p> <p>Based on the aerial photographs, the Hotchkiss Creek exist approximately 293 m north and 312 m northwest of the site flowing into Kempenfelt Bay in westward direction.</p> <p>Therefore, the inferred groundwater flow direction is towards northeast.</p>                                                                                                      |
| <b>Geology</b>      | <p>Surficial Geology of Southern Ontario<br/><b>(Drawing No. 5)</b></p> <p>Bedrock Geology of Ontario<br/><b>(Drawing No. 5)</b></p> | <p>The entire Phase One property is comprised of a sand plain with coarse sand and with inclusions of silt and clay.</p> <p>According to the data obtained from EcoLog ERIS, Ontario wells, and Bedrock Oshawa available data for the depth of bedrock, the depth to bedrock can be assumed to be approximately 50 m below ground surface (bgs).</p> <p>The bedrock comprising mainly of Ottawa Group, Simcoe Group, Shadow Lake Formation dominantly limestone, dolostone, shale, arkose, and sandstone.</p> |

#### 4.3.3 Fill Materials

Phase One property was a Slaughterhouse for more than 30 years by its last owner and the original two-storey building development occurred in 1929 as the commercial building was constructed. There were later additions of a two-storey with basement to the front, and a one-storey with partial basement to the rear of the building. A review of the aerial photographs suggests that fill materials were not brought to the Phase One Property. The previous Phase II ESA done by HLV2K found a layer of fill consisting of sandy to silty sand, pieces of brick and gravel extended from 0.2 m to 0.6 m bgs was likely generated onsite so the quality of the material was known.

#### 4.3.4 Water Bodies and Areas of Natural Significance

Hotchkiss Creek is visible on the topographic map (**Drawing No. 3**).

According to Ontario Regulation 153/04, the presence of areas of natural significance is determined from a review of the following:

- The site is not reserved as a provincial park or conservation area;
- The site is not within any Areas of Natural and Scientific Interest (ANSI) identified by the Ministry of Natural Resources (MNR) as having provincial significance;
- The site does not include any area identified as Provincial Significance Wetland (PSW) by MNR;
- The site does not include any area designated as environmental significant in municipal official plans;
- The site does not include any area designated as an escarpment natural area by Niagara Escarpment Plan;
- The site does not include any area which is a habitat of endangered species;
- The site does not include any Oak Ridges Moraine Conservation area; and,
- The site does not include any area designated as a wilderness area.

Therefore, the Phase One Property does not include any areas of natural significance.

#### 4.3.5 Well Records

A summary of the Well Records obtained from the MECP digital well record map is provided in the following **Table 9**.

**Table 9: Summary of Well Records**

| No. On Map | Well ID No. | Distance (m) /Direction from Phase One Property | Well Depth (m) | Ground Elevation (m) | Well Elevation (m) | Static Water Level (m) | Bottom Depth of Sampled Units (m) | Stratigraphy     | Water/ Well Use |
|------------|-------------|-------------------------------------------------|----------------|----------------------|--------------------|------------------------|-----------------------------------|------------------|-----------------|
| 1          | 5700270     | On-Site                                         | 88.4           | 227.6                | N/A                | 82.9                   | 88.4                              | Sand/silt/clay   | Domestic        |
| 1          | 7161345     | On-Site                                         | 6.7            | 227.6                | N/A                | N/A                    | 6.7                               | Silty sand       | Monitoring      |

| Interview Details                     | <p><b>Question 1: When was the building constructed approximately.</b> The building was constructed in the 1930's.</p> <p><b>Question 2: What type of Operation was it?</b> It was a slaughterhouse for Hogs.</p> <p><b>Question 3: When did this operation cease.</b> The slaughterhouse ceased in approximately 1970.</p> <p><b>Question 4: Were there fuel oil tanks on the property for the operation of the property?</b> Originally the property was much larger than today and there were above ground storage tanks for diesel and fuel oil on the property. After 1970 the southern portion of the property was subdivided into two properties and the AST and the Maintenance garage that existed were no longer part of the main property but lie along the northern most boundary of the adjoining property to the south. The property to the west boundary used to encompass the Marshalling yard comprised of two buildings from the west which now reside on the property to the west.</p> <p><b>Question 5: Is the entire building floor constructed with concrete?</b> Yes except in one area where the floor is brick lined over concrete located in the area where the furniture was stripped and re-stained and varnished.</p> <p><b>Question 6: Is there any water wells on the property.</b> No</p> <p><b>Question 7: Is the building supplied with Municipal Services?</b> Yes</p> <p><b>Question 8: Does the building have a natural gas hot water or forced air heating system?</b> Natural Gas. <b>Any ideal when the natural gas was first introduced to the building?</b> Building was using natural gas as of 1979 when it was purchased by our family.</p> |
| Evaluation of Interview               | Information from the interview generally matched our records search with no deviations noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## 6 SITE RECONNAISSANCE

