**Risk Management Plan for:**

[Business Name]

**Address:**

[Business Address]

**Developed to Address the Risks Associated with:**

The [Name of Regulated Activity]

\*Regulated activities commonly associated with **industrial land uses** include the following:

The storage of hazardous or liquid industrial waste

The handling and storage of fuel

The handling and storage of dense non-aqueous phase liquids (DNAPLs)

The handling and storage of organic solvents

**Risk Management Plan No:** [XX-XXX] (assigned by the City)

**Version:** 1

Risk Management Plan [XX-XXX] will come into effect on the date it is signed by the Risk Management Official.

Risk Management Plan [XX-XXX] will expire 5 years from the date in which it is signed by the Risk Management Official, at which point it will need to be renewed.

The City of Barrie is governed by Ontario's Municipal Freedom of Information and Protection of Privacy Act ("MFIPPA") and information submitted to the City may be subject to disclosure under MFIPPA.

This Risk Management Plan does not in any way suggest that there is or has been compliance with any other applicable legislation and regulations that may apply to this facility. It is, and remains, the responsibility of the owner and/or the operator to ensure compliance with all legislative and regulatory requirements

**Section One - Legality:**

WHEREAS The Clean Water Act, 2006 identifies the [regulated activity name] as a significant drinking water threat within the Wellhead Protection Area [WHPA Zone A, B, C &/or D], for the wells located within the [Wellfield Name] Wellfield of Barrie, Ontario;

AND WHEREAS policy number [Policy No] in the South Georgian Bay Lake Simcoe Source Protection Plan designates the [regulated activity name] for Section 58 of the Clean Water Act, 2006, requiring a Risk Management Plan where the activity would be a significant drinking water threat.

AND WHEREAS the [regulated activity name] is occurring and/or may occur in the future at [Business Name] located within the Wellhead Protection Area [WHPA Zone A, B, C &/or D], within the [Wellfield Name] Wellfield of Barrie, Ontario.

**NOW THEREFORE THE PARTIES HEREBY AGREE AS FOLLOWS:**

1. [Business Name] certifies that the information provided in preparation of this Risk Management Plan is true and complete and will provide any further information that may be required on request;
2. [Business Name] agrees to continue engaging in all of the Current Risk Management Measures listed in Section Two;
3. [Business Name] agrees to implement all of the Additional Risk Management Measures listed in Section Three by the specified implementation date;
4. [Business Name] understands that they are solely responsible for implementing the Additional Risk Management Measures listed in Section Three, including any costs that may be incurred;
5. [Business Name] understands that failure to comply with all the requirements of Risk Management Plan [XX-XXX] may result in action by the Risk Management Official or Risk Management Inspector;
6. [Business Name] acknowledges that this plan cannot be transferred to another person or company engaged (or proposing to engage in the activity at the location), without the written consent of the Risk Management Official;
7. [Business Name] acknowledges that Risk Management Plan [XX-XXX] may be subject to the inclusion of Additional Risk Management Measures upon expiration and renewal, and/or revision, in order to stay current with best management practices that pertain to the activities addressed by Risk Management Plan [XX-XXX], and;
8. [Business Name] will, upon reasonable notice, permit the Risk Management Inspector access to the facility for inspection purposes.

**I, [Authorized Signing Officer],**

- a) Possess the authority to bind [Business Name], located at [Business Address] to the content of Risk Management Plan [XX-XXX], and;
- b) Have read and understand Risk Management Plan [XX-XXX] in its entirety and agree to not engage in the activity to which this Plan relates at this location except in accordance with Risk Management Plan [XX-XXX].