### 6.1 General Information

A summary of the site reconnaissance is provided in the following **Table 11**.

**Table 11: Summary of Site Reconnaissance**

| Parameters                                | Information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Details of the site Reconnaissance</b> | Phase One Property, located at 272 Innisfil, Barrie, Ontario is identified as the following: <ul style="list-style-type: none"> <li>Physical Auto body shop to west of the subject site.</li> <li>Former Underground Storage Tanks (UST) for fuel along the south property boundary.</li> <li>Commercial Garage for automobile repair and fluid changes offsite towards the southwest.</li> <li>Paint stripping shop for furniture in area with a brick lined floor (porous floor). Brick lining was often used for the handling of acids and alkali likely dating back to the slaughterhouse days.</li> <li>Offsite to the east of a former Co-Op distributor of fertilizers, pesticides, and herbicides as garden center. This site was deemed to be downgradient relative to the inferred groundwater flow direction</li> </ul> |
| <b>Site Photographs</b>                   | Provided in <b>Appendix E</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

### 6.2 Specific Observations at Phase One Property

A summary of the specific observations at the Phase One Property is presented in the following

**Table 12.**

**Table 12: Specific Observations of the Phase One Property**

| Parameters                       | Information                                                                                                          |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Property Geometry</b>         | Irregular-shaped parcel covering an area of approximately 0.746 ha (1.84 acres).                                     |
| <b>Current Occupants/Tenants</b> | Commercial with variety of stores and shops in one building<br><b>(Appendix E – Site Reconnaissance Photographs)</b> |
| <b>Structures and</b>            | Phase One Property consists of one (1) concrete block building with                                                  |

| Parameters                                         | Information                                                                                                                                                                                                                                                                 |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Improvements</b>                                | additions to front and back. The additions are evident based on changes in the exterior finishing.                                                                                                                                                                          |
| <b>Above/ below ground storage tanks</b>           | There are no storage tanks on the Phase One Property.                                                                                                                                                                                                                       |
| <b>Potable/ non-potable Water Supplies</b>         | Municipal services supply the Potable water for Phase One Property (Services in use).                                                                                                                                                                                       |
| <b>Underground Utilities and Service Corridors</b> | The City provides these services. There are utilities (gas, water, etc.) on the site.                                                                                                                                                                                       |
| <b>Features of Structures and Buildings</b>        | Commercial dwelling consisting of a main two-storey building with basement with an additional two-storey building at the front, and a one-storey with partial basement at the back.                                                                                         |
| <b>Current/ Former Wells</b>                       | According to EcoLog ERIS, there are five (5) wells on site.                                                                                                                                                                                                                 |
| <b>Sewage Works</b>                                | The Phase One Property is connected to the sanitary system serviced by the municipality.                                                                                                                                                                                    |
| <b>Ground Surface</b>                              | The ground surface of Phase One Property is covered by asphalt.                                                                                                                                                                                                             |
| <b>Exist and Entry Points</b>                      | The property can be accessed via Innisfil Street and Jacob's Terrace.                                                                                                                                                                                                       |
| <b>Railway Lines</b>                               | There are no railway lines on the Phase One Property.                                                                                                                                                                                                                       |
| <b>Comparison to Historical Searches</b>           | The Phase One Property is generally consistent with that inferred from the aerial photographs and historical search.                                                                                                                                                        |
| <b>Stained Soils</b>                               | None observed.                                                                                                                                                                                                                                                              |
| <b>Vegetation or Pavement</b>                      | The Phase One Property was covered by Asphalt with some bushes and areas of vegetation around the building.                                                                                                                                                                 |
| <b>Stressed Vegetation</b>                         | None observed                                                                                                                                                                                                                                                               |
| <b>Areas of Fill</b>                               | None observed                                                                                                                                                                                                                                                               |
| <b>Other Observations</b>                          |                                                                                                                                                                                                                                                                             |
| <b>Potentially Contaminating Activities (PCAs)</b> | The onsite potentially contaminating activities were as follow;<br><b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks<br><b>PCA 55:</b> Transformer Manufacturing Processing and Use<br><b>PCA 39:</b> Paint Manufacturing, Processing and Bulk Storage |
| <b>Unidentified Substances</b>                     | None observed                                                                                                                                                                                                                                                               |

\*Observations in

**Table 12** represent those at the time of the Site Reconnaissance on July 23, 2018.

### 6.3 Enhanced Investigation Property

An Enhanced Investigation Property is defined by Ontario Regulation 153/ 04 (as amended) as a property that is used or has ever been used, in whole or in part, for industrial use (which involves assembling, fabricating, manufacturing, processing, producing, storing, warehousing, or distributing goods or raw materials), or for a garage, bulk liquid dispensing facility or dry-cleaning operation.

The Phase One Property was previously used as an industrial property and an enhanced investigation was undertaken at the Phase One Property.

## 6.4 Written Description of Investigation

### 6.4.1 Investigation Details

HLV2K conducted a site reconnaissance of the Phase One Property to document in detail all the areas of the Phase One Property and its immediate surroundings. Full access to the Phase One Property was permitted and the site reconnaissance survey consisted of the following:

- A thorough walkthrough of the Phase One Property, specifically noting:
  - i. Presence of structures or other features of construction;
  - ii. Surface cover type, areas of staining or anomalous condition;
  - iii. Evidence of stressed vegetation;
  - iv. Areas of fill or debris;
  - v. Presence of unidentifiable substances;
  - vi. The presence of underground/ buried features including storage tanks and utility corridors;
- A perimeter walk around, noting the nature and condition of the Phase One Property limits. Observations of the lands beyond the Phase One Property limits, in all directions, specifically noting:
  - i. Notable properties within the Phase One Study Area were visually inspected from public access ways to identify, locate and document potentially contaminating activities, water bodies, and the potential presence of storage tanks and areas of natural significance;

All observations of notable features were summarized on **Drawing No. 2**.

### 6.4.2 Investigation Findings

PCAs that were encountered during the site visit in 2018 are summarized in **Table 13**.

**Table 13: Site Reconnaissance Findings Relevant to APECs**

| PCA                                                                                                                           | Location                                  | Database                         | Observations                                                               |
|-------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|----------------------------------|----------------------------------------------------------------------------|
| PCA#39: Paint Manufacturing, Processing and Bulk Storage                                                                      | On Site – Unit 15 centre of the property. | EcoLog ERIS, City Directory      | Furniture Stripping and varnishing shop on the Phase One Property          |
| PCA#55: Transformer Manufacturing Processing and Use                                                                          | On site – North East                      | EcoLog ERIS, Fire Insurance Maps | Former large Transformer on site on the north east corner of the property. |
| PCA#28: Gasoline and Associated Products Storage in Fixed Tanks                                                               | On Site, west-southwest                   | EcoLog ERIS, Fire Insurance Maps | Underground storage tanks located offsite along south property boundary    |
| PCA#10: Commercial Autobody Shops                                                                                             | West-southwest                            | EcoLog ERIS                      | Done Right Auto-Care offsite to the west of the Phase One Property.        |
| PCA#52: Storage, Maintenance, fueling and repair of equipment, vehicles, and materials used to maintain transportation system | South-southwest                           | EcoLog ERIS                      | Moffit automotive center offsite south to southwest                        |

## 7 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Current and Past Uses

The Phase One Property uses, as gathered through a review of the available historical information, site reconnaissance, and interviews are presented in the following **Table 14**.