Section Two - Current Risk Management Measures:	
The following Risk Management Measures were identified as currently being in place at [Business Name] to mitigate risks associated with the [regulated activity name]: *This section will list all of the Risk Management Measures currently in place to mitigate the risks associated with the regulated activity. Below are example measures that may be included depending on the specific activity.*	
<b>Material Tracking</b>	<ul style="list-style-type: none"> <li>An inventory of chemical and chemical waste stored on site is maintained</li> <li>An up to date MSDS/SDS library is maintained for all chemicals stored on site</li> <li>All chemical containers are labelled in accordance with pertinent legislative and regulatory requirements</li> </ul>
<b>Industrial Chemical Handling &amp; Storage</b>	<ul style="list-style-type: none"> <li>Standard operating procedures outline how chemical and chemical wastes are to be stored and handled on site</li> <li>Chemicals are stored in the original packaging in which they were purchased, whenever practical</li> <li>All chemical and chemical wastes are securely stored indoors and in an area where the risk of spills due to collisions is minimized</li> <li>Empty chemical containers are stored in lidded bins until removal from the site</li> <li>Chemical containers are securely closed when not in use</li> <li>All chemical handling is done indoors where the effects of a spill are easily mitigated and contained</li> </ul>
<b>Operational Practices</b>	<ul style="list-style-type: none"> <li>Good housekeeping procedures are in place for all chemical and chemical waste storage areas</li> <li>Only authorized personnel have access to chemical and chemical waste handling and storage areas</li> <li>Containers of chemicals and chemical waste are replaced when evidence of excessive aging or damage is apparent</li> <li>Chemical wastes are removed from the site by an MOECC approved hauler and disposed of in accordance with all applicable regulatory requirements on a regular basis</li> </ul>
<b>Spill Prevention and Contingency</b>	<ul style="list-style-type: none"> <li>Drip pans are used to prevent chemical spills whenever practical</li> <li>All floor drains within chemical and chemical waste handling and storage areas are connected to an oil-water interceptor</li> <li>A spill response kit is available and easily accessible for staff on-site</li> <li>A spill response plan is maintained in the administrative area of the facility at all times; procedures are posted near chemical and chemical waste handling and storage areas.</li> </ul>
<b>Inspections</b>	<ul style="list-style-type: none"> <li>Periodic visual inspections are performed by staff to ensure that chemical and chemical waste storage areas are in good repair and that there are no spills or leaks; logs of these inspections are kept and filed on site</li> <li>Periodic visual inspections are performed by staff to ensure that equipment used in the storage and handling of chemical and chemical wastes are in good repair; logs of these inspections are kept and filed on site</li> </ul>
<b>Training</b>	<ul style="list-style-type: none"> <li>Staff receive training on how to safely store and handle hazardous chemicals; logs of these training events are kept and filed on site</li> <li>Staff receive training on how to safely operate equipment used in the storage and handling of chemical and chemical wastes; logs of these training events are kept and filed on site</li> </ul>

Section Three - Additional Risk Management Measures:		
The following additional Risk Management Measures are required to further mitigate risks associated with the [regulated activity name]:		
Measure	Rationale	Implementation Date
*The Risk Management Official may propose additional risk management measures to be implemented based on any gaps identified in the current risk management measures listed in Section Two.*	*A rationale will be provided for each new measure required.	*This will indicate the date by which the new measure must be implemented.

#### Section Four - Communication & Training Requirements:

##### Communication:

- The person/corporation engaged in the activity shall communicate the contents of the Risk Management Plan to all personnel at the site.
- The person/corporation engaged in the activity shall take all reasonable actions to ensure all personnel comply with the requirements of the Risk Management Plan.
- The person/corporation engaged in the activity shall contact the Risk Management Official within a month of the sale, closure or move in location of the business/facility.

##### Training:

- The person/corporation engaged in the activity shall provide all personnel at the site with annual training regarding the content of Risk Management Plan [XX-XXX]; proof of these training events are to be documented and retained for the active life of the Risk Management Plan.
- The person/corporation engaged in the activity shall provide all personnel at the site with an additional training event should Risk Management Plan [XX-XXX] ever be revised or updated after the annual training was provided to all personnel at the site; proof of these training events are to be documented and retained for the active life of the Risk Management Plan.

#### Section Five - Monitoring , Reporting & Record Retention Requirements:

##### Monitoring:

- The site is subject to periodic inspections and monitoring by the City of Barrie's Risk Management Inspector to ensure compliance with Risk Management Plan [XX-XXX].
- The person/corporation engaged in the activity must continuously monitor the activity to which the plan relates to ensure that the measures contained within Risk Management Plan [XX-XXX] are being performed in accordance with the plan.

##### Reporting:

- The person/corporation engaged in the activity must report to the Risk Management Official any changes at the site that may cause the information within Risk Management Plan [XX-XXX] to no-longer be current.
- The person/corporation engaged in the activity must report to the Risk Management Official if there is a change at the site that could result in a significant drinking water threat.
- The person/corporation engaged in the activity must report to the Risk Management Official any contraventions, accidental or intentional, that occur at the site in regards to the measures identified in Risk Management Plan [XX-XXX].

##### Record Retention:

- The person/corporation engaged in the activity must retain all records and documentation that pertain to Risk Management Plan [XX-XXX] and all measures identified within for the active life of the Risk Management Plan.