**Table 14: Summary of Phase One Property Uses**

| Year | Phase One Property<br>PIN # 16428-0188(LT)               | Description of Property Use | Property Use | Other Observations<br>from Aerial<br>Photographs, Fire<br>Insurance Plans, etc.                                                     |
|------|----------------------------------------------------------|-----------------------------|--------------|-------------------------------------------------------------------------------------------------------------------------------------|
| 1820 | James Pearson                                            | Agricultural or other use.  | Agricultural | Title Search                                                                                                                        |

| 1992 | George Striegl                             | Commercial                  | Commercial   | Fire Insurance Plan and Aerial Photograph no change to the property.                                                                                      |
| 1997 | Steve Striegl & Sharon Striegl             | Commercial                  | Commercial   | Fire Insurance Plan and Aerial Photograph no change to the property.                                                                                      |
| 2018 | Craig Mull                                 | Commercial                  | Commercial   | Aerial Photographs shows most of the industrial operations to the north, east, and west are gone. Those locations are now strictly commercial operations. |

Notes:

For each owner, specify one of the following types of property uses (as defined in Ontario Regulations 153/04): Agriculture or other use, Commercial use, Industrial use, Institutional use, Parkland, and Residential use.

## 7.2 Potentially Contaminating Activity (PCA)

The current and historic Potentially Contaminating Activities (PCAs) as outlined in Table 2 of Schedule D of the Ontario Regulation 153/04 (as amended) discovered on the Phase One Property and the Phase One Study Area are listed in

**Table 15.**

**Table 15: Summary of PCAs**

| No. on map | PCA #<br>(Table 2, Schedule D, O.Reg. 153/04)            | Direction from Phase One Property | Approximate Distance from Phase One Property (m) | Information Source          | Remarks                                 | APEC  | Rationale                                |
|------------|----------------------------------------------------------|-----------------------------------|--------------------------------------------------|-----------------------------|-----------------------------------------|-------|------------------------------------------|

### 7.3 Areas of Potential Environmental Concern (APECs)

The PCAs identified in Section 7.2 have been evaluated by a Qualified Person (QP) to determine the potential impact to the Phase One Property, and if so, the associated APEC defined.

The APECs outlined in the following

**Table 16** provide the results of the QP's evaluation.

**Table 16: Summary of APECs**

| Area of Potential Environmental Concern <sup>1</sup> | Location of Area of Potential Environmental Concern on Phase One Property | Potentially Contaminating Activity <sup>2</sup>                 | Location of PCA (on-site or off-site) | Contaminants of Potential Concern <sup>3</sup>                          | Media Potentially Impacted (Groundwater, soil, and/or sediment) |
|------------------------------------------------------|---------------------------------------------------------------------------|-----------------------------------------------------------------|---------------------------------------|-------------------------------------------------------------------------|-----------------------------------------------------------------|
| APEC1                                                | Northwest Corner                                                          | PCA#39: Paint Manufacturing, Processing and Bulk Storage        | On Site                               | PHCs, VOCs, PCBs, PAHs, Metals, and Metal Hydrides, EC, SAR, pH, Cl, Na | Soil and Groundwater                                            |
| APEC2                                                | West side                                                                 | PCA#10: Commercial Autobody Shops                               | Off Site                              | PHCs, VOCs, PCBs, PAHs, Metals, and Metal Hydrides, Na, Cl and pH       | Groundwater                                                     |
| APEC3                                                | South                                                                     | PCA#28: Gasoline and Associated Products Storage in Fixed Tanks | Off site                              | PHCs, VOCs, PCBs, PAHs, Metals, and metal Hydrides EC, SAR, Na, Cl      | Soil and Groundwater                                            |

Notes:

1 - Area of Potential Environmental Concern (APEC) means the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One ESA, including through:

- (a) Identification of past or present uses on, in, or under the Phase One Property, and
- (b) Identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

4 - When submitting a record of site condition for filing, a copy of this table must be attached.

|                             |        |                 |                              |
|-----------------------------|--------|-----------------|------------------------------|
| ABNs                        | PCB's  | Metals          | Electrical Conductivity/ SAR |
| CPs                         | PAH's  | As, Sb, Se      | Cr (VI)                      |
| 1,4-Dioxane                 | THMs   | Na              | Hg                           |
| Dioxins/Furans, PCDDs/PCDFs | VOC's  | B-HWS           | Methyl Mercury               |
| OCs                         | BTEX   | Cl <sup>-</sup> | high pH                      |
| PHC's                       | Ca, Mg | CN <sup>-</sup> | low pH                       |

### 7.3.1 Rationale

The rationale for the exclusion of one or more PCA's may be the result of, but not limited to, the location and distance of the PCA in relation to the Phase One Property, the direction of groundwater flow, and the results from previous environmental reports pertaining to the Phase One Property (if any).

A summary of the rationale used to exclude some PCAs is presented in **Table 17**.

**Table 17: Rationale for PCA Exclusions**

| No. | PCA # (table 2, Schedule D, Ontario Regulation 153/04) | Direction from Phase One Property | Approximate Distance from Phase One Property (m)) | Remarks      | Rationale                                                                  |
|-----|--------------------------------------------------------|-----------------------------------|---------------------------------------------------|--------------|----------------------------------------------------------------------------|
|     | PCA#46: Rail yards, tracks, and spurs                  | N                                 | 56 m                                              | CN Rail Line | Downgradient relative to groundwater flow direction.                       |
| 41  | PCA#39: Paint Manufacturing, Processing and Bulk       | NNW                               | 115.0 m                                           | Paint Store  | Up gradient and cross gradient relative to the groundwater flow direction. |

| No.          | PCA # (table 2, Schedule D, Ontario Regulation 153/04)                                                                                              | Direction from Phase One Property | Approximate Distance from Phase One Property (m) | Remarks                                                              | Rationale                                                                                                          |

| 32           | PCA#28: Gasoline and Associated Products Storage in Fixed Tanks                                                                                     | E and WNW                         | 173.7 m and 294.8 m                              | Gasoline storage tank, gas tank, and pump                            | Down Gradient for East source and upgradient and cross gradient relative to the groundwater flow direction         |
| 55 & 92      | PCA#42: Pharmaceutical manufacturing and processing                                                                                                 | ENE                               | 248.1 m                                          | Pharmacy (Pharmasave Allandale, formerly Tristar Pharmacies Limited) | Downgradient relative to the groundwater flow direction                                                            |
| 70           | PCA#40: Pesticides (Including Herbicides, Fungicides, and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications | ESE                               | 47.3 m                                           | History of pesticide Handling                                        | Downgradient relative to groundwater flow direction                                                                |
| 13 & 30 & 72 | PCA#10: Commercial Autobody Shops                                                                                                                   | ESE, ESE, N, W                    | 47.3 m, 108.8 m, 141.8 m, and 249.4 m            | Autobody shops                                                       | Downgradient relative to groundwater flow and for west upgradient and cross gradient relative to groundwater flow. |
| 13           | PCA Other – Spills                                                                                                                                  | ESE                               | 47.3 m                                           | History of spills                                                    | Downgradient relative to groundwater flow direction                                                                |
| 21           | PCA#22: Fertilizer Manufacturing, Processing, and Bulk Storage                                                                                      | N                                 | 79.6 m                                           | History of fertilizer storage (1971)                                 | Downgradient relative to groundwater flow direction                                                                |
| 21           | PCA#28: Fertilizer Manufacturing, Processing, and Bulk Storage                                                                                      | N                                 | 79.6 m                                           | History of fuel tanks (1971)                                         | Downgradient relative to groundwater flow direction                                                                |

### 7.3.2 Uncertainties or Absence of Information

At the time of preparing this report, all requested search information has been received, and no uncertainties or absence of information are expected to affect the validity of the Conceptual Site Model.

## 7.4 Phase One Conceptual Site Model

### 7.4.1 Conceptual Site Model Drawings

The PCAs and APECs (if any) identified within the Phase One Study Area and within the Phase One Property is depicted in the Conceptual Site Model, **Drawing No.7**, which also shows the following required information:

- Existing buildings and structures within the Phase One Property (if any) and within the Phase One Study area;
- Any water bodies located in whole or in part on the Phase One Study Area;
- Any areas of natural significance located in whole or in part on the Phase One Study Area;
- Any drinking water wells at the Phase One Property;
- Any roads including names within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property;

- Any areas where PCAs has involved, and/or any storage tank locations; and,
- Any identified APECs.

#### 7.4.2 Description and Assessment

The PCAs on the Phase One Property and within Phase One Study Area identified through the records review, interview, and site reconnaissance are summarized in **Table 18** as follows:

**Table 18: CSM – PCAs**

| No. On Map | PCA #<br>(Table 2, Schedule D, Ontario Regulation 153/04)                                                                     | Direction from Phase One Property | Approximate Distance from Phase One Property (m) |
|------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|--------------------------------------------------|
| 1          | PCA#39: Paint Manufacturing, Processing and Bulk Storage                                                                      | On Site                           | 0 m                                              |
| 1          | PCA#55: Transformer Manufacturing Processing and Use                                                                          | On site                           | 0 m                                              |
| 8          | PCA#28: Gasoline and Associated Products Storage in Fixed Tanks                                                               | S                                 | 5 m                                              |
| 8          | PCA#52: Storage, Maintenance, fueling and repair of equipment, vehicles, and materials used to maintain transportation system | S                                 | 15 m                                             |
| 6          | PCA#10: Commercial Autobody Shops                                                                                             | W                                 | 23.4 m                                           |

A total of five (5) PCAs were identified. A total of five (5) APECs were identified for the Phase One Property.

#### 7.4.3 Contaminants of Potential Concern

Contaminants of potential concern include the following:

- Petroleum Hydrocarbons (PHCs);
- Volatile Organic Compounds (VOCs) including Benzene, Toluene, Ethylbenzene and Xylenes (BTEX);
- Polychlorinated Biphenyls (PCBs);
- Polycyclic Aromatic Hydrocarbons (PAHs); and,
- Metals, metal hydrides, EC, SAR, and pH.

#### 7.4.4 Potential for Underground Utilities to Affect Contaminant Distribution and Transport

Underground utilities are expected to travel across the northern portion of the Phase One Property along Jacob's Terrace. Any contaminants present in this portion of the Phase One Property are likely to have experienced localized enhanced migration and distribution because of such features.

#### 7.4.5 Available Regional or Site-Specific Geological or Hydrogeological Information

The entire Phase One property is comprised of a sand plain with coarse sand and with inclusions of silt and clay.

The bedrock comprising mainly of Ottawa Group, Simcoe Group, Shadow Lake Formation dominantly limestone, dolostone, shale, arkose, and sandstone and is located approximately 50 m bgs.

The closest water body is Kempenfelt Bay at the northwestern portion of Lake Simcoe which lies

approximately 0.5 km from the Site. Based on the aerial photographs, the Hotchkiss Creek exist approximately 293 m north and 312 m northwest of the site flowing into Kempenfelt Bay in westward direction. Therefore, the inferred groundwater flow direction is towards northeast.

#### **7.4.6 Uncertainties or Absence of Information**

Information that was requested was received with the exception of the Freedom of Information (FOI). It is unlikely that the FOI will change the conclusion of the report, however, should new information be found then this report will be amended.

## **8 CONCLUSIONS**

Based on the records review, previous reports, site reconnaissance and interview, several PCAs have been identified, and at least five (5) APECs were encountered for the Phase One Property. Hence, a Phase Two ESA update is required in order to file for an RSC.

An RSC is required since the land use is changing from commercial to Residential. In accordance with O.Reg 153/04 as amended, if a property is mixed use the applicable site condition standard is based on the more stringent property use, in this case residential.

### **8.1 Whether Phase Two ESA Required Before RSC Submitted**

For the purpose of submitting a Record of Site Condition (RSC) for filing under subsection 168.4 (1) of the Act in respect to the Phase One Property, a Phase Two Environmental Site Assessment (ESA) is recommended to address PCAs, and APECs encountered during Phase One ESA.

### **8.2 RSC Based on Phase One ESA Alone**

For the purpose of submitting a Record of Site Condition (RSC) for filing under subsection 168.4 (1) of the Act in respect of the Phase One Property, a submission cannot be made with this Phase One ESA alone.

## **9 ASSESSOR QUALIFICATIONS**

HLV2K Engineering Limited provides geotechnical, geo-environmental engineering, environmental sciences, and material testing and inspection services. Incorporated in 2018, it operates in Ontario under a Certificate of Authorization issued by PEO and carries both general and professional liability insurance.

John (Gianni) Lametti is a Principal and Manager of Environmental Services, a Professional Engineer (P. Eng.), and a Qualified Person (QP). Mr. Lametti has over 35 years of experience in the environmental consulting industry and has managed several major Phase I/One and Phase II/Two Environmental Site Assessment and RSC submission portfolios for clients in the Greater Toronto Area.

Mr. Lametti has also managed remediation projects including but not limited to bioremediation, various in situ programs for soil and groundwater, off-site removal, design, innovative technology, and strategy implementation, insurance projects, PCB removal, soil investigations, groundwater investigations, tank removals, and design of sub-floor venting systems.

Mr. Lametti is known for maintaining high levels of communication between contractors, clients, and other stakeholders. His skills in solving environmental problems with practical solutions that deliver both value and efficiency have been refined on projects across North America, South America, and Asia.

## 10 CLOSURE

This report is to the *Statement of Limitations*, which forms an integral part of this document. The *Statement of Limitations* is not intended to reduce the level of responsibility accepted by HLV2K, but rather to ensure that all parties who have been given reliance for this report are aware of the responsibilities each assumes in so doing.

We trust you will find this report to be complete within our terms of reference. Should you have any questions regarding the information contained in the report, or require further assistance please contact the HLV2K office.

**For and on behalf of HLV2K Engineering Limited**

**Mariam Mohammadi, BSc.**  
Environmental Scientist

I have reviewed the report and confirm that the Phase One ESA, including findings and conclusions, have been carried out in accordance with the requirements of O.Reg. 153/04, as amended, in effect as of the date of this report.

John (Gianni) Lametti, P. Eng. QP<sub>ESA</sub>  
Principal & Environmental Manager

# **Appendix A: Legal Survey**

SURVEYOR'S REAL PROPERTY REPORT  
(PART 1) TOPOGRAPHIC SURVEY OF PART OF  
**LOTS 1, 2, 3, 4, 5, AND 6**  
SOUTH SIDE OF JACOB'S TERRACE  
AND PART OF

**LOTS 2 AND 3**

WEST SIDE OF BALDWIN STREET

**REGISTERED PLAN 30**

GEOGRAPHIC TOWNSHIP OF INNISFIL

**CITY OF BARRIE**

**COUNTY OF SIMCOE**

RUDY MAK SURVEYING LTD.

**SURVEYOR'S CERTIFICATE**

- I CERTIFY THAT:
- THIS SURVEY AND PLAN ARE CORRECT AND IN ACCORDANCE WITH THE SURVEY ACT, THE SURVEYORS ACT AND THE REGULATIONS MADE UNDER THEM.
  - THE SURVEY WAS COMPLETED ON THE 3RD DAY OF OCTOBER, 2018.

DATE 16. 2018  
RUDY MAK  
ONTARIO LAND SURVEYOR

**BENCHMARK**  
SITE BENCHMARK IS THE TOP OF THE SIB NEAR THE NORTHEAST CORNER OF LOT 1, HAVING AN ELEVATION OF 228.40

**ELEVATION NOTE:**  
ELEVATIONS ARE GEODETIC IN ORIGIN AND WERE DERIVED FROM OBSERVED REFERENCE POINTS (ORP) USING THE LEICA SMARTNET NETWORK (2010 EPOCH) AND ARE REFERRED TO THE CGVD-1928/1978 DATUM.

**BEARING NOTE:**  
BEARINGS ARE UTM GRID, DERIVED FROM OBSERVED REFERENCE POINTS A TO B, BY REAL TIME NETWORK (RTN) OBSERVATIONS, UTM ZONE 17, NAD83 (ORIGINAL) (2010 EPOCH).  
FOR BEARING COMPARISONS A ROTATION OF 0°55'15" COUNTER-CLOCKWISE WAS APPLIED TO BEARINGS ON P1, P2, AND P3.

**NOTES:**  
THIS TOPOGRAPHIC SURVEY PLAN DELINEATES THE FEATURES AS SHOWN AND VISIBLE, GIVEN THE SITE CONDITIONS. CONSTRUCTION ACTIVITY, FROZEN GROUND, SNOW COVER, ETC. MAY HAVE HIDDEN FEATURES OTHERWISE VISIBLE. THE LOCATION OF UNDERGROUND SERVICES, IF SHOWN, WAS DERIVED FROM PLANS OBTAINED FROM OTHER AGENCIES. RUDY MAK SURVEYING CANNOT BE HELD RESPONSIBLE FOR THE LOCATION AND ACCURACY OF UNDERGROUND SERVICES. THE LOCATION OF ALL SERVICES MUST BE VERIFIED ON SITE. ONLY A SIGNED AND SEALED PAPER COPY OF THIS SURVEY IS AN ORIGINAL COPY. NO DIGITAL VERSION OF THIS PLAN IS TO BE CONSIDERED "ORIGINAL" AND MAY HAVE BEEN ALTERED BY OTHERS.

IN ACCORDANCE WITH REGULATION 1026, SECTION 29(3) DRAWN BY: JAC CHECK BY: RAP FILE NO. 13382

**SURVEYOR'S REAL PROPERTY REPORT  
(PART 2) REPORT SUMMARY**

**Description of Land**  
PART OF LOTS 1, 2, 3, 4, 5, AND 6, SOUTH SIDE OF JACOB'S TERRACE, AND PART OF LOTS 2 AND 3, WEST SIDE OF BALDWIN STREET, REGISTERED PLAN 30, GEOGRAPHIC TOWNSHIP OF INNISFIL, CITY OF BARRIE, COUNTY OF SIMCOE.

**Registered easements and/or Right-of-Ways**

PARCEL IS NOT SUBJECT TO EASEMENT AS PER CURRENT TITLE DESCRIPTION OF P.L.N. 58755-0007(L1).

**NOTE:**  
EASEMENTS AND FURTHER RESTRICTIONS ON ANY OR ALL OF THE PARCEL MAY BE FOUND IN THE ORIGINAL CHRON PATENT, ZONING BY-LAWS, OFFICIAL PLANS, SUBDIVISION AGREEMENTS, DEVELOPMENT AGREEMENTS ETC. AND THIS SURVEY AND PLAN HAS NOT SEARCHED FOR THESE RESTRICTIONS. NOR DO WE ACCEPT ANY LIABILITY WITH RESPECT TO ANY OF THESE ELEMENTS.

**Boundary Issues**

NONE.

**Compliance with Municipal Zoning By-Laws**

Not certified by this Report.

**Additional Remarks**

NOTE LOCATION OF WIRE AND CHAIN LINK FENCE AND EDGE OF ASPHALT. P.L.N. DOES NOT INCLUDE "PART OF LOT 6, SOUTH SIDE OF JACOB'S TERRACE, REGISTERED PLAN 30"

THIS REPORT WAS PREPARED FOR TYPHON GROUP LIMITED AND THE UNDERSIGNED ACCEPTS NO RESPONSIBILITY FOR USE BY OTHER PARTIES.

**DISTANCES**

DISTANCES ARE GROUND AND CAN BE CONVERTED TO GRID BY MULTIPLYING BY THE COMBINED SCALE FACTOR OF 0.998679.

OBSERVED REFERENCE POINTS (ORP) DERIVED FROM GPS OBSERVATIONS USING THE LEICA SMARTNET NETWORK, UTM ZONE 17, NAD 83 (ORIGINAL) (2010 EPOCH).  
COORDINATES TO URBAN ACCURACY PER SEC. 14 (2) OF O.R.G. 216/10

| POINT ID | NORTHING   | EASTING   |
|----------|------------|-----------|
| ORP A    | 4914084.92 | 603963.01 |
| ORP B    | 4914117.49 | 604052.38 |

COORDINATES CANNOT, IN THEMSELVES, BE USED TO RE-ESTABLISH CORNERS OR BOUNDARIES SHOWN ON THE PLAN.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Dec 31, 2020**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2018**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Dec 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Dec 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2020**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Jan 31, 2020**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Jan 31, 2020**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Dec 31, 2020**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Oct 31, 2020**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Sep 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Jan 31, 2020****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011-Dec 31, 2020

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 31, 2020

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994-Jan 31, 2020

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-2016

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Jan 2021

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Dec 31, 2020

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Mar 2020; Jul 2020 - Aug 2020

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.
